Les Recommandations du Groupe de travail sur l'alphabétisation

Groupe de travail sur l'alphabétisation du Manitoba. Winnipeg : Education et formation professionnelle Manitoba, 1989. 34, 29 p. Bilingue (Recommendations of the Manitoba...). MICROLOG 89-05898 1 fiche

Les recommandations visent des programmes axés sur l'apprenant et sur la collectivité. Dans le cadre de son mandat, le groupe de travail a concentré ses efforts sur quatre groupes cibles soit, les élèves vulnérables, les apprenants adultes, la population autochtone et les apprenants pour qui l'anglais est une langue seconde. On a aussi étudié les préoccupations et les aspirations de ces groupes en matière d'alphabétisation. Les recommandations de ce document visent des points comme les obstacles à l'alphabétisation, les moyens de soutien qui permettent d'atteindre certains objectifs en matière d'alphabétisation ainsi que des approches et des stratégies particulières pour chaque groupe. Finalement, le rapport renferme de nombreuses citations des apprenants et des collectivités apprenantes. ED MS PR SA

Recommandations pour la qualité de l'eau potable au Canada

Comité consultatif fédéral-provincial de l'hygiène du milieu et du travail (Canada). Sous-comité sur l'eau potable. Ottawa : Santé et bien-être social Canada, 1987. 20 p. L'éd. anglaise (Guidelines for Canadian...) sur la même fiche. ISBN 0-660-92196-0 MICROLOG 89-00311 1 fiche

L'eau de boisson ou celle dont on se sert pour cuisiner et pour d'autres usages domestiques doit être exempte d'organismes pathogènes, de substances chimiques ou radioactives dangereuses et avoir un goût et un aspect agréables. Ces normes, qui remplacent celles publiées en 1978, présentent une liste de recommandations, de paramètres et de caractéristiques microbiologiques, chimiques et physiques visant à assurer une eau de qualité aux Canadiens. Recommendations for species selection and management in the amenity plantations of southern Saskatchewan

by J.D. Johnson and G.L. Lesko. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1977. 32 p. : ill. Bibliogr. (Information report ; NOR-X-181) ISSN 0704-7673 MICROLOG 89-00186 1 fiche

Approximately 2500 ha of amenity plantations (trees and shrubs) were established in southern Saskatchewan between 1947 and 1972 to provide shade and shelter for campers and picnickers in a prairie environment. The most important silvicultural problems related to these plantations were species selection, site selection, and proper maintenance after establishment. In 1972 and 1973, a study was carried out to determine the condition of the tree plantation; study the effects of rooting habit in hybrid poplars on moisture utilization; examine the soil moisture content between two rows of hybrid poplars; compare the effectiveness of cultivation and low mowing as water conserving methods, and estimate the minimum spacing requirement of trees on the basis of available soil moisture. • CA FO MS SC

Recommendations of the Manitoba Task Force on Literacy

Manitoba. Task Force on Literacy. Winnipeg : Manitoba Education and Training, 1989. 29. 34 p. Bilingue (Les Recommandations du Groupe...). MICROLOG 89-05898 1 fiche

This document contains the Task Force's recommendations and conclusions based on the thirty hearings held throughout the province between December 1988 and February 1989 in all geographical regions. More than 350 presentations, oral and written, were delivered. Presenters included educators, adult learners, adult literacy practitioners, local business and

community groups, professional education groups, and representatives from schools, colleges and universities

Recommendations to the Government of Alberta on the Maintenance Enforcement Program

Alberta. Advisory Council on Women's Issues. Edmonton : The Council, 1989. 11 p.
Bibliogr.
MICROLOG 89-01774 1 fiche

Divorce and poverty trends make it a virtual given that following the maintenance decision in a Court or by agreement between the parties, women have less money available to live on than their husbands regardless of the number of children in their custody. Enacted in June 1985, the Act was created to enforce maintenance payments awarded by the Court, by allowing individuals to register with the Program when maintenance Orders were in arrears, and registration of the Orders into the Program, so that the Program's enforcement authorities could exercise their powers to pursue debtor spouses. This paper discusses issues that have arisen such as ten-day holds on cheques issued to the creditor spouse, access to file information, 90-day stays that freeze maintenance payments when a variation of an Order is filed, the understaffing of the Program's office, the lack of jurisdiction by the office with other related family agreements, difficulties with the office being located in Edmonton, and the situation where the Maintenance Enforcement Act restricts the ability of the creditor to collect arrears older than three years in duration.

Recreation opportunities inventory

Victoria : B.C. Hydro, Environmental Resources, Recreation Land Management, 1988. 170 p. : maps. ISBN 0-7718-8695-0
MICROLOG 89-01781 2 fiche

Publication inventories the province's hydro reservoirs and rates their recreational use potential with suggestions as to how these resources could be facilitated. Presents information on each reservoir, its potential opportunity rating, range of activities possible and major activities. Includes maps of each reservoir site. Activities suggested include camping and marine activities, and site areas are canvassed as to their road accessibility. BC CU EN PR

Recreational Atlantic salmon catch, 1986, and annual summaries, 1953-1986 for West Newfoundland and South Labrador, Gulf Region

by C.C. Mullins, J.A. Wright and R.R. Claytor. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1989. v, 124 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences : no. 715) ISSN 0706-6465 MICROLOG 89-02739 2 fiche

First in a series of angling data reports for the West Newfoundland and South Labrador Atlantic Salmon Recreational Fisheries. It is a continuation of a similar series of reports published from 1973-83 for all of Newfoundland and Labrador. Data for this report were compiled from salmon angling reports completed weekly for 52 scheduled salmon rivers by fisheries officers and guardians. Data were recorded daily for each river or river segment, including water level, observed and estimated rod-days, observed and estimated grise landings, observed and estimated large salmon landings in South Labrador (hook and release of large salmon landings in Western Newfoundland by season), and other observations. Annual summaries of catch and effort from 1953-86 are presented by the same categories as the weekly summaries. ● AP CA CF CU FI SC

Recreational development capacity study of six lakes in the South Riding Mountain Planning District, 1986

by A.E. Beck. Winnipeg Manitoba Environment and Workplace Safety and Health, 1988. vi, 103 p. : ill. Bibliogr. (Water Standards and Studies report ; no. 88-4) MICROLOG 89-00888 2 fiche

The Planning District abuts the south perimeter of Riding Mountain National Park. The influx of cottagers and other recreationers to what had been a predominately agricultural area resulted in some resource allocation conflicts. The conflicting positions include land owner rights, public demand for recreation opportunities, and concern for the environment. This study identifies the trophic status of the six lakes, and develops specific recommendations with respect to their cottage carrying capacity. CU MS PL PR

Recreational development capacity study of twelve lakes in the South Riding Mountain Planning District, 1985

by A.E. Beck. Winnipeg : Manitoba Environment and Workplace Safety and Health, 1987. ix, 150 p. : ill. Bibliogr. (Water Standards and Studies report ; no. 87-5) MICROLOG 89-00887 2 fiche

The Planning District abuts the south perimeter of Riding Mountain National Park. The influx of cottagers and other recreationers to a predominately agricultural area has coincided with some resource allocation conflicts. The conflicting positions include land owner rights, public demand for recreation opportunities, and concern for the environment. This study presents a compromise between the three conflicting viewpoints. It determines the trophic status of twelve selected lakes, and develops

specific recommendations with respect to their cottage carrying capacity. CU MS PL PR

Recreational mail surveys, 1986 : tidal sportfishing diary program and visitors sportfishing survey

by L. Bijsterveld. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1988. iii, 34 p. : ill. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1962) CSI 21105.019. ISSN 0706-6473 MICROLOG 89-05330 1 fiche

The Program was initiated in 1979 to obtain estimates of the sport catch by B.C. residents fishing in B.C. tidal waters. The survey was first conducted in 1982 to obtain estimates of sport catch and expenditures by visitors fishing in the area. This report serves as a continuation of this series and deals with the 1986-87 results. BC CA CF CU FI SC

Recreational mail surveys, 1987 : tidal sportfishing diary program and visitors sportfishing survey

by L. Bijsterveld. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1989. vi, 35 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2013) CSI 21105.019 ISSN 0706-6473 MICROLOG 89-05787 1 fiche

The tidal sportfishing diary program is a mail survey of resident B.C. tidal water anglers introduced in 1979 as a method of estimating recreational catch and effort. The visitors sportfishing survey was first conducted in 1982 to obtain estimates of sport catch and expenditures by anglers visiting B.C. during the previous year. A systematic sample of 35,000 1986/7 B.C. tidal waters sport fishing licences was drawn, with the B.C. addresses being used for the tidal diary program, while the remainder were used for the visitors sportfishing survey. This report presents the results of the mail survey, categorizing returns by population of resident and visitor anglers, catch, effort, catch per unit effort, and catch and effort by juvenile anglers. A discussion of the methodology is included. BC CA CF FI SC ST

Recruitment incentive programs for physicians, rehabilitation personnel and hospital pharmacists

Fredericton : Dept. of Health and Community Services, 1989. 35, 35 p. Bilingual (Programme d'incitatifs au recrutement...). MICROLOG 89-06384 1 fiche

This document discusses the program, and includes an application form. It also includes model contracts for settlement grants and guaranteed income, and examines the billing procedures for locums, the moving expenses directive, the residency training memorandum of agreement and the psychiatric residents bursaries memorandum of agreement. Finally it presents information on the recruitment incentive program for rehabilitation personnel and pharmacists. AP HE LA PR

Rectangularisation de la courbe de survie et entropie : la situation du Canada, 1921-1981

par D. Nagnur. Ottawa : Statistique Canada, Division des études sociales et économiques, 1985. 38 p. : ill. Bibliogr. (Document de recherche ; no 15) L'éd. anglaise (Rectangularization of the survival...) sur la même fiche. MICROLOG 89-03843 1 fiche

Ce document traite de la courbe de survie, de l'accroissement de la probabilité de survie des âges les plus avancés et de l'amélioration

générale de l'espérance de vie. On examine aussi l'effet de rectangularisation de la courbe de survie sur certaines applications particulières liées aux soins de la santé. ● CA HE

Rectangularization of the survival curve and entropy : the Canadian experience, 1921-1981

by D. Nagnur. Ottawa : Statistics Canada, Social and Economic Studies Division, 1985. 37 p. : ill. (Research paper ; no. 15) French ed. (Rectangularisation de la courbe...) on the same fiche. MICROLOG 89-03843 1 fiche

Rectangularization, or the flattening of the life table survival curve, has occurred over the past several decades in many developed countries of the world in which the demographic transition from high mortality to low mortality is nearly complete. This paper addresses the values of entropy as well as the projection of total life expectancies at two different age-points for both men and women. The implications of this rectangularization with respect to specific health care areas is briefly examined. ● CA HE

Recueil des pratiques courantes au Canada en présence de plombémies supérieures aux limites prescrites

Ottawa : Santé et bien-être social Canada, Direction de l'hygiène du milieu, Direction générale de la protection de la santé, 1988. 24, 24 p. Bilingue (A Compendium of current...). ISBN 0-662-56201-1 MICROLOG 89-02350 1 fiche

Le Comité consultatif fédéral-provincial de l'hygiène du milieu et du travail a agréé le rapport sur les taux de plomb acceptables dans le sang humain à sa réunion du 25 mars 1986. Le Comité a estimé qu'il convenait de jumeler ce rapport à un recueil des pratiques courantes dans le cas de plombémies supérieures aux limites prescrites. Ce document présente les pratiques qui ont cours dans les secteurs de compétence pour traiter du problème de concentration de plomb dans le sang supérieure au niveau acceptable et des modalités de traitement mises en oeuvre à cet égard. ● CA HE LA SC

Recyclage de résidus plombifères dans un four rotatif

Reducing mycotoxins in animal feeds

by H.L. Trenholm...et al. Ottawa : Agriculture Canada, 1988. 22 p. : ill. Bibliogr. *French ed. (Réduction des mycotoxines...) on the same fiche*. ISBN 0-662-16439-3
MICROLOG 89-01959 1 fiche

Mycotoxins are chemicals produced by molds infecting crops both in the field, and during storage, mixing, and delivery of grain and animal feed. Mycotoxin contamination poses a serious threat to the economic viability of grain and farm animal producers since it both reduces crop yields and causes illness in the stock. This booklet describes the life cycle of the *Fusarium* mold, of particular concern in eastern Canada; complex mycotoxin mixtures in moldy grain; prevention of such contamination; detoxification; and guidelines for the safe

handling of moldy grain.

Réduction des mycotoxines dans les aliments destinés aux animaux

par H.L. Trenholm...et al. Ottawa : Agriculture Canada, 1988. 26 p. : ill. Bibliogr. *L'éd. anglaise (Reducing mycotoxins in...) sur la même fiche*. ISBN 0-662-95094-1
MICROLOG 89-01959 1 fiche

Les mycotoxines sont des substances chimiques produites par les moisissures qui infectent les plantes cultivées dans les champs ainsi que les céréales et les aliments pour animaux au cours de l'entreposage, du mélange et de la livraison des produits. Cette publication fournit aux producteurs, aux manipulateurs de céréales et aux minotiers les connaissances acquises à ce jour sur les infections par les moisissures, sur la production de mycotoxines et sur les moyens efficaces de prévention de la contamination et de détoxification des céréales contaminées par les mycotoxines. On y trouvera aussi des lignes directrices sur la façon de manipuler sans danger les produits de céréales contaminés par les mycotoxines.

The Reduction of violent crime and equality for women

by J. Hackler. Edmonton : University of Alberta, Centre for Criminological Research, 1988. 24 p. Bibliogr. (Discussion paper ; 18)
MICROLOG 89-04106 1 fiche

It is not unusual for people to express an interest in the reduction of violent crime without recognizing a link with equal rights for women. This paper suggests links between the equality of women and the reduction of violent crime in the future. It argues that a number of issues relating to the equality of women are related to family violence and thus would have a long term impact on violent crime.

Reference cells for use in cathodically protected concrete

by H.C. Schell, D.G. Manning and F. Pianca. Downsview, Ont. : Ministry of Transportation, Research and Development Branch. 1989. iii, 33 p. : ill. Bibliogr.
MICROLOG 89-03229 1 fiche

Reference cells are needed to measure the potential of embedded steel in cathodically protected reinforced concrete members to ensure that the level of protection is neither too high nor too low. Embedded cells are more convenient than surface cells where access to the protected surface of the structure is difficult, and are essential for use with potential-controlled rectifiers or remote monitoring systems. This paper reports the results of a series of laboratory, outdoor exposure plot, and field tests to evaluate the suitability of candidate embedded reference cells for use in reinforced concrete. Zinc-zinc sulphate, silver-silver chloride, molybdenum-molybdenum oxide, lead-lead oxide cells, and graphite electrodes were evaluated.

Le Réglage de tension des tableaux

Ottawa : Musées nationaux du Canada, Institut canadien de conservation, 1988. 4 p. : ill. (Notes : 10/9) *L'éd. anglaise (Keying out of paintings) sur la même fiche.* ISSN 0714-6221
MICROLOG 89-06339 1 fiche

Les toiles tendues sur un châssis ont tendance à se relâcher. Dans certaines circonstances, on peut parvenir à agrandir les châssis à coins extensibles et redonner ainsi à la toile une tension adéquate. Il s'agit toutefois d'une opération très délicate qui risque, si elle est effectuée incorrectement ou sans nécessité, de causer de graves dommages au tableau. Ce document fait connaître les détails de cette opération et ses limites.

Rehabilitation services for persons with a traumatic head injury : program review

Victoria : Ministry of Health, 1988. vi, 43 p.
MICROLOG 89-01780 1 fiche

Due to financial barriers, victims of traumatic head injuries have been unable to take advantage of an array of specialized rehabilitation services that have been traditionally available to victims with insurance or other third-party settlements. This report proposes a plan of action to improve British Columbia's rehabilitation services for such victims regardless of financial barriers. Presents recommendations on services needed, existing services, the comprehensiveness, accessibility of existing services, and the cost effectiveness of existing resources. The report refers to a similar study for Ontario residents. BC HE PR

Reid vapour pressure of blends of commercial gasoline and alcohols

by M. Von Schoenberg. Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1986. 14 p.
MICROLOG 89-05362 1 fiche

Blends of gasoline and low molecular weight alcohols (methanol, ethanol, propanols, and butanols) are currently marketed in a number of areas of Canada. These blended fuels do not always meet the requirements of the applicable Canadian General Standards Board standard due to the significant Reid Vapour Pressure (RVP) increase which results from the alcohol addition. In order to assess this vapour pressure increase, 10 samples of commercial gasolines were obtained in the Ottawa area. RVP was determined on the samples as received and in blends with alcohols. This report presents the results obtained.

The Relationship between subjective and objective measures of simulator-induced ataxia

by L. Kantor, L.E. Magee and K.M. Hamilton. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. i, 13 p. : ill. Bibliogr. (DCIEM research report ; no. 89-RF-28)
MICROLOG 89-06193 1 fiche

Flight simulators are often used to help train the aircrew of modern aircraft but simulator training can lead to unwanted aftereffects commonly called simulator-induced sickness. Subjective reports of such sickness include loss of balance (ataxia), dizziness, nausea, headache, eyestrain, and general discomfort. Subjective reports of ataxia are not always confirmed by objective tests of balance, possibly because of ceiling effects, and practice effects associated with repeated test presentation procedures. This study investigated the relationship between subjective and objective measures of ataxia by employing performance tests designed to avoid ceiling effects and an experimental design intended to control for practice. Twenty-five military college students were randomly assigned to a control or experimental group, with none reporting balance problems before the study began.

The Relationship between vegetation, soil texture, nutrient status and herbicide treatments on transmission rights-of-way in the vicinity of Essa TS, Georgian Bay Region

by D. Brown. Toronto : Ontario Hydro, Research Division, 1988. v. 39 p. Bibliogr. (Report ; no. 88-211-K)
MICROLOG 89-04577 1 fiche

In the early 1970s, Ontario Hydro shifted its vegetation control policy from a non-selective treatment of all species to a selective treatment of certain target species to promote the development and spread of low maintenance plant communities. Fourteen sites were selected in the area surrounding Essa transformer station, Georgian Bay Region. The vegetation was analyzed using local frequency in a 1 m x 1 m quadrant and a soil core was taken. The distribution of the plant communities was related to the elapsed time since herbicide treatment, soil factors (texture, nutrients, pH), and a north-south gradient.

Release of young spruce and pine from alder competition

by J. Richardson. St. John's : Government of Canada, Canadian Forestry Service, Newfoundland Forestry Centre, 1982. 13 p. Bibliogr. (Information report ; N-X-211) ISSN 0704-7657 ISBN 0-662-12310-7
MICROLOG 89-00152 1 fiche

Competition from undesirable vegetation is a common problem for regenerating young softwood stands, especially on more productive sites. An experiment was established in 1975 to compare several chemical and one mechanical release technique in a young stand of black spruce and jack pine established by aerial seeding and subsequently overtopped by alders and other hardwoods. The herbicides Tordon and 2,4-D (applied during and after shoot growth) and brushcutting were tested. This report presents the results of the experiment up to 4 years after treatment.

Releasing softwood regeneration from overtopping alders

by J. Richardson. St. John's : Government of

Canada, Canadian Forestry Service.
Newfoundland Forestry Centre, 1979. 24 p.
ill. Bibliogr. (Information report, N-X-169)
ISSN 0704-7657
MICROLOG 89-00165 1 fiche

On some forest sites in Newfoundland, a dense cover of alders becomes established several years after wildfire and grows rapidly. A softwood stand can be established by seeding before the alders become a problem, but the new stand subsequently suffers severe competition from the alders. In 1965, a 4-year-old burned area in east-central Newfoundland was seeded from the air with a mixture of black spruce and jack pine. Shortly after the successful establishment of these softwood species, hardwood brush species began to overgrow the spruce and pine, requiring release treatment. A study to compare the effectiveness of mechanical and chemical methods of releasing the softwoods was initiated in 1975 and was observed through 1976 and 1977. This report describes the study and its results to date. Three herbicide treatments and brushcutting were compared.

The Reliability and sensitivity of NDI techniques in detecting LCF cracks in fastener bolt holes of compressor discs

by N.C. Bellinger...et al. Ottawa : National Research Council Canada, National Aeronautical Establishment, 1988. 57 p. : ill. Bibliogr. (Laboratory technical report ; LTR-ST-1651)

MICROLOG 89-00553 1 fiche (Available on fiche only)

The successful implementation of a damage tolerance based life cycle management methodology is strongly dependent on the sensitivity and reliability of the nondestructive inspection (NDI) technique that is used to inspect the component. A demonstration program was carried out to characterize the sensitivity and reliability of several NDI techniques in detecting low cycle fatigue (LCF) cracks in the J85-CAN40 fifth stage compressor disc tie bolt holes. The quantitative data on the probability of detection (POD) of LCF cracks were generated for a conventional liquid penetrant inspection technique using a range of penetrant soaking times, a manual eddy current inspection technique using two sensitivity levels as well as an ultrasonic leaky wave technique using an automated C-scan system. Different statistical distributions were compared to determine which distribution gives the best 95% lower confidence bound about the mean log-logistic POD line.

Répartition géographique des groupes linguistiques au Canada, 1981, première partie : panorama

par J. De Vries. Ottawa : Statistique Canada, Division des études sociales et économiques, 1985. 39 p. Bibliogr. (Document de recherche : no 17) *L'éd. anglaise (The Spatial organization...) sur la même fiche.*
MICROLOG 89-03844 1 fiche

Ce document traite de la répartition géographique des groupes linguistiques au Canada. On traite d'abord de la répartition de la population selon la langue maternelle (particulièrement selon les catégories dénommées 'groupe anglais, groupe français et groupe tiers'). Ensuite, on analyse les variations intercommunales par décomposition statistique de données et on examine la répartition de ces données selon la langue officielle connue (anglophone, francophone, bilingue ou allophone).

Répartitions des risques de mortalité : une analyse de tables de mortalité

par G. Rowe. Ottawa : Statistique Canada, Direction des études analytiques, 1988. 33 p. Bibliogr. (Documents de recherche : no 19) *L'éd. anglaise (Mortality risk distributions...) sur la même fiche.* CSI 01100.214
MICROLOG 89-02300 1 fiche

Cette étude examine la répartition des risques de mortalité au Canada pendant la période 1975-1977. La description repose sur des estimations non paramétriques des densités de probabilité des risques de mortalité dans des groupes d'âges quinquennaux. Ces estimations sont tirées de données sur la mortalité par âge dans des petites régions, après ajustement destiné à tenir compte de la variabilité d'échantillonnage. La variabilité des risques est indiquée dans des tables de mortalité quantiles dont chacune repose sur des estimations des risques à des quantiles fixes des répartitions des risques par âge.

Replica inspection of high temperature components : life assessment, Lakeview unit 4

by M.A. Clark. Toronto : Ontario Hydro, Research Division, 1988. i, 62 p. : ill. (Report ; no. 87-315-K)
MICROLOG 89-02649 1 fiche

As part of the overall life assessment program, replica inspection of selected high temperature components was carried out to identify areas experiencing high temperature creep degradation, manifested in the later stages of creep life by the development of creep cavities or microcracking. The report summarizes the results of the replication work for creep damage and also the results of crack identification work carried out on cracks discovered by other NDE techniques. Three major types of components were examined: HP and IP turbines; high energy steam lines; and boiler headers. Details of individual components and areas are also included, with descriptions and diagrams of the exact locations examined and microstructural features and hardness results obtained from each area.

A Report for the construction of a facility to introduce and remove bromoethane from a fumigation chamber, phase I : fundamental studies for the determination of design and operating parameters

by J. McInerney and M. Goddard. Fredericton : University of New Brunswick, Dept. of Chemical Engineering, 1989. iii, 65 p. : ill.
MICROLOG 89-03378 1 fiche

Agriculture Canada and the New Brunswick seed potato industry have an annual requirement to break dormancy on seed potato samples prior to post harvest testing in Florida, the results of which are required in order to sell any seed lots to the state of Maine. Bromoethane has been shown to effectively break the dormancy period but an economic and environmentally safe technology for application and removal of bromoethane from a leak-tight chamber is required. This report presents the results of a study which examined and evaluated the adsorption system and the absorption-reaction system of treating bromoethane and suggests a preliminary design for a handling technology for processing up to 100 kg of bromoethane vapour in air saturated with water from a 10,000 cubic foot exposure chamber based on the results of the investigation.

Report of reconnaissance soil survey of Winnipeg and Morris map sheet areas

by W.A. Ehrlich...et al. Winnipeg : Dept. of Agriculture, 1953. xiv, 111 p. : ill., maps. (Soils report ; no. 5) *Fold. maps not filmed. Reprinted 1989.*
MICROLOG 89-05872 3 fiche

This reconnaissance survey of soils was undertaken to obtain the essential facts about the soils of the area as a whole, including the characteristics, possibilities and problems of such soils and their location and distribution. The larger part of the area covered by the report is occupied by the extensive clay plain of the Central Lowlands, or the Red River Plain. The report gives a general description of the physical features and surface geology of the area, and more detailed descriptions of the climate and soils. Analytical and experimental data are given for surface soils, with representative profiles. The report concludes with a description of agriculture and land use, and water resources and drainage.

Report of the Chief Election Officer, including recommended legislative changes

Ontario. Chief Election Officer. Toronto : The Officer, 1988. 10, 11 p. *Bilingual (Rapport du Directeur...)*
MICROLOG 89-01239 1 fiche

Following the general election of September 10, 1987, the Office has undertaken its customary review of election practices and procedures. This review is organized according to the order in which topics are covered in the Election Act. In some cases specific recommendations for legislative amendment are made. In other cases optional changes are described. In a third class of situations, those involving pure legislative policy choice, issues are mentioned to remind the Assembly that they are areas of public debate. Finally, in some areas, intended procedural changes that may be implemented by the Chief Election Officer without statutory amendment are described.

Report on cement bonded particleboard, its applications and a preliminary assessment of a plant to be located in Alberta

Ligna Technologies Ltd. S.I. : Canada-Alberta Forest Resource Development Agreement, 1987. vi, 84 p. : ill. ISBN 0-662-16027-4
MICROLOG 89-01407 1 fiche

Study prompted by the availability of the Fulgurt plant, a West German cement bonded particleboard (CBPB) manufacturing facility. The engineering study describes CBPB, compares it to other board products, and presents the historical development, ingredients, exterior and interior applications, workability, and specifications. The only fast curing process considered is the Bison process. A brief market survey establishes the type of current board products and applications where CBPB is better qualified and/or lower priced, indicating also market elasticity. The total capital cost requirements of the plant, operating in Alberta, were investigated along with product cost calculations on a site in the Edmonton area, a site at Cochrane, outside of Calgary, and a new plant of the same size and technology. A gross selling price was assumed in competition with other similar board products. Financial projections include balance sheets, income and expense statements, cash flows, and detailed backup documentation.

Report on covenants affecting freehold land

Ontario Law Reform Commission. Toronto : Ministry of the Attorney General, 1989. x, 171 p. Executive summary (21 p.) laid in. Sommaire (23 p.) inclus. ISBN 0-7729-5473-9
MICROLOG 89-06247 3 fiche

Considers both positive and restrictive covenants, or obligations, affecting land, other than those between landlord and tenant. The Commission identifies two fundamental deficiencies in the law of covenants. As the principal difficulty, the Commission cites the fact that, except in the landlord and tenant context, the burden of a positive covenant does not run with land. The second problem the Commission identifies deals with restrictive covenants. The report concludes with the Commission's two general recommendations to address these deficiencies.

Report on deeds and seals

Victoria : Law Reform Commission of British Columbia, 1988. ii, 47 p. Bibliogr. ISBN 0-7718-8679-9
MICROLOG 89-00361 1 fiche

In general, the law acknowledges two methods for people to define the legal parameters of their dealings, the contract and the deed. This report considers two questions, the formalities required to create a specialty obligation, and the legal distinctions existing between specialty and simple obligation. The answers to these questions involve some understanding of the historical development of deeds and seals, as discussed in Chapter II. In Chapter III, the law governing the making of a deed is examined, while Chapter IV is concerned with the legal distinctions drawn between specialty and simple obligations. Proposals for reform are presented in Chapter V.
BC JU PR

Report on floating charges on land

Victoria : Law Reform Commission of British Columbia, 1989. 43 p. ISSN 0843-6053
ISBN 0-7718-8748-5
MICROLOG 89-02959 1 fiche

Floating charges on land serve a limited but useful function in commercial financing. It is therefore necessary to ensure that they are accommodated within the schemes for registering security interests against various types of property. In the near future, adoption of a Personal Property Security Act will substantially alter the way in which corporate security interests are registered. At that time, floating charges on land, as a security device, will be jeopardized unless steps are taken to create a new scheme for registering uncrystallized charges. An independent reason for undertaking reform is that a number of problems exist under the current regime for registering floating charges on land. The scheme recommended in this report provides a simple but effective way of meeting the needs of those who use such floating charges as a tool in structuring commercial loans.

Report on H2S toxicity

Edmonton : Alberta Health, 1988. iv, 65 p. Bibliogr.
MICROLOG 89-02221 1 fiche

In October 1982, a sour gas well being drilled near Lodgepole, Alberta, blew out of control. As a result of this event and high public concern over the health risks associated with exposure to sour gas, an Ad Hoc Committee on H2S was set up in 1986. The Committee assessed the scientific evidence for low level acute, subacute and chronic effects of H2S on humans in the range 0-100 ppm, especially 0-20 ppm; and attempted to clarify the issue of

the effects of these low levels on sensitive individuals. This final report is the result of an extensive literature review, and a comparison of animal research data, human experimental data and human epidemiological studies. Background issues and a review of the scientific issues are first given, followed by a review of critical studies, focusing on various parts of the body, and including the carcinogenicity, mutagenicity, and teratogenicity. A Report on the 1979 study of brook trout *Salvelinus fontinalis* populations in the lower Nelson River system

by M.N. Gaboury. Winnipeg : Dept. of Natural Resources, Fisheries Branch, 1980. vii, 52 p. (Manuscript report ; no. 80-23) MICROLOG 89-00695 1 fiche

In 1976, a study was initiated of fisheries resources of the lower Nelson River, including the general biology of brook trout, to assess the effects of hydro-electric development and recommend mitigative measures to protect the fisheries resource. Sampling was done to investigate headwater lakes of the Limestone and Weir rivers to determine the diet, age structure, and timing of movements for brook trout inhabiting the Nelson River estuary; to record salinity and temperature profiles for the Nelson River estuary; to continue studies at the brook trout spawning areas on the Limestone and Weir rivers, and Sky Pilot and Wilson creeks; to provide information on juvenile trout habitat, movements, relative abundance, and diet in the upper reaches of a Weir River tributary and 9-Mile Creek; to estimate fish production in the lower reaches of Gravel Pit and 3-Mile Creeks (Limestone River); and to continue observations of the effects of construction activities upon the fisheries resources.

Report on the Bulk Sales Act

Winnipeg : Law Reform Commission, 1988. iii, 93 p. Bibliogr. (Report ; no. 71) ISBN 0-7711-0848-6 MICROLOG 89-03324 2 fiche

This report begins with a brief look at the historical context in which bulk sales laws arose. It then sets out the provisions of The Bulk Sales Act in detail, including judicial interpretation of similar provisions of bulk sales legislation in other provinces, and a critical evaluation of the Act. The remainder of the report is devoted to the question of whether the present Act can and should be replaced by new legislation to govern bulk sales. It considers the impact of bulk sales of other laws and factors which were not present when bulk sales laws were first introduced, and then considers other ways of devising an effective and commercially viable legislative scheme, and outlines the broad parameters of a scheme designed for this purpose. Finally, it presents an evaluation of this scheme, and recommends the Act be repealed and not be replaced with an alternate scheme.

Report on the characterization of particulate and gaseous emissions from the coal-fired coal dryer at Bullmoose Operating Corporation, Tumbler Ridge, British Columbia

by D. Cianciarelli and R. Capowski. Ottawa : Environmental Protection Programs Directorate, 1985. v, 87 p. : ill. MICROLOG 89-00272 1 fiche

In August 1984, a series of air emission source tests were carried out on the wet scrubber stack of a coal-fired dryer located in a coal preparation plant. These tests were conducted to characterize the particulate and gaseous emissions from an environmentally controlled, coal-fired thermal dryer and to evaluate sampling methodologies for the identification of trace organic emissions. Stack samples were collected to determine the emissions of particulates, selected heavy metals, gaseous HCl and trace organic compounds. Stack gas concentrations were also analyzed on a continuous basis for sulphur dioxide, nitrogen oxides, carbon monoxide, total hydrocarbons and oxygen.

A Report on the fisheries resources of the lower Nelson River and the impacts of hydroelectric development, 1987 data

by G.M. Swanson, K.R. Kansas and R.A. Remnant. Winnipeg : Manitoba Natural Resources, Fisheries Branch, 1988. vii, 295 p. : ill. Bibliogr. (Manuscript report ; no. 88-13) MICROLOG 89-02358 4 fiche

Provincial Fisheries Branch activities in the lower Nelson River watershed continued in the 1987/8 fiscal year in an emphasis on assessing the degree of impact of ongoing hydroelectric development on the fisheries resources of the area and the assessment of techniques which could enhance the fisheries resource or identify areas for enhancement. To assess the

response of brook trout to the impoundment of portions of the Nelson River, 20 brook trout were transferred into the Long Spruce Reservoir-Kettle River system in the fall of 1987 and tagged with 15g, externally mounted, 200-day-life radio tags. The tagged trout were located approximately bi-weekly. Assessment of brook trout fin ray strontium levels was also done as a matter of course in all other studies undertaken in 1987/8 and data are presented in this report.

Statistics on the amount and type of research taking place in B.C. ecological reserves were compiled for a Workshop on Research in

Natural Areas, presented at a meeting of the Canadian Council on Ecological Areas. There is no differentiation between that research taking a few hours or days of work, and that requiring weeks of data gathering each year. The paper gives an overview of inventories, census/monitoring, and basic research, as well as the number of publications resulting, and various miscellaneous data. A list of the actual projects is also included, with location, type of project, and name of researcher.

Research Issues in Child Health and Child Care : proceedings

Fiona Mackenzie, editor ; Kodwo Ewusi, associate editor. Ottawa : International Development Research Centre, 1988. viii, 118 p. : ill. Bibliogr. (Proceedings series ; IDRC-266e) French ed. (Problèmes liés à la recherche...) : 89-06102/2. ISBN 0-88936-523-7 MICROLOG 89-01376 2 fiche (Available on fiche only)

The proceedings discuss methodological and conceptual issues in the study of infant and child health and mortality, and identify new research needs. Health and social scientists from the Gambia, Ghana, Nigeria, and Sierra Leone contributed the papers which emphasize the evaluation of research design and procedures for analyzing the determinants of child health rather than the presentation of findings. The presentations focus on four central themes: conceptual frameworks more appropriate to local contexts, questions of scale and measurement, the search for indicators of child health, and directions for future interdisciplinary research.

Research requirements to determine the effects of silvicultural herbicides on wildlife habitat : a problem analysis -- Rev.

by W.G. Biggs and M.E. Walmsley. S.I. : Forest Resource Development Agreement,

1988. viii, 35 p. : ill. Bibliogr. (FRDA report : 040) ISSN 0835-0752
MICROLOG 89-01341 1 fiche

Forest vegetation management is the science of manipulating unwanted vegetation and other environmental variables to suppress or alter the development of competing plant species in crop tree plantations. Use of the various techniques alters the forage and habitat resources used by wildlife. This analysis considers the extent of herbicide use and documents the concerns and information needs of professional wildlife and forest managers. It contains a review of existing technical literature and identifies several other potential research topics, ranked in order of importance.

Resonant vibration frequencies in concrete ties

prepared for the Transportation Development Centre ; by A. Taras. St. Laurent, Que. : CNR, 1985. xii, 67 p. : ill. TP 8169E.
MICROLOG 89-06045 1 fiche

Concrete ties undergo impact loading in track and tend to oscillate at their resonant bending frequencies as a result. These rather high frequency bending fluctuations all contribute to the fatigue loading environment that the ties must endure. In order to define these frequencies, laboratory tests were conducted on CN60A, CN60B, and CN No. 20 turnout concrete ties. Based on these results, theoretical frequencies were determined for the CN modified Type A concrete bridge tie. This report documents the first 4 bending mode frequencies as well as the concrete damping characteristics for each of the types.

Resource prospects for Canada's Atlantic fisheries, 1989-1993

edited by D. Rivard, W.D. McKone and R.W. Elner. Ottawa : Dept. of Fisheries and

Oceans, Communications Directorate, 1988. xiv, 269 p. : ill. *Bilingual (Perspectives d'avenir...)*. ISBN 0-662-55869-3
MICROLOG 89-01306 3 fiche

Document illustrating the trends which took place in the various fisheries in recent years, and providing a forecast for 1989-1993. Projections are based on the information contained in the most recent assessment for each stock and assume that the biological parameters estimated are known exactly, without error. One hundred simulations were done for each stock, assuming that Total Allowable Catches for 1987 and 1988 are in fact taken, neither exceeded nor under-utilized. An analysis of all major fish stocks of commercial importance in the Northwest Atlantic is included, with the term "fish" taken to mean finfish, shellfish, marine mammals and marine plants. An overview by major species is given, including a general biology for each; a general overview by geographic area (Baffin Bay and Davis Strait, Newfoundland and Labrador, the Gulf of St. Lawrence, and the Scotian Shelf); finally a forecast stock-by-stock, including a section on management, on assessment results, and on prospects for future catches.

Response of wheat, canola, and alfalfa to simulated acidic precipitation

by Z.M. Abouguendia, L.A. Baschak and R.C. Godwin. Saskatoon, Sask. : Saskatchewan Research Council, 1988. 20 p. Bibliogr. (SRC publication : no. E-902-1-A-88)
MICROLOG 89-00334 1 fiche

Acidification of precipitation as a result of anthropogenic acid forming emissions has been reported in many areas of the world, including eastern Canada, and has contributed to damage to vegetation and reduction in forest productivity. While no severe precipitation problems have been attributed to most areas of the prairie provinces, the issue is of growing concern in view of future expansion in the tar sand region of Alberta and the heavy oil region of Saskatchewan and Alberta. This study was initiated to test the response of wheat, canola and alfalfa to simulated acidic precipitation under controlled growth room conditions.

Response techniques for the cleanup of sinking hazardous materials

by N. Bonham. Ottawa : Environment Canada, Environmental Protection Service, 1989. xi, 141 p. : ill. Bibliogr. (Report : EPS 4/SP/1) French ed. (*Techniques d'intervention pour...*) : 89-03644/2. ISBN 0-662-16916-6
MICROLOG 89-03643 2 fiche

'Sinkers' are chemicals that have a specific gravity greater than 1.0 and are relatively insoluble in water. Hazardous chemicals in this category are both solids and liquids and include organic and inorganic compounds such as aromatic organics, halogenated hydrocarbons, some organometallic compounds, and the elements bromine and mercury. Sinkers are among the most difficult chemicals to treat or recover when spilled in water, since they tend to fall or flow to or near the bottom, and, if liquid, may permeate the sediments. This report presents information on the courses of action available to treat sinkers, and the techniques to be used in dredging, containment, covering and solidification/cementation, physical treatment processes, and chemical treatment processes.

Responses of sturgeon to sound : preliminary results

by P.H. Patrick. Toronto : Ontario Hydro, Research Division, 1988. iii, 9 p. : ill. Bibliogr. (Report : no. 87-302-K)
MICROLOG 89-02615 1 fiche

The use of low frequency impulsive sound as a tool in directing or repelling fish away from a specific area has considerable potential. Environmental assessment studies conducted on Mattagami River in northern Ontario indicated a possible concern that sturgeon could be stranded in Adam Creek after passage through the spillway. A fish diversion study was initiated, using approximately 50 small Lake Huron sturgeon collected at the Blind River area of the North Channel, Lake Huron, and transported to Toronto. Preliminary experiments were conducted in a semi-anechoic tank, using the hammer or fishpulsar sound deterrent, with preliminary experiments conducted in a semi-anechoic tank. Sound was generated using a hammer which produced a high amplitude, low frequency, impulsive sound (20-1000 Hz).

Results of parametric studies performed for the development of support design guidelines

by M. Gyenge. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. iv, 45 p. : ill. Bibliogr. (Report ; MRL 87-128(TR)) MICROLOG 89-00481 1 fiche

The dependence of support requirements on rock mass properties was investigated by parametric studies. The stability condition of the various rock masses were assessed by the critical stress and deformation analysis method which is based on rock-support interaction principles. A procedure for underground support design was developed, based on establishing the allowable radial deformation in relations to the support capabilities of artificial systems. The procedures permit assessment of the artificial support potential of specific rock mass conditions and can be used for the selection of the most economic system. The use of the procedures and charts in the design of an artificial system are illustrated in sample design study.

Retrofit evaluation : energy performance

Leslie Jones and Associates. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. vii, 31, vii, 35 p. Bibliogr. (Building performance evaluation series : Document D07) *Bilingual (Evaluation des améliorations...)*.
MICROLOG 89-01922 1 fiche

Retrofit evaluation is concerned with the estimation of the potential energy savings, capital cost, and life cycle costs associated with any proposed physical changes to the building. This manual describes in general terms how this evaluation can be approached using hand calculation techniques and computer models. The manual describes methods of calculating direct and indirect energy savings, estimating capital costs, analyzing cost benefits, and evaluating the possible impact of the retrofit on the performance of other building components and systems.

The Return of Vietnam to the international system

by G. Hervouet. Ottawa : Canadian Institute for International Peace and Security, 1988. 83 p. Bibliogr. (Occasional papers : no. 6) *French ed. (La Réinsertion du Vietnam...)* : 89-03460/1. ISBN 0-662-16588-8
MICROLOG 89-02085 1 fiche

The study discusses the way in which the two major opposing coalitions have used the Khmers as surrogates to fight their battles for them. Secondly, it also covers the confrontational relationship between China, Vietnam and the Soviet Union. Finally, the study gives an account of the various attempts to initiate a dialogue between the opponents. While it is confined to Vietnam and the international consequences of intervention in Kampuchea in 1978, it provides an account of what lies behind the policies pursued by those involved in this regional conflict and the complex way in which they have developed.

Revegetation and chemical composition of mine and mill tailings, ASARCO, Buchans, Newfoundland

by S.S. Sidhu. St. John's : Government of Canada, Canadian Forestry Service, Newfoundland Forestry Centre, 1979. iii, 32 p. : ill. Bibliogr. (Information report , N-X-175) ISSN 0704-7657
MICROLOG 89-00161 1 fiche

The operations of ASARCO (American Smelting and Refining Company) at Buchans, Newfoundland involve mining and concentrating of copper, zinc and lead with ancillary

extraction of gold and silver. During the concentrating process huge quantities of finely ground rock and some untrapped minerals designated as 'mill tailings', are discharged in the form of a slurry into settling ponds. To alleviate the dust problem caused by the drying of the materials in the settling ponds (mill tailings and sand slime), a revegetation program was initiated. The report presents information on field operations carried out by ASARCO, success of seeded species and invasion of the seeded areas by native species, and chemical composition of soil (mill tailings and sand slimes) and vegetation.

Revegetation of oil sands tailings : growth improvement of silver-berry and buffalo-berry by inoculation with mycorrhizal fungi and N₂-fixing bacteria

by Suzanne Visser and Robert M. Danielson ; prepared for the Oil Sands Reclamation Research Program. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1988. xxx, 98 p. : ill. Bibliogr. (Report : RRTAC 88-3)
MICROLOG 89-02222 2 fiche

The ability of actinorhizal shrubs (silver-berry and buffalo-berry), to tolerate inhospitable conditions while improving soil fertility and organic matter status has led to increased usage of these plants for land reclamation and amenity planting purposes. Associated with the roots of these shrubs are two symbionts which result in increased plant performance. This report presents the results of a study to determine the mycorrhizal affinities of various actinorhizal shrubs in the Fort McMurray region; to establish a basis for justifying symbiont inoculation of buffalo-berry and silver-berry; to develop a growing regime for the greenhouse production of mycorrhizal, nodulated silver-berry and buffalo-berry; and to conduct a field trial on reconstructed soil on the Syncrude site to critically evaluate the growth performance of inoculated silver-berry and buffalo-berry as compared with their uninoculated counterparts.

Reverse osmosis fractionation of petroleum and synthetic crude distillates

by B.A. Farnand and H. Sawatzky. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1984. 14 p. : ill. (Report : ERP/ERL 84-54(TR))
MICROLOG 89-04589 1 fiche

Distillation is the most common process for the fractionation of petroleum into various products such as transportation fuels, lubricants, petrochemical feedstocks, and other non-fuel uses. This method generally requires little further refining when used with conventional light petroleum. However, as the quality of available crude petroleum decreases and as synthetic crudes become more prevalent, the product streams require severe upgrading to maintain current quality standards. This report describes a method for the selective concentration of the aromatic and non-aromatic components of petroleum and synthetic crude distillate by reverse osmosis membranes. The separation is based upon the different surface affinities of the different components of the petroleum and synthetic crude distillate with respect to the membrane surface, and their permeation through the membrane under pressure.

A Review of hydrocarbon research and monitoring programs in the Department of Fisheries and Oceans

by K.B. Yuen...et al. Ottawa : Dept. of Fisheries and Oceans, Physical and Chemical Sciences Directorate, 1988. vii, 130 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1684) ISSN 0706-6570 ISBN 0-662-17093-8 MICROLOG 89-04771 2 fiche

Since the oil tanker Arrow ran aground on the shores of Nova Scotia in 1970, the Dept. of Fisheries and Oceans (DFO) has carried out an extensive research program on the behaviour and biological impacts of released petroleum hydrocarbons. As well as the dangers of petroleum hydrocarbons, there is emerging a wide range of toxic chemical problems, many of which may create greater threats to the health of fish, fish habitat and ecosystems. A study was initiated in 1986 to review DFO hydrocarbon pollution research and monitoring programs, and to recommend appropriate long term strategies. This report presents the results of that review, covering DFO's mandate and role, the state of scientific knowledge, relevant Environmental Assessment Review Process recommendations, client interviews, an analysis of existing programs, and regional perspectives and priorities. A list of clients interviewed and the questions asked of them is included, along with summaries of individual interviews.

Review of the Manitoba Continuing Care Program

Price Waterhouse (Firm). S.I. : Price Waterhouse, 1988. 3 v. Contents: Vol. 1 : Executive summary -- vol. 2 : Report -- vol. 3 : Appendices.
MICROLOG 89-01027 7 fiche

This report presents the findings of a broadly based review of the Program. It is organized into six parts. Part I presents the review issues and the methodology. Part II examines program policy, scope and mandate, and program effectiveness. Part III presents a description of the clients and findings on their perceptions of the Program. Part IV reviews program management and focuses on information systems, budgeting, forecasting demand, management accountability, program mandate and program effectiveness. Part V reviews key operational aspects of the Program, including service co-ordination, service delivery, program processes, service workload levels and the program service providers. Finally, Part VI presents implementation options for review recommendations, contained in each section of the report.

Review of the mental health system

Prince Edward Island. Mental Health System Review Committee. Charlottetown : Dept. of Health and Social Services, 1988. iv, 53 p. Bibliogr.
MICROLOG 89-04264 1 fiche

In the spring of 1987, the Department of Health and Social Services indicated in its Strategic Policy Overview that issues in mental health warranted an examination of the service system. Subsequently, the Department was directed by Executive Council to undertake a review of existing mental health services and future needs. This report presents the findings and views of the ad hoc committee established for that purpose.

Review of the Meziadin River Fishway Biological Program for 1987 and 1988

by D.R. Southgate...et al. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, 1988. iii, 79 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 739) ISSN 0706-6465
MICROLOG 89-03999 1 fiche

The Meziadin River flows into the Nass River, with the fishway, constructed to bypass a series of waterfalls and to allow a greater number of returning sockeye salmon access to existing spawning grounds above the falls, about 1 km from their confluence. In 1987, traps were installed on July 5 and removed on September 2, and in 1988 they were installed on July 6 and removed September 6. Counting is done hourly each day for all species of salmon as well as steelhead trout. Sockeye salmon are also sampled daily for sex, scale samples, pectoral fin clip, nose/fork length, and post-orbital to hypural length. Daily water level measurements are also taken. This report presents the results of the 1987 and 1988 survey.

A Review of the Native Affairs Secretariat

prepared by Resource Initiatives Ltd. ; prepared for James Downey, Minister Responsible for Native Affairs. Winnipeg : Resource Initiatives, 1988. 40 p.
MICROLOG 89-02125 1 fiche

The evaluation assesses the following: the appropriateness of centralizing policy and program coordination for Native issues in the Secretariat as a basis for maintaining a mechanism to address these issues; the degree to which departments and agencies of government respect and adhere to the centralizing of policy and program coordination by the Secretariat with regards to Native issues; the ability of the Secretariat to function given its location within government and its reporting relationships; and the means and effectiveness of the Secretariat approach in maintaining communication and liaison with the Native community and its organization with regards to issues of concern. It also addresses the terms and conditions which should form the basis for decisions regarding the allocation of grant funding and other support to various Native organizations.

Review of the radiological significance of revised dose estimates for the Hiroshima-Nagasaki bomb survivors

by D.K. Myers and R.V. Osborne. Ottawa : Atomic Energy Control Board, 1988. 35 p. : ill. Bibliogr. (Research report ; INFO-0279)
MICROLOG 89-00736 1 fiche

Recently, the International Commission on Radiological Protection indicated that new dosimetric and epidemiological data on Japanese bomb survivors will raise the risk estimate (for fatal cancers) for the exposed population by a total factor of the order of 2. This change is for a population of all ages, whereas for a worker population of ages 18-65 the changes will be smaller. This report reviews the available scientific literature relevant to this statement, including methods used in previous reports by scientific committees to calculate estimated lifetime risks of radiation-induced fatal cancers; recent revisions of the dosimetry for Hiroshima-Nagasaki survivors; updates on the epidemiological data on the survivors; and revised estimates of fatal cancer risk from the data.

A Review of the requirements for accreditation of the Analytical Services Section Laboratory

by K.E. Curtis. Toronto : Ontario Hydro, Research Division, 1988. 22 p. Bibliogr. (Report ; no. 88-29-K)
MICROLOG 89-02597 1 fiche

This Section performs a wide variety of chemical analyses on numerous types of samples for clients from Ontario Hydro, with accuracy and reliability of results being the key components of the Section's performance. The key to meeting these requirements is the design and implementation of an effective quality assurance program. Recently, laboratory accreditation by an independent external body has come into use as an additional tool for demonstrating laboratory performance and for competence for conducting various types of analyses. Although the Ontario Ministry of the Environment does not yet use this approach, the advent of their MISA program is likely to lead to the use of accredited laboratories for conducting analyses. Therefore, in order to anticipate this requirement, the Section began an investigation of available accreditation programs during the latter part of 1986. This report documents the organizations evaluated and the suitability of their programs for the needs of the Section.

Review of the scientific basis of water quality criteria for the East Slope foothills of Alberta

Beak Consultants. Edmonton : Alberta Land Conservation and Reclamation Council, Mountain Foothills Reclamation Research Program ; Ottawa : Coal Association of Canada, 1987. viii, 46 p. Bibliogr. (Report ; RRTAC 87-5)
MICROLOG 89-00376 1 fiche

The study was commissioned to establish the scientific rationale for existing wastewater discharge legislation for Alberta East Slopes coal mines. Three water quality parameters - total suspended solids, pH and total iron - and four design flow parameters - applicability of the dam and canal safety guidelines, the two effluent water quality exemptions for 10 year 24 hour precipitation events, and the "no-discharge" requirement for surface runoff from facilities and for tailings ponds were considered.

Data sources for the review included world scientific literature, relevant federal (Canada and U.S.A.), provincial, territorial and state legislation, available background water quality data, and personal communications from coal company and regulatory personnel.

A Review of the wheat blossom midge in Canada

by A. Borkent. Ottawa : Agriculture Canada, Research Branch, 1989. 24 p. : ill. Bibliogr. ISBN 0-662-16765-1
MICROLOG 89-05142 1 fiche

In recent years the wheat blossom midge has regained notoriety as a serious pest of Canadian wheat. This paper reviews the present knowledge of this pest, its morphology, biology and control. Specimens were examined from a variety of localities in Canada, including B.C., Saskatchewan, Manitoba, Ontario, and Quebec. In addition, Palearctic specimens from Finland, England, Germany, Switzerland, and Japan were also examined. Specimens were collected directly from wheat heads (larvae) and by sweeping (adults). Some adults were reared in the laboratory from larval cocoons collected in the field.

Review of waste exchange programs : final report

Acres International Limited. Ottawa : Canadian Council of Resource and Environment Ministers, 1988. 235 p. Bibliogr. ISBN 0-7726-0911-X
MICROLOG 89-04228 3 fiche

In November 1987, the Council commissioned a review of waste exchange programs in Canada, the United States, and overseas. The report examined the effectiveness of waste exchanges in reducing the quantity of hazardous wastes that would otherwise require treatment or disposal; recommended means of improving their effectiveness in achieving this goal; and identified opportunities that could be used to increase financial self-sufficiency of waste exchanges. Information was obtained through a review of the current scientific and technical literature and the administration of a comprehensive survey of 23 waste exchange operations located in Canada, the United States and Europe. Interviews were also conducted with industry and government representatives.

Ride vibration levels at the driver-seat interface

prepared for Transportation Development Centre ; by S. Sankar...et al. Montreal : Concordia University, Dept. of Mechanical Engineering, Concave Research Centre, 1988. v, 16 p. : ill. French ed. (Niveaux de vibrations...) on the same fiche. TP 8990. MICROLOG 89-05256 1 fiche

Ride vibration levels at the driver-seat interface are a function of the ride dynamics of the entire vehicle. A 5-axle tractor-semitrailer was selected as the baseline vehicle and a ride dynamic model was developed which can be conveniently modified to accommodate a number of variations in semitrailer configurations. An in-plane model with 11 degrees-of-freedom was developed, assuming engine and tractor chassis as one rigid body. The ride vibration levels at the driver-seat interface due to random road undulations were investigated through the use of this model. Assuming small perturbations relative to overall dimensions of the vehicle, a set of simultaneous, non-homogeneous, second order differential equations of the vehicle model

were formulated using Lagrange's energy method and a software package TRIDE was developed to determine ride response of the vehicle for given parameters and displacement spectral density of the road profile.

Ridge modelling : model scale simulation of ramming tests conducted with the USCGC Polar Star

by G. Comfort. Montreal : Transport Canada. Transportation Development Centre, 1988. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Main report -- vol. 2 : Appendices. TP 9496E. MICROLOG 89-04036 6 fiche

Description of a project to improve present knowledge of the accuracy of physical model results for ice ridges and the preferred techniques for the production of ice ridges in the model basin. A small number of field ridge ramming tests that were well documented were simulated at 1:9.1 model scale. This report reviews the available full scale data and the selection of field ridge ramming events for modelling; describes preliminary ridge modelling tests at Fleet Technology Ltd.'s ice tank in Kanata and development of a test plan; and describes detailed ridge modelling tests at the Institute for Marine Dynamics in St. John's, Newfoundland. Tests conducted in 1982 in the Bering Sea with the USCGC Polar Star were selected as the reference field event for the study. Parameters varied during the tests included the ice-model friction factor, the speed of the model, and the size, consolidation depth and strength of the model ridges.

Risk and uncertainty in forest management : choosing a method of analysis

by G.C. Van Kooten. Saskatoon, Sask. : Saskatchewan Research Council, 1988. 65 p. Bibliogr. (SRC publication ; no. E-906-33-B-88) (SRC technical report ; no. 219)
MICROLOG 89-00027 1 fiche

A literature review of decision maker risk in economic models and studies using stochastic control was undertaken and models of decision maker risk were reviewed to identify methods which can be used to model uncertainty in forest applications. Dynamic models of forest harvesting and methods for taking into account uncertainty in dynamic models is done theoretically and focuses on deterministic and stochastic formulations of models and how these differ. A comparison of the Lagrangian solution (and gradient methods) with the dynamic programming approach is undertaken, as well as the possibility of including the projection or Leslie matrix in the state transformation equation. An empirical example of forest management under uncertainty is constructed and an optimal cutting rotation with no uncertainty is compared with one in which there is uncertainty, with deterministic and stochastic dynamic programming used for the comparison.

MICROLOG 89-01368 1 fiche

An in-season echo sounding program is operated each year in Rivers Inlet (Statistical Area 9) to assess the sockeye salmon escapement past the commercial fishery. The program is conducted nightly along a fixed pattern of transects at the head of the inlet. Results from the program are used along with weekly catch and effort data to assist in the in-season planning of the Rivers Inlet commercial salmon fishery.

Road and structure protection through weight control : bridge testing

by B. Bakht. Downsview, Ont. : Ministry of Transportation and Communications, 1986. ii, 10 p.

MICROLOG 89-03141 1 fiche

The structural research office of Ontario's Ministry of Transportation and Communications has been regularly testing bridges for the past 15 years and is the only organization in the world where proof testing of bridges is used on a regular basis to evaluate the load-carrying capacity of bridges. This report describes the types of tests (behaviour, proof, ultimate load, stress history, diagnostic), the equipment and personnel required, weighing in motion, and the reasons for unaccounted reserve strengths.

Road and structure protection through weight control : equivalent base length concept

by W.A. Phang, R.A. Dorton and B. Bakht. Downsview, Ont. : Ministry of Transportation and Communications, 1986. ii, 10 p. : ill. Bibliogr.

MICROLOG 89-03142 1 fiche

The design of most highway bridges is predominantly governed by longitudinal moments and shears. The live load portions of these responses are caused by heavy commercial vehicles and are governed by the weights and spacings of their axles. The task of quantifying the heavy vehicles with respect to the load effects they induce in bridges is made difficult by the large number of spans, and by the very large number of axle weights and spacing combinations encountered in practice. This report presents a concept which reduces the number of discrete loads into an equivalent uniformly distributed load, which gives nearly the same maximum moments and shears in any beam as the set of discrete loads.

ON PR SC TR

Road and structure protection through weight control : why a bridge design code?

by B. Bakht and R.A. Dorton. Downsview, Ont. : Ministry of Transportation and Communications, 1986. ii, 6 p.

MICROLOG 89-03143 1 fiche

It is sometimes argued that design codes tend to restrict the creative ability of the designer, and therefore, the ideal requirement should merely be that the structure remains safe while fulfilling its intended functions. This report proposes that the practice of not having a properly drawn up code of practice is not a desirable one. Advantages and disadvantages of codes of varying degrees of complexity are discussed with particular reference to bridges, together with the mechanics of writing a code.

Roadway height measurements, 6 and 7 west panels, Lingan Mine, Sydney Coalfield, N.S. : data compilation report

by D.A. Young, G.R. Corbett and T.R.C. Aston. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 35 p. : ill. Bibliogr. (Report ; CRL 89-4(TR))

MICROLOG 89-04470 1 fiche

In 1983, an extensive roadway deformation survey program was undertaken as part of an ongoing barrier pillar research program in the Sydney Coalfields, Nova Scotia. The survey resulted in the collection of some 35 km of roadway deformation data (roadway height, width and cross-sectional area) from the Lingan and No. 26 mines. Between September 1987 and June 1988, the gateroad deformation data base was extended by undertaking roadway height surveys along both the top and bottom levels of the 6 and 7 West panels at Lingan Mine. This report presents the collected data in a compiled format for easy reference. An analysis of the data was not undertaken.

Rockfish reproductive biology cruise

GBR-R85-1, October 21-November 9, 1985

by B.M. Leaman and D.A. Nagtegaal. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iii, 23 p. : maps. (Canadian data report of fisheries and aquatic sciences ; no. 716) ISSN 0706-6465

MICROLOG 89-02143 1 fiche

In 1982, the Rockfish Program began investigation of the reproductive biology of a long-lived rockfish, Pacific ocean perch. A portion of this study involves estimation of age and size-specific reproductive characteristics (fecundity, oocyte size, maturity, etc.) and their inter-annual variation. The cruise reported on here followed the pattern of an earlier cruise and collected samples from southwest Vancouver Island, Goose Island Gully, Moresby Gully, Rennell Sound, and Langara Spit. In addition to reproductive biology samples, samples of heart, liver, and muscle tissue for electrophoretic examination of protein allozymes were collected. This report presents field sampling data, oceanographic observations, and length-weight relationships.

Rocky Mountain national parks utilization study, stage I : visitor use and profile survey report, vol. I : executive summary

presented to Travel Alberta and Canada-Alberta Tourism Agreement ; by Ruston.Tomany & Associates, Ltd. Toronto : Ruston.Tomany & Associates, Ltd., 1989. 5 v. : ill.

MICROLOG 89-05827 15 fiche

The first stage of this 2-stage project was designed to provide a data base on visitors to the Rocky Mountain National Parks, with the resulting data base to be used in preparing a marketing and development plan. This report presents the results of the visitor use and profile survey, which measured the volume and value of visitors to the parks systems in total and to Banff and Jasper National Parks separately; obtained detailed market information on trip and traveller characteristics; determined current use of facilities, services, attractions, activities, and events in the parks, including

interpretive and education programs and facilities; and identified motivations for visiting the parks and attitudes and perceptions regarding park experiences. The study was a cordon-type survey in which randomly selected representatives of travel parties leaving the 4 Rocky Mountain National Parks via highway, scheduled bus, scheduled train and overnight chartered motorcoach were interviewed from June 15, 1987-June 14, 1988.

The Role of bird dog officers in aerial fire suppression

by W.G. Murray. Chalk River, Ont. : Government of Canada, Canadian Forestry Service, Petawawa National Forestry Institute, 1988. v. 29 p. (Information report ; PI-X-82) ISSN 0706-1854 ISBN 0-662-16441-5
MICROLOG 89-00020 1 fiche

Forest fire suppression agencies across Canada have determined that the use of airtankers is an effective, though expensive, method of combating forest fires. In order to minimize the risks and expense and to maximize the airtanker efficiency, the majority of the agencies also use bird dog officers, which ensure that the aerial portion of the fire suppression operation is carried out in a safe, effective, and efficient manner. A select number of aerial fire operations supervisors and bird dog officers from Canadian Forest Fire Protection agencies were interviewed to identify operational procedures and the role of the bird dog officer in aerial forest fire suppression. The present analysis deals with bird dog aircraft, communications, operational procedures, and the job qualifications of a bird dog officer.

The Role of guided wave acousto-optic interactions in single mode optical fiber design

by C.K. Jen...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 10 p. : ill. Bibliogr.
MICROLOG 89-00588 1 fiche (Available on fiche only)

Stimulated Brillouin backward scattering (SBBS) plays a major role in the low loss long haul single mode optical fiber (SMF) transmission system. In this theoretical study, the backward collinear acousto-optic interaction (BCAOI) between guided acoustic modes and guided HE mode in the fibre core of SMF is analyzed. Due to the recent advent of very high frequency acoustic transducers, BCAOI with high frequency guided acoustic waves generated by such transducers may be realized in SMF and role of such configuration in SMF transmission systems is outlined as well.

Room-temperature aging of Narmco 5208 carbon-epoxy prepreg, part I : physicochemical characterization

by K.C. Cole...et al. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 36 p. : ill. Bibliogr.
MICROLOG 89-01492 1 fiche (Available on fiche only)

Physicochemical characterization of high-performance composite materials consisting of high-strength reinforcing fibers embedded in an organic polymer matrix is becoming more common, because these materials contain a reactive mixture of epoxy resin and hardener in which chemical reactions can occur which will change the physical properties and affect the long-term mechanical performance of parts made from the prepreg. Samples of Narmco Rigidite 5208/WC3000 carbon-epoxy prepreg were exposed to ambient temperature (22°C) and 50% relative humidity for different periods up to 66 days. They were analyzed in depth using the Fourier transform infrared spectroscopy (transmission, attenuated total reflection, diffuse reflection), liquid chromatography (reverse-phase, high-speed reverse-phase, and high-performance size-exclusion), thermal analysis (differential scanning

calorimetry and thermogravimetric analysis), and pyrolysis-gas chromatography to determine the extent of the chemical changes occurring.

Safety of reduced liquid volumes in fuel tanks of road vehicles using alcohol fuels

by E.E. Dainty and G. Lobay. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. i, 15 p. Bibliogr. (Report ; MRL 89-66(TR)). MICROLOG 89-05386 1 fiche

In the first phase of this work, various road vehicle alternative fuels were tested in conjunction with electrical devices normally used in fuel tanks, such as submersible fuel pumps and level sensors. The tests simulated the operation of these devices both under normal and fault electrical conditions at various temperatures to determine whether or not sparks from them could ignite the vapours above the fuel in the tank, thereby causing an explosion. These tests were performed using saturated vapour-air mixtures, which corresponds to all situations except where the tank would be nearly empty. In this phase of the work, the spark ignition investigations involved winter grade (85% MeOH; 13% gasoline; 2% butane) fuel-air mixtures, in quantities intended to simulate nearly empty fuel tanks.

The Sahel : achieving a new balance : a review of Canada's bilateral action plan after two years of operation

Ottawa : Canadian International Development Agency, 1989. 34 p. : ill. *French ed. (Le Sahel : vers un nouvel...) on the same fiche.* ISBN 0-662-56489-8. MICROLOG 89-04188 1 fiche

This publication describes two years of Canadian action in the Sahel. After a brief overview of the situation in the region today, it describes the program as a whole, examines its guidelines and the early results, and reviews its implementation and proposed amendments. The four specific programs (Mali, Niger, Burkina Faso and the Sahel region) are each dealt with separately, giving detailed accounts of the program's achievements and illustrating one major project in each case. Sampling of polychlorinated biphenyl and volatile organic emissions from a mobile PCB destruction facility

by K.E. Curtis. Toronto : Ontario Hydro, Research Division, 1988. 23 p. Bibliogr. (Report ; no. 88-145-K)
MICROLOG 89-02554 1 fiche

Ontario Hydro possesses approximately 3 million litres of insulating oil that are contaminated with low levels of polychlorinated biphenyls (PCBs) in excess of the 50 mg/kg limit that defines PCB waste. In order to recover this oil, or to reduce its PCB content to an acceptable level before disposal, a process was developed in which the chlorine is stripped from the parent compounds by reaction with elemental sodium. This technology was developed to the stage where the process can be carried out in a mobile trailer that can be moved from site to site. Prior to its use in Ontario, Ontario Hydro was required by the Ontario Ministry of the Environment to apply for a Certificate of Approval for its operation. Part of the Provisional Certificate of Approval that was granted required that the emissions in the vent gases from the process be measured. This report describes the sampling program that was carried out to meet this requirement. The analysis of the collected samples and the resulting emission concentrations are described separately.

La Santé et la sécurité du travail dans les conventions collectives québécoises -- Rév.

Québec : Commission de la santé et de la sécurité du travail, 1988. 179 p. (Rapport d'étude ; 2) ISBN 2-550-18281-2
MICROLOG 89-01342 3 fiche

En 1981, la Commission confiait au Laboratoire de recherche du département des relations industrielles de l'Université Laval le soin de mettre en place un projet visant à analyser, dénombrer et classer les clauses de conventions collectives en matière de santé et de sécurité du travail. Cette étude présente chacune des variables utilisées pour décrire les dispositions conventionnelles, explique les codes attribués à ces variables et donne les fréquences (absolues et relatives) pour chacun des codes. Trois informations sont fournies pour chacune des variables: l'explication de la variable retenue et les codes qui y sont associés, la liste de tous les codes utilisés, et la fréquence des codes dans toutes les conventions recensées. L'étude fournit finalement l'identification des conventions analysées et donne l'analyse des dispositions en matière de santé et sécurité du travail.

MICROLOG 89-05024 1 fiche

Le but de ce rapport est de faire un survol du réseau canadien des services de santé et des services sociaux et de donner un aperçu de la mission remplie par le ministère de la Santé nationale et du Bien-être social. Le rapport retrace l'évolution du réseau canadien de services de santé et de bien-être social, à partir d'initiatives de santé publique telles que la mise en quarantaine et la vaccination jusqu'au réseau complet de programmes et de services actuellement en place. Il analyse l'interaction des secteurs bénévole et privé, des administrations publiques et du Ministère, et passe brièvement en revue les dépenses publiques en matière de santé et de bien-être social. Il entreprend ensuite une description de l'état de santé global des Canadiens, des efforts entrepris par le Ministère pour promouvoir et préserver leur santé et du réseau canadien de soins de santé. Finalement il porte sur le soutien accordé aux familles, aux personnes âgées, aux personnes handicapées et à la population à faible revenu.

Saskatchewan Technology Enhancement Program for remote sensing : summary report

by J. Whiting, H. Epp and J.D. Heyland.
Saskatoon, Sask. : Saskatchewan Research Council, 1988. viii, 16 p. : ill. (SRC technical report ; no. 213) (SRC publication ; no. E-905-4-B-88)
MICROLOG 89-02435 1 fiche

Over a 2-year period, the Council, in collaboration with the Canada Centre for Remote Sensing, developed a remote sensing centre to introduce and demonstrate this technology to potential users within the province. The remote sensing activities took place under the Technology Enhancement Program (STEP), and 9 demonstration projects were initiated in consultation with interested federal and provincial departments and agencies to demonstrate the capability of remote sensing technology to address a specific problem of interest to that organization. Each project was to determine whether remote sensing techniques could be utilized operationally to provide a more comprehensive, more timely or less costly answer than that obtainable from previously used approaches. This report provides an outline of STEP and presents brief summaries of the projects.

Saskatchewan's 1987 night-time driver survey

a report to Traffic Safety Services, SaskAuto : from D.J. Hieatt. Regina : SaskAuto, 1989. ix, 66 p.
MICROLOG 89-05484 1 fiche

From Wed. May 28-Sat. June 21, 1987, from 9:00 p.m. to 3:00 a.m. a survey was carried out in which 96 sites were sampled in and around towns and cities of 5000 or more population for 1.5 hours. Information was gathered on province issuing the licence, vehicle type, gender of the driver, driver seat belt use, and number of occupants. Drivers were questioned on origin of trip, trip length, driver age, subjective probability of apprehension of impaired drivers, the number of alcoholic drinks consumed within the last 7 days, attendance at a Driving Without Impairment course, and licence suspension for impaired driving. For drivers found to be drinking, further questions were asked concerning their estimation of whether they were over the legal limit, where most of their drinking was done, attempts by others to discourage them from driving, and use of designated driver. A breath sample was obtained from all cooperating drivers. Data was analysed according to the legal BAC limits and according to the pre-set BAC limits on the roadside screening devices used by the police.

Saskatchewan's forest industry and its economic importance, 1972

by A.G. Teskey and J.H. Smyth. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1975. xiii, 156 p. : ill. Bibliogr. (Information report ; NOR-X-140) ISSN 0704-7673
MICROLOG 89-00148 2 fiche

Quantitative perspective on the contribution of sawmills and planing mills, pulp and waterboard mills, and wood preserving plants to the province's economy. Economic impact variables used include the array of inputs used in primary wood-using industries; labour inputs; wood inputs; types and quantities of products produced; seasonality of labour; number of salaries and hourly workers; native participation in the industry; quantities of board, dimension stock, and timbers produced; and markets and mode of transportation. The forest products industry included all industries classified under Major Groups 8 and 10, Division 5 of the Standard Industrial Classification. Forest Industry includes those firms using roundwood or wood chips in their manufacturing process. Data was taken from an extensive questionnaire used during interviews completed in February 1974.

Saskatoon (Sask.) : Financial report 1988

Saskatoon, Sask. : The City, 1989. 34 p.
CSI 89300.001.
MICROLOG 89-04946 1 fiche

Contains a comprehensive review of the Saskatoon consolidated balance sheet as at December 31, 1988, and the statements of revenues and expenditures, funds to offset taxation or user charges in future years, capital operations, reserves and reserve funds. Includes a presentation of trust funds and the sinking fund; general, police and fire department superannuation plans; the financial report of the public library and the community health unit. Summarizes statistics for property and business assessment and tax levy, as well as public utilities' operating results and debenture debt.

Scald protection in solar domestic hot water systems

by B.E. Sibbitt. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1987. 78 p. : ill. Bibliogr.
MICROLOG 89-05628 2 fiche

The outlet water temperature produced by a solar domestic waterheater system can vary over a wide range, and can be heated to temperatures which cause pain and scalding if in contact with human tissue. This study experimentally evaluated the performance of tempering valves and auxiliary water tanks for

their abilities to prevent scalding water from reaching the user; developed an accelerated aging procedure for tempering valves; and reviewed standards related to tempering valves and made recommendations on the sections of CSA Standard F379.1 relating to scald protection. Transient tests were performed on 6 pairs of new tempering valves, one used valve and an auxiliary electric water tank. In each case the outlet temperature was monitored for a range of operating conditions.

Scale effects testing on rock samples from Lac du Bonnet, Manitoba, report no. 1

by R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. vi. 79 p. : ill. Bibliogr. (Report ; MRL 89-39(TR))
MICROLOG 89-04472 1 fiche

As part of the Canadian Nuclear Fuel Waste Management Project, Atomic Energy of Canada Ltd. is characterizing various rock formations within the Canadian Shield to determine their suitability for the long-term disposal of high level wastes, and is constructing an underground research laboratory (URL) near Pinawa, Manitoba to provide an opportunity for extensive in situ investigations. The vast majority of laboratory testing used 45 mm diameter specimens while in situ experiments will involve much greater volumes of rock. Because of this, it becomes important to quantify what, if any, scale effects influence the strength and deformational properties of the Pinawa granite. This report presents the results of a preliminary investigation to study the effect of specimen size on the ambient temperature uniaxial mechanical properties of the gray granite found on the 220 m level of the URL.

The Scarborough Poverty Conference report

Scarborough Poverty Conference Planning Committee. Scarborough, Ont. : The Committee, 1989. 53 p.
MICROLOG 89-05667 1 fiche

In June, 1987, a group of Scarborough Metropolitan Toronto Housing Authority (M.T.H.A.) residents and resource people came together to discuss the concerns and problems of the poor in Scarborough. Out of this evolved 'The Scarborough Poverty Conference'. The two day conference included 7 workshops on housing, foodbanks, the disabled, education, immigrant families, and health and the impact on families. In addition to the workshops, planning committee members made opening presentations and a resident was the keynote speaker for the 180 people in attendance. This report on the conference presents highlights from this gathering.

Screening juveniles and the central city phenomenon : using official statistics to understand the dynamics of police systems

by J. Hackler and K. Don. Edmonton : University of Alberta, Centre for Criminological Research, 1988. 23 p. Bibliogr. (Discussion paper ; 16)
MICROLOG 89-04091 1 fiche

The most frequently cited crime statistics are those which are known to the police. They are readily available for each province and for the major metropolitan areas, and consistently are reported as higher for the West. Crime rates are especially sensitive to the recording and reporting practices of local police departments. This paper addresses these questions in relation to juveniles and attempts to provide insight on how police work in cities surrounded by suburbs. The paper uses charge rates, since they were assumed to be better measures of police activity than crimes known to the police. Discussions are given of reported crimes versus charges laid, the danger of using total crime rates, the ratio of screenable to less screenable offenses, the central city phenomenon, theft and break and entries in central cities, and processing indexes.

Sealing and insulating specific areas of bulk tobacco kilns

by D.L. VanHooren. Toronto : Ministry of Agriculture and Food, Agricultural Energy Centre, 1988. 10 p. : ill.
MICROLOG 89-01138 1 fiche

The majority of bulk tobacco kilns were manufactured prior to the 1980s and were constructed of metal roofing, insul-board and wood rafters in the roofs. Today some growers are experiencing problems curing and conditioning their tobacco since the insul-board withstands poorly the high humidity needed in the curing and conditioning process. This report presents the results of a project to determine the energy and cost effectiveness of applying a 25 mm thickness of polyurethane foam to the roof, blower/burner wall, sheet metal above the blower/burner, and base of 5 bulk kilns. The project also evaluated the improvement in control of air exchange rates and the quality of cured tobacco with these measures.

Sealing of large-diameter boreholes for LL and IL reactor waste disposal

by A.G. Vorauer and H.T. Chan. Toronto : Ontario Hydro, Research Division, 1988. ii, 41 p. : ill. Bibliogr. (Report ; no. 88-105-K)
MICROLOG 89-02619 1 fiche

A study to evaluate the suitability of large-diameter augered boreholes for the disposal of low-level and intermediate-level wastes at Bruce Nuclear Power Development site was begun in 1984. The disposal concept consists of augering 1.5-3.0 m boreholes to a desired depth, placing the waste containers at the base of the hole and backfilling the space around and above the containers with a material of low permeability. A concrete slab and a compacted clay cover placed over the backfilled borehole provides protection and proper surface drainage. This report summarizes the field instrumentation monitoring; the numerical analysis of heat dissipation from a large concrete plug into the surrounding soil medium; contaminant migration along a gap at the clay/concrete interface; and laboratory hydraulic conductivity testing of composite clay/grout samples.

The Seasonal utilization of the Saskeram Marshes by fish populations and its significance to the fisheries resources of the Saskatchewan River Delta in Manitoba with special reference to northern pike

by A.J. Derksen and D.G. Gillies. Winnipeg : Dept. of Natural Resources, Fisheries Branch, 1985. xix, 337 p. : ill., maps. Bibliogr. (Manuscript report ; no. 85-10)
MICROLOG 89-00707 4 fiche

In recent years, frequent winterkills of fish were witnessed in the Saskeram Marshes of the Saskatchewan River Delta. These winterkills were observed near control structures developed by Ducks Unlimited Canada to manage the marshes for waterfowl and muskrat production. Following some preliminary investigation in 1981 and 1982, an extensive study was conducted in 1983 and 1984 to examine the underlying causes and to determine the relative merits of allowing fish

access to the Saskeram Marshes.

Seasonality and the Canadian financial flow statistics : balancing the seasonally adjusted series

by J. Taillon. Ottawa : Statistics Canada, Industry Measures and Analysis Division. 1986. 34 p.
MICROLOG 89-03708 1 fiche

The issue of seasonality in Canadian financial flow statistics was last studied in the mid-70s, when it was concluded that seasonal behaviour is poorly defined. This paper studies two approaches: the first is based on time domain and is currently used in the United States; the second is based on frequency domain and is an extension to a method developed by D. Rhoades and N. Elhawary-Rivet to adjust sub-annual data to an annual benchmark. The paper presents the different types of constraints on the financial flow table and explains the approaches using the frequency and time domain respectively in order to balance the seasonally adjusted financial flow table.

Secchi disc-chlorophyll a self-help program : 1987 sampling results for lakes in the Central Region of the Ministry of the Environment

Toronto : Ministry of the Environment, Central Region. 1988. 281 p. : ill. CSI 55123.006.
ISSN 0715-0261
MICROLOG 89-00426 3 fiche

The "self-help program" was initiated in 1971 in response to many requests from concerned cottagers for water quality surveys on many recreational lakes throughout the province. In the program, cottagers perform the sample collection on their lakes and the Ministry analyzes and interprets the water quality information. This document provides sampling results for lakes in the central region of the Ministry of the Environment.

Security, arms control and defence : public attitudes in Canada : the 1988 CIIPS public opinion survey

by M. Driedger and D. Munton. Ottawa : Canadian Institute for International Peace and Security, 1988. 116 p. : ill. (Working paper ; no. 14) ISBN 0-662-16614-0
MICROLOG 89-02510 2 fiche

The paper examines first the perceptions of the United States and the Soviet Union, and then looks closely at perceptions of threat to Canada and to global peace and security. It then looks specifically at perceptions of the possibility of nuclear war. The paper then turns briefly to the international policies Canadians favour to deal with the perceived threats to their security and the danger of war. It looks, as well, at attitudes on a number of defence policy issues of particular interest to Canada, such as the Canadian commitment to NATO and the level of Canadian defence expenditures. Finally, the differences in attitudes amongst various groups of Canadians are considered.

Sedimentary sequence study : results of laboratory sorption and diffusion experiments

by H.M. Johnston and D.J. Wilmot. Toronto : Ontario Hydro, Research Division, 1988. iii, 201 p. : ill. Bibliogr. (Report ; no. 88-85-K) MICROLOG 89-02592 3 fiche

The Canadian concept for the management of nuclear fuel wastes relies on disposal in deep underground repositories constructed in plutonic rock of the Canadian Shield. If radionuclides are released from the repository they may enter the groundwater flow regime and consequently be transported to the biosphere. As part of the on-going Sedimentary Sequence Study, radionuclide sorption and tracer diffusion experiments were performed on rock core samples obtained from Darlington GS, Lakeview GS, and from Chippawa, Ontario. This report discusses the results of the research program to determine the strontium and cesium sorption isotherms for various sedimentary rock types; to obtain tortuosity factors by measuring non-reactive diffusion coefficients for a variety of rock types; and to evaluate the potential of matrix diffusion and sorption as a retardation mechanism on transport of radionuclides such as strontium and cesium along fracture pathways. Seed bank estimates for the McCowan Road simulated right-of-way

by D. Brown. Toronto : Ontario Hydro, Research Division, 1988. iv, 15 p. : ill. Bibliogr. (Report ; no. 88-68-K) MICROLOG 89-02576 1 fiche

The vegetation management techniques used on transmission and distribution rights-of-way must be capable of controlling tall-growing woody species. Currently, Ontario Hydro uses a selective herbicide application to remove trees and encourage more desirable species to occupy the right-of-way. This project was undertaken to assess the importance of the seed bank in the invasion of the McCowan Road simulated right-of-way. The report presents the results of a comparison of methods of estimating the seed bank: the emergence method uses the number of seedlings which germinate from soil samples stored under controlled conditions as an estimate of the seed bank; while the seed extraction method uses a physical isolation of the seeds from the soil samples. The report discusses the relative advantages and disadvantages of each method, and the possible uses of a seed bank study in the development of the vegetation management program. EN EV ON PR SC

Seeding of erosion control projects

Selection of uplift coefficients for uplift design of transmission tower foundations

by C.B.H. Cragg and R.H.K. Tsang. Toronto : Ontario Hydro, Research Division, 1989. i, 34 p. : ill. Bibliogr. (Report ; no. 88-320-K) MICROLOG 89-04572 1 fiche

Report which presents and discusses enhancements to the Ku theory for uplift capacity of augered pier foundations in granular soils, a theory proposed by Meyerhof and Adams in 1968 and supported by a limited range of field and laboratory data. In this paper, a thorough review of the uplift load test data now available in the literature is made and is analyzed by the Ku-theory to yield correlations between Ku and depth-to-diameter ratio of foundations. Gaps in the data are supplemented by further full scale tests and laboratory model tests, with statistical parameters for Ku derived from this data. A probability-based method is proposed. EN ON PR SC

The Selection, development, and testing of an integrated truck-shovel management system

by V. Srajer, L. Hick and W. Sadler. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 18 p. : ill. Bibliogr. (Report ; CRL 88-49(TR)) MICROLOG 89-00475 1 fiche

The development and field testing of an integrated truck/shovel operating and management system is described in this paper. A total of eight mining companies in western Canada have provided data for validation of the computer model; a system for on-board data acquisition has now been selected and tested at a producing surface coal mine in Alberta and the truck/shovel management system has been defined and is under development. The system consists of a computer simulation program, a dispatching program, an equipment information system, a data transfer system, a data base system, and mobile equipment location devices. The system components are proposed to be field tested in both stand-alone and fully integrated modes. • CA CM NR PS SC

A Self adjusting index for categorically ordered data

by M. Gaudry and R. Laferrière. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 18 p. Bibliogr. (Publication ; no. 601) (Cahier ; 8835) MICROLOG 89-01237 1 fiche

Introduction of a new index to treat information obtained from questionnaires with categorically ordered answers. After a presentation of the new index and its properties under the assumption that questionnaire answers are cardinal, it is shown how the index could extend the individual welfare function measurement approach originated by Van Praag (1968) and how the index is useful if ordinal answers are cardinalized by the researcher. An example is provided of such a case.

The Seniors market for travel to British Columbia : travel patterns of generally retired affluent mobile seniors in southwest U.S.A.

prepared for Industry, Science and Technology Canada, B.C. Ministry of Regional Development, Ministry of Tourism and Provincial Secretary : by the Tourism Research Group and Fleischman Field Research. S.I. : Canada-B.C. Economic and Regional Development Agreement, 1988. 42 p. : ill. CSI 37117.216. ISBN 0-7726-0880-6
MICROLOG 89-03810 1 fiche

This document presents background information which explains why interest in the senior market for travel has increased substantially in recent years. It then presents the results of the Gram study which conducted a survey of generally retired affluent mobile seniors who live in the southwestern United States. The study describes the current travel behaviour of this segment; measures attitudes toward future B.C. travel and the kinds of attractions likely to encourage it; and determines media habits and interests with regard to pleasure travel information.

Sensitivity analysis of dynamic networks : an application to pricing and load evaluation for truckload motor carriers

by W.B. Powell and D.J. Cape. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 38 p. : ill. Bibliogr. (Publication ; no. 600)
MICROLOG 89-01236 1 fiche

Estimating the reduced cost of an upper bound in a classical linear transshipment network is

traditionally accomplished using the shadow price for this constraint. This reduced cost often exhibits errors of 50% or more compared to the actual change in the objective function if the upper bound were raised by one unit and the network reoptimized. A new approximation is developed, using a simple modification of the original reduced cost calculation. The paper summarizes the basic theory behind network sensitivity to establish the theoretical properties of the new approximation, by using least-cost flow augmenting paths in the basis to estimate certain directional derivatives which are used in the development of the approximation.

Separation of graphite, biotite and micaceous minerals from a Nova Scotia garnet schist

by P.R.A. Andrews. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. iii, 14 p. : ill. Bibliogr. (Report : MSL 88-100(IR)) Project 30.21.02 beneficiation of industrial minerals.
MICROLOG 89-00486 1 fiche

Before 1987 very little commercial interest was shown in the garnet deposits of Chegoggin Point, Nova Scotia, although the white quartzite, which overlies the garnet schist, was mined by Dominion Steel and Coal Corp. Approximately 20 kg of a garnetiferous graphite micaceous schist, consisting of several large 200 mm ore specimens, were received in November 1987. The sample was crushed to various sizes and examined visually and tested by scrubbing; gravity concentration; standard graphite flotation with the graphite concentrate analyzed for carbon; micaceous minerals flotation; and X-ray diffraction analysis.

Shingles and shakes from Alberta jack pine and aspen : a feasibility study

S.I. : Canada-Alberta Forest Resource Development Agreement, 1988. iii, 41 p. : ill. ISBN 0-662-16479-2
MICROLOG 89-05247 1 fiche

The Lac La Biche Regional Economic Development Council commissioned a study to determine if any real potential exists for the production of shingles or shakes from the local wood supply, since local entrepreneurs had set up a shingle mill and were producing small quantities of pine shingles for the local market. The study began in November 1987 and was completed in March 1988, addressing the physical manufacture of shakes from local timber, the likely grade and yield, the costs of production, and the possibility of competing with other wood roofing materials. The study first examined the jack pine shingle product being produced by Aspen Mills Ltd. of McRae, Alberta, evaluated the product and tested it for preservative treatability. Previous Alberta work was reviewed, as was the taper sawn shake development program currently being undertaken by the Texas Forest Service.

Silviculture statistics for Canada : an 11-year summary

by D.H. Kuhnke. Edmonton : Government of Canada, Canadian Forestry Service, Northern Forestry Centre, 1989. viii, 81 p. : ill. Bibliogr. (Information report : NOR-X-301) CSI 22249.203. ISSN 0704-7673 ISBN 0-662-16719-8 MICROLOG 89-02989 1 fiche

Silviculture activities, comprising site preparation, planting, direct seeding, stand tending, and pest control, are summarized for each province and territory and for Canada for 1975-76 to 1985-86. Silviculture activities have increased steadily relative to the area harvested. The basic area data on site preparation, planting, and direct seeding have been further refined with more complete information on site preparation application and silviculture success rates. Information on success rates indicates that approximately 68% of the area harvested is adequately reforested, with natural regeneration accounting for 74% of this reforestation. Stand tending has increased more than any other silviculture activity.

Simple techniques for at-source reduction of wastes from metal finishing operations

by E.C. Tsai and R. Nixon. Ottawa : Environmental Protection Service, Western and Northern Region, 1988. 16 p. : ill. Bibliogr. (Report : CP(EP) WNR87/88-11) Presented at the 81st annual meeting of APCA. MICROLOG 89-00676 1 fiche

Waste reduction at source has recently emerged as an issue because of increasingly stringent provincial regulations and municipal sewer-use bylaws. Generators of small quantities of hazardous waste are often not aware of the availability of waste reduction techniques and often lack the capability to devise cost-effective waste management strategies. A technical assistance program was initiated in the Fall of 1986 directed at small industries, the first being metal finishing operations. The program provides field assessment and training, as well as financial incentives in waste reduction. This paper introduces the services of the technical assistance program and describes simple techniques that can be used for waste reduction at source in the metal finishing industry, including a case study.

A Simulation analysis model for dragline operation using SLAM II

by J.K. Szymanski and W.M. Borysuk. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 13 p. (Report : CRL 89-11(TR)) MICROLOG 89-04468 1 fiche

A cooperative effort in 1988 produced a SLAM II simulation model capable of realistically predicting operation performance of the dragline at Obed Mountain open pit coal mine in Alberta. In the model, stochastic simulation is

used to reflect the random variation in duration of all components of its time cycle. To model these simulation inputs, data was collected from an operating mine in January and February of 1988 under the operating and environmental conditions in which the dragline was used. This report gives details on the approach in developing the model, the collection of data, the statistical analysis of the collected data, and the actual model.

Simulator induced sickness in the CP-140 (Aurora) flight deck simulator

by K. Hamilton...et al. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. 20 p. Bibliogr. (DCIEM research report : no. 89-RR-32) MICROLOG 89-06194 1 fiche

Training on modern flight simulators can lead to simulator induced sickness (SIS), characterized by nausea, dizziness and postural instability. It is believed that SIS results from exposure to conflicting sensory information. This report examined the incidence, severity and duration of SIS as a function of flight experience and aircrew position (pilot/copilot) in 16 aircrew following training on the CP-140 (Aurora) flight deck simulator at Canadian Forces Base Greenwood. The dependent measures included symptomatology and postural stability, and measures of workload to examine the contribution of the high task demands generally associated with simulator training.

Single-industry forestry communities : a national and regional (northern Ontario) profile

by J.H. Smyth, M. Rodrigue and N. Pharand. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Great Lakes Forestry Centre, 1989. 21 p. : ill. Bibliogr. (Information report : O-X-390)

ISSN 0832-7122 ISBN 0-662-16620-5
MICROLOG 89-02836 1 fiche

The forest products sector contributes significantly to Canada's economy, accounting for 15% of the manufacturing sector's share of the nation's gross domestic product in 1987. Across Canada, over 900 communities rely totally or partially on forest sector activity. This report provides a socioeconomic profile of 105 single-industry forestry communities with a population of over 1,000 people. In addition, it describes the resource-dependent region of northern Ontario. A typical single-industry community in this region (Espanola), and its current and potential economic infrastructure, is also discussed.

Site index equations for black and white spruce in northeastern B.C. and Yukon

by R.V. Quenet. S.I. : Forest Resource Development Agreement, 1989. 126 p. : ill. (FRDA report ; 078) ISSN 0835-0752 ISBN 0-662-17053-9

MICROLOG 89-05043 2 fiche

Development of site index equations for black spruce and white spruce in the Yukon Territory, using the two stage method of developing equations and curves from stem analysis data. Linear regressions between site index and decadal height were used to develop candidate transformations by relating site index to height. The final variables were selected for the equations using stepwise linear regression techniques. Intermediate and suppressed sample trees, trees exhibiting significant damage, and trees less than 50 years of age at breast height were excluded from the data set.

MICROLOG 89-01885 3 fiche

Ce document présente une analyse qui fait état de la situation démographique récente du Québec dans une perspective temporelle et la compare avec celle du Canada et de plusieurs pays. Le texte décrit l'évolution de la population, de la mortalité, de la fécondité, de la nuptialité et des migrations. De plus, une section traite de variables socio-démographiques, notamment la langue et l'origine ethnique. Enfin, des tableaux statistiques sur la population et les événements démographiques, regroupés en annexe, complètent cet ouvrage. Il contient aussi une sélection des informations de base nécessaires à la compréhension de l'évolution démographique du Québec.

Size selective predation by rainbow trout on two lacustrine *Oncorhynchus nerka* populations

by E.A. Parkinson, J.M.B. Hume and R. Dolighan. Victoria : Ministry of Environment and Parks, 1989. i, 14 p. : ill. Bibliogr. (Fisheries management report ; no. 94)
ISSN 0705-5390 ISBN 0-7726-0969-1
MICROLOG 89-04960 1 fiche

Piscivorous rainbow trout in some of the large steep-sided lakes in south central B.C. feed almost exclusively on *O. nerka*, but can encounter very different prey size spectra in different lakes because *O. nerka* occurs in two forms (sockeye and kokanee) which are indistinguishable as juveniles. Rainbow trout over 40 cm in length are capable of consuming most size classes of *O. nerka*. This report first compares the size spectrum of prey available to these large rainbow trout in a sockeye- and a kokanee-dominated lake in terms of relative abundance of small and large prey, then compares the size spectrum of prey in the stomachs of large rainbow trout from the same 2 lakes to determine whether rainbow trout of similar size shift their size prey size selection toward smaller prey and therefore take advantage of the relatively large number of small prey available in the pelagic zone of sockeye-dominated lakes.

Sizing up the burden of unemployment in Canada, part III : impact of unemployment on family income

by R.P. Shaw. Ottawa : Statistics Canada, Social and Economic Studies Division, 1985. 30 p. Bibliogr. (Research paper ; no. 16)
MICROLOG 89-03855 1 fiche

At times of high and prolonged unemployment, most workers and their families experience an income loss which can be buffered by other means. In contrast, a significant minority are far more vulnerable to low income status. When such workers are unattached individuals, heads of single-parent families, or heads of families with nobody else employed, their financial vulnerability to unemployment is even greater. This document examines income protection schemes which take into consideration families in this significant minority, and not just individuals.

Small area estimates from sample surveys

by G.H. Choudhry and Y. Bélanger. Ottawa : Statistics Canada, Methodology Branch, Census and Household Survey Methods Division, 1985. 20 p. Bibliogr.
MICROLOG 89-03717 1 fiche

A Monte Carlo study was carried out to evaluate the performance of some alternate Small Area Estimation techniques to obtain Labour Force estimates from large scale household surveys. The Canadian Labour Force survey, which utilizes a clustered multi-stage sample design, is taken as an example of a large scale household survey and the survey design is simulated using data from 1976 and 1981 censuses. The census

divisions which cut across the boundaries of design strata are taken as small areas and 1,000 Monte Carlo samples are selected to obtain LF estimates. The alternate small area estimators which include post-stratified domain, synthetic, composite and SPREE are evaluated for their biases and mean square errors. Keyfitz's variance estimator for estimating the variance of ratio is considered for small area estimators using population adjustment at the small area level.

The Social and economic returns from investments in forest management programs on Indian lands : two case studies

by A. Hopwood. S.I. : Forest Resource Development Agreement, 1988. vi, 56 p. Bibliogr. (FRDA report ; 049) ISSN 0835-0752 ISBN 0-7726-0886-5
MICROLOG 89-01778 1 fiche

Because of the geographic locations of their Reserves and their resident populations, as well as the strong orientation of economic potential toward integrated renewable resource development, the Indian bands are focusing their socio-economic development strategies on the management of their forest lands. The social and economic returns from investments in two Indian Bands' forestry programs (the Stuart Trembleur Lake Band and its Tanizul Timber Ltd. company, and the Coldwater Band) are documented in order to demonstrate the offsetting rather than incremental nature of investments in long-term forest management programs, with their tendency not to benefit the Bands residents. A benefit/cost analysis using a documentation approach is presented and referenced to the three involved groups: the particular Bands, the provincial government and the federal government. Corollary information on Indian band populations, employment and income are presented.

The Social discount rate for silvicultural investments

by T. Heaps and B. Pratt. S.I.: Forest Resource Development Agreement, 1989. v. 37 p. Bibliogr. (FRDA report : 071) ISSN 0835-0752 ISBN 0-662-16985-9 MICROLOG 89-05056 1 fiche

Reviews the method by which the real social discount rate has been estimated for Canada, and criticizes some of the assumptions which were used to obtain the current rate of 8 - 10 percent. In particular, it shows that the real marginal and average rates of return on investment are not equal and finds a method of estimating the real marginal rate of return on investment. This method and other information is used to revise the estimate of the real social discount rate to 3 - 7 percent. It proposes that where possible, expected net present values should be used to screen public investments in silviculture.

Soils of the rural municipalities of Grey, Dufferin, Roland, Thompson and part of Stanley

by W. Michalyna, G. Podolsky and E. St. Jacques. Winnipeg : Dept. of Agriculture ; Ottawa : Agriculture Canada, 1988. xxiv, 202 p. : ill., maps. (Soils report ; no. D60) *Fold. maps not filmed. Financed and conducted as a joint project of the Canada Dept. of Agriculture, Manitoba Dept. of Agriculture and the Soil Science Dept., University of Manitoba.*

MICROLOG 89-01452 3 fiche

Report giving a detailed inventory of the soil resources of the Rural Municipalities of Grey, Dufferin, Roland, Thompson, and the western portion of Stanley municipality. The report provides a general description of the area; the general nature of the survey area and the factors affecting soil formation; the development, scientific classification, and morphological characteristics of the soils; and an interpretation of soil properties and associated landscape features as they affect soil capability or suitability for dry land agriculture, irrigation, engineering, or recreational land use.

Solid waste management in New Brunswick

Fredericton : Dept. of Municipal Affairs and Environment, 1989. 13 p. : ill. *French ed. (Gestion des déchets solides...) on the same fiche.*

MICROLOG 89-3342 1 fiche

Fact sheet on the problem of solid waste in New Brunswick, methods of managing it currently, and the development of a comprehensive waste management strategy for the province as a whole which will promote establishment of environmentally-acceptable and

cost-effective waste management systems, concentrating available resources on several large scale regional projects rather than the 225 smaller sites which now exist. The brochure describes the regional solid waste commissions, the planning process, public information and consultation, evaluation of options, identification of potential sites, and the environmental impact assessments to be done. As well, various options such as recycling, composting, incineration, and sanitary landfilling are addressed.

Solid-state interaction between nickel and YBa₂Cu₃O_x

by B. Champagne, L. Parent and C. Moreau. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 13 p. : ill. Bibliogr.
MICROLOG 89-00580 1 fiche (Available on fiche only)

Electrotechnical applications of high T_c superconductors (HTSC) require the fabrication of composite cables made up of many fine HTSC filaments embedded in a metallic matrix. This report presents the results of study on the solid-state reaction between nickel and YBa₂Cu₃O_x by hot isostatic pressing of YBa₂Cu₃O_x green compacts in nickel. The microstructure, density and nature of phases present in hot isostatically pressed parts were characterized.

Solidification of radioactive organic liquid waste

by T.G. Pringle. Toronto : Ontario Hydro, Research Division, 1988. 25 p. Bibliogr. (Report ; no. 88-84-K)
MICROLOG 89-04557 1 fiche

As a byproduct of nuclear generation operations, Ontario Hydro produces small volumes of radioactive organic liquid wastes such as contaminated hydraulic oil, freon sludge from dry cleaning operations, and the liquid effluent from compaction operations. Immobilization can be achieved either through absorption of the liquid waste into a solid to prevent dispersion, or by using a binder to solidify the liquid waste as a monolithic solid wasteform. This report presents the results of research on characterization of the likely waste streams and solidification studies, with the object being to develop a single solidification system for all 3 waste streams. Where possible, inactive analogs of the wastes were used but in the case of freon sludge and

supercompactor effluent, the heterogeneous nature of the waste made the development of inactive analogs impossible. After the most successful techniques were selected from the results of the inactive tests, the compatibility with active wastes was tested.

Solidification structure of a strip cast Al-Si-Cu alloys

by E. Essadiqi, J. Blain and J. Masounave. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 16 p. : ill. Bibliogr. *Presented at the 27th annual Conference of Metallurgists.*
MICROLOG 89-00538 1 fiche (Available on fiche only)

Increased competition in the material producing market has led to a renewed interest in strip casting technologies. This process can potentially eliminate part of the hot rolling, save energy, and offer the possibility of producing new alloys in strips. A process was developed using a vertical twin roll caster. This study focuses on the microstructure of 2 aluminium alloys, the segregation obtained by this process and the heat transfer between the strip and rolls. Some static experiments were also carried out to analyze the heat flow within the two alloys during solidification.

Some energy-saving measures for commercial buildings

Edmonton : Alberta Energy, Scientific and
Engineering Services and Research Division,
1989. 9 p. ISBN 0-86499-588-1
MICROLOG 89-01764 1 fiche

Since 1983, thirteen research projects
concerning energy conservation in commercial
buildings were funded in part by the
Alberta/Canada Energy Resources Research
Fund. This booklet summarizes 4 of the
projects: 3 office towers in downtown Calgary
which were air-sealed; an inventory of software
available for building design and energy
analysis; the use of a ventilation control system
based on carbon dioxide levels; and the use of
direct evaporative cooling rather than chillers in
air conditioning. A brief overview of measures
taken and the results is given for each project.

Some occupational-health aspects of the use of beryllium and its compounds in Ontario

by Michael G. Holliday...et al. ; prepared for
the Program Development Unit, Occupational
Health and Safety Division, Ontario Ministry of
Labour. Ottawa : Michael Holliday &
Associates, 1987. xx, 147 p. : ill. Bibliogr.
MICROLOG 89-06028 2 fiche

Background overview of the occupational health
aspects of exposure to beryllium and its
compounds in Ontario workplaces, based on
contacts with 200 companies, labour unions,
trade and professional associations, and
government agencies; a mail-out questionnaire
survey of 172 establishments representing 156
Ontario companies; and walk-through surveys of

a representative cross section of beryllium-
material using establishments (12 plants were
visited). In addition, scientific and technical
publications were reviewed. The report
discusses the physical and chemical properties
of beryllium metal, beryllia, and beryllium alloys
in relation to their industrial uses; presents
brief summaries of the health effects which
may arise from exposure and of the analytical
methods by which such exposure is measured;
describes processes which involve such
materials in industry; discusses the control
measures (engineering and work practice)
which may be used to reduce such exposure;
presents the attitudes of management and
labour representatives with regard to the
potential hazards; and compares the regulatory
control options available to the Ontario
government to the approaches adopted by
other jurisdictions.

Sorbent injection for SO2 control

by M.S. Mozes...et al. Toronto : Ontario Hydro, Research Division, 1988. v, 44 p. : ill. Bibliogr. (Report ; no. 88-63-K)
MICROLOG 89-02548 1 fiche

In December 1985, the Ontario government announced stricter acid gas emission limits for industries and Ontario Hydro. In order to maintain flexibility to meet future demands for electricity and comply with tightening acid gas regulations, it is likely that Ontario Hydro will have to retrofit some form of flue gas desulphurization (FGD) equipment on its coal-fired plants by the mid to late 1990s. This report presents the results of a study aimed at quantifying the effects of process parameters on SO2 capture, sorbent utilization, waste characteristics and ESP performance. Sorbent types tested include two calcitic limestones, a hydrated lime, and a dolomite. Injection temperature, residence time, sorbent addition rate and particle size were optimized to maximize SO2 capture and sorbent utilization and to minimize the impact on particulate removal by ESP.

Les Sous-marins à propulsion nucléaire : effets possibles sur l'environnement

par T. Curren. Ottawa : Bibliothèque du Parlement, Service de recherche, 1988. 9 p. Bibliogr. (Etude générale : BP-181F) *L'éd. anglaise (Nuclear-powered submarines...) sur la même fiche*. ISBN 0-660-92635-0
MICROLOG 89-05461 1 fiche

Le projet d'acquisition de sous-marins à propulsion nucléaire par les Forces armées canadiennes soulève un certain nombre de préoccupations légitimes, notamment quant aux effets possibles de ces navires sur l'environnement. Les effets des sous-marins à propulsion nucléaire sur l'environnement se répartissent en deux catégories: ceux qui sont associés au fonctionnement normal des sous-marins, sur lesquels porte l'essentiel de l'étude, et ceux qui découlent d'un accident de réacteur. De plus, l'étude porte sur les émissions de radioactivité des navires à propulsion nucléaire et les mesures de sécurité environnementales.

The South Portage commercial area : prospects and priorities

Coriolis Consulting Corp., Nemtin Consultants Limited. S.I. : The Corporations. 1987. 12 p. MICROLOG 89-00988 1 fiche

The Portage Place development is a three level retail, entertainment and office centre spanning several blocks in downtown Winnipeg. This document evaluates the south side's prospects as a commercial area and identifies concerns about its viability. It also identifies steps that should be taken to maximize the south side's chances for continued viability as a retailing area and indicates the importance of improving the vertical connection between the overhead walkways and Portage Avenue. Finally, it suggests priorities for action to help the south side, with specific reference to the priority of escalators.

South Saskatchewan River Basin Planning Program : summary report

Edmonton : Alberta Environment, Water Resources Management Services. Planning Division. 1984. 86 p. : ill., maps. *Fold. maps not filmed.*
MICROLOG 89-03747 1 fiche

Planning program designed to provide a framework plan for the management of water in the Basin, which includes the Bow, the Oldman and the Red Deer Rivers. The program identifies the objectives to be achieved through water use and management, and establishes, from among a number of options, the most appropriate strategy for contributing to those objectives. This report presents the results of the strategic planning phase, the first phase of the process. It describes the physical and cultural character of the basin, presents information about water use and management from both a contemporary and an historical perspective, presents social and economic objectives and government policy, and indicates a number of scenarios that illustrate a range of strategy options, with an explanation of how these were developed, analyzed, and evaluated.

Southern limit of coniferous trees on the Canadian Prairies

by S.C. Zoltai. Edmonton : Government of Canada. Canadian Forestry Service, Northern Forestry Centre. 1975. 12 p. : maps. Bibliogr. (Information report : NOR-X-128) ISSN 0704-7673
MICROLOG 89-00176 1 fiche

The natural vegetation in the southern part of the Canadian Prairies forms two broad vegetation regions, the Grasslands and the Boreal Forest. This report presents the most southerly natural occurrence of white spruce, black spruce, tamarack, and lodgepole pine, which are the main coniferous tree species. Balsam fir and eastern white cedar were not included. The survey was conducted through aerial photographs, existing records, field survey, and vehicle survey. The survey was terminated at Bow River, west of Calgary in southern Alberta, although the major outliers at Cypress Hills on the Alberta-Saskatchewan boundary and in the Sprucewoods in southern Manitoba were included.

Southwest Miramichi survey and testing project, 1987

by P.M. Allen. Fredericton : Tourism, Recreation and Heritage. Provincial Parks and Historic Sites, Archaeological Services. 1988. 53 p. : ill., maps. Bibliogr. (Manuscripts in archaeology : 23E) ISBN 0-88838-333-9
MICROLOG 89-01344 1 fiche

During the last week of July and the first week of August 1987, archaeological testing was conducted on 3 sites located within the Southwest Miramichi River drainage. Two of the tested sites, the Davidson site and the O'Brien site, were discovered in an earlier 1980 survey of the Miramichi estuary. The 3d site tested, the Six Mile Brook site, was reported by a river guide and is located on the Cains River, approximately 30 km from its junction with the Southwest Miramichi. For each site, information is given on location, archaeology, prehistoric and historic excavated and surface finds, and recommendations as to further work.

Specific gravity estimation from metal grade values

by A. Boyer. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. vi, 54 p. : ill. (Report ; MRL 89-52(TR))
MICROLOG 89-05069 1 fiche

The basic information for this study came from previous work associated with the estimation of uranium deposits specific gravity. The main study goal was to establish the best methodology for this type of estimation by comparing experimental results and estimated specific gravity results obtained from deterministic equations for single or selected rock types, or without discriminating the rock types. The linear deterministic relationship between specific gravity and the metal grade values of certain minerals forming the rock mass was used to estimate the specific gravity of ore samples. The statistical method was then introduced, also implying a linear relationship between the specific gravity and the metal grade. As in the first case, the estimated values were compared with the associated experimental values.

St. Clair River Organics Study : the screening of industrial effluents for genotoxic activity

Toronto : Ministry of the Environment, Laboratory Services Branch, Organic Trace Contaminants Section : Microbiology Section, 1981. 117 p. : ill. Bibliogr.
MICROLOG 89-01988 2 fiche

The St. Clair River Organics Study Group was formed early in 1977 to further investigate and confirm the presence and significance of the organic compounds identified, particularly in relation to possible effects on public water supplies downstream and the potential bio-accumulation of such compounds by fish resident in or frequenting this waterway. This report describes the results of laboratory testing of 25 industrial effluent sources, 5 intake waters and 5 river locations within the St. Clair River system. Samples collected from these sites were tested for mutagenic activity and for DNA damage. This study is an

extension of a previous 1979 study documenting the detection of bacterial mutagenic activity in the chemically pure form of 5 compounds identified in effluents discharged to the river.

St. Clair River Organics Study : waste dispersion in the St. Clair River

by Y.S. Hamdy and J.D. Kinkead. Toronto : Ministry of the Environment, Water Resources Branch, Great Lakes Unit, 1979. iv, 27 p. : ill. Bibliogr.
MICROLOG 89-01991 1 fiche

The St. Clair River Organics Study Group was formed early in 1977 in response to concerns about the presence and significance of the organic compounds identified, particularly in relation to possible effects on public water supplies downstream and the potential bio-accumulation of such compounds by fish resident in or frequenting this waterway. In spite of the large volumes of water carried by the St. Clair River and other connecting waterways of the Great Lakes, the necessity for shore-based discharges (in order to keep navigation channels free of obstructions) means that only a small portion of the river flow is available for waste dispersal. This study of dispersion characteristics in the St. Clair River is intended to provide the basis for determining the appropriate effluent requirements associated with protecting downstream water uses. An assessment is made of the importance of initial dilution and lateral mixing factors.

St. James Town revitalization : social analysis

Toronto : Toronto Planning and Development Dept., 1988. 94 p. : ill.
MICROLOG 89-05295 2 fiche

This report presents a social evaluation of the neighbourhood. It is based on personal interviews with tenants in each of the 18 high-rise buildings in the neighbourhood. It provides a detailed description of tenants' demographic characteristics and compares this with similar data for the City of Toronto as whole; describes living conditions and community relations in St. James Town and presents tenants' opinions about a variety of social and physical conditions in the neighbourhood; evaluates social service needs and delivery in the neighbourhood; and examines the potential impact of revitalization on existing tenants based on reported incomes, rents, and the likely economic impacts of rehabilitation.

St. Lawrence Square

Toronto : Toronto Planning and Development Dept., 1988. 33 p. : ill.
MICROLOG 89-00023 1 fiche

St. Lawrence Square is a proposal to create a new community close to Toronto's downtown. Seventy acres of underutilized industrial land and railway tracks lying between the St. Lawrence Neighbourhood and the Don River Valley will be transformed into a new neighbourhood which will be home to more than 12,000 people and contain a full range of local services. Topics covered in this report include a rationale for creating this new community; information on the context; economic viability; a discussion on preparing a neighbourhood concept; planning and development considerations; and implementation.

Stability assessment of S-L-102-19/S-102-21 sill pillars and adjacent stopes of the Niobec Mine, Chicoutimi, Quebec, part IV

by Y.S. Yu, A.S. Wong and N.A. Toews. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iv, 31 p. : ill. Bibliogr. (Report ; MRL 88-101(TR)) MICROLOG 89-02172 1 fiche

A cooperative study program on mine stability evaluation was initiated in 1985 involving Niobec Mine, Quebec. This report describes Part IV of a series of studies on numerical modelling concerning the structural stability assessment of the mine. The stability of S-L-102-19 and S-102-21 sill pillars were analysed using 3-dimensional finite element techniques. As well, the effect of mining stope C-102-21 at the lower mining block and removal of all support pillars on the upper block on the overall stope/pillar stability were evaluated using the stresses determined from the 3D finite element analysis and based on both Drucker/Prager and Hock & Brown's empirical failure criteria.

Stability within uncertainty : evolution of the world oil market

by A.E. Reinsch, K.J. Brown and J.O. Stanford. Calgary, Alta. : Canadian Energy Research Institute, 1988. xi, 288 p. : ill. Bibliogr. (Study ; 28) ISBN 0-920522-50-5 MICROLOG 89-02718 4 fiche (Available on fiche only)

Provides a brief discussion of world oil market developments since the early 1970s, identifying the fundamental characteristics and features of the market through to the end of this century. It also examines the history and current structure of world oil demand, analyzed in terms of demand for crude oil products in the various regions. A number of key factors and fundamental trends in crude oil consumption are identified, which can be expected to play an important role in future oil demand. In addition, the study provides an examination of the history and current structure of world crude oil supply, emphasizing the methodology employed in representing crude oil production, reserves additions and productive capacity development within the analytical framework. A series of sensitivity cases are presented together with the reference case crude oil

market scenario generated by the integration of the demand- and supply-side analyses. Finally, the study's authors draw together the critical conclusions arising from the analysis.

A Standardized coal resource/reserve reporting system for Canada

by J.D. Hughes, L. Klatzel-Mudry and D.J. Nikols. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. 17, 18 p. Bibliogr. (Paper ; 88-21) *Bilingue (Méthode d'évaluation normalisée...)* ISSN 0068-7650 ISBN 0-660-54824-0 MICROLOG 89-05996 1 fiche

Discussion of definitions, concepts and parameters used to determine coal resource and reserve quantities, as well as providing a framework to facilitate consistent categorization of coal quantities found within various depositional and tectonic regimes in Canada. Coal deposits, or portions thereof, are first categorized in terms of their geological complexity (geology type) and probable recovery method (deposit type). Methods for determining quantification parameters including seam thickness, areal extent and bulk density are outlined for each geology/deposit category. Within each geology/deposit category, coal

resources are further divided, based on their assurance of existence, into measured, indicated, inferred, and speculative subdivisions, and according to their feasibility of exploitation, into immediate and future interest subdivisions. Coal reserves within each geology/deposit category are subdivided according to whether they are within or outside active mining areas, and may be reported on in-place, recoverable and saleable bases.

Station-based lift for intercity buses design criteria

by D.O. Stephens and M.A. Gravel. Montreal : Transportation Development Centre, 1987. xvi, 145 p. : ill. MICROLOG 89-05262 2 fiche

This study was undertaken in 3 phases, the first of which focused on the evaluation of the Kingston transfer chair, a station-based lift to assist the mobility impaired on boarding/deboarding intercity buses. The evaluation consisted of a pre-demonstration period in which the chair was evaluated for functional, ergonomic, and structural criteria, an in-service demonstration in 5 bus terminals, and a review of the results of the first two tasks. Since the results of the evaluation proved a lack of basic safety, structural, and functional requirements necessary, the 2nd and 3rd tasks were modified and are reported on here. The report covers problem areas of the Kingston transfer chair, candidate user groups, influencing factors such as terminal/site constraints, vehicle constraints, and potential bus modifications, and concludes with recommended design criteria.

Statistical analysis model of collected dragline time cycle data

by J.K. Szymanski, W. Borysuk and C. Williams. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 22 p. : ill. (Report : CRL 89-12(TR)) MICROLOG 89-02919 1 fiche

A computer model was developed to simulate the operation of the dragline in Obed Mountain Coal mine. In this model, a stochastic simulation is used to reflect the random variation in duration of all components of the time cycle. To model these simulation inputs, data was collected from January 8-February 29, 1988, from an operating mine under the

operating and environmental conditions in which the dragline was used. The deviations of sample cumulative frequencies of the cycle components from their theoretical values (chosen distribution), when tested by the stabilized probability plot method, showed that the simple Weibull or simple lognormal distributions were equally applicable. These distributions were fitted to the various time elements of the dragline work cycle.

Statistical analysis of collected times between failure and times to repair of Easi-Miner at Obed Mine

by J.K. Szymanski and C. Williams. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 7 p. : ill. (Report : CRL 88-36(TR)) MICROLOG 89-00471 1 fiche

A computer model was developed to simulate operation of the Easi-miner with trucks in open pit mines, with stochastic simulation being used to reflect the random variations in duration of various activities. From November 10-19, 1986, data was collected from an operating mine through a time study of Easi-miner and trucks network cycle times. The short period of the study did not allow the collection of the required number of data points, therefore these variables were introduced to reflect their effect on production rates, which data was collected from production reports for 1 year. This report deals with the statistical analysis of time to repair and time between failures data for subsequent use in the simulation of Easi-miner operation.

A Statistical analysis of the output signals of an acousto-optic spectrum analyzer for CW signals

by G. Farley. Ottawa : Defence Research Establishment Ottawa, 1988. xi, 66 p. : ill. Bibliogr. (Report : no. 993) MICROLOG 89-02076 1 fiche

Bragg cell mechanisms are being investigated for the development of Radar Electronic Support Measures systems for the armed forces. The most mature Bragg cell receiver at the present is the one-dimensional configuration known as the acousto-optic spectrum analyzer (AOSA). A statistical analysis was performed when the output signal is a continuous wave, then presented as a basis for the different analyses along with some numerical algorithms to calculate the deterministic components on a digital computer. Analyses done include derivation of the optimum test for the detection of a known frequency and an unknown frequency; the frequency estimation problem; calculation of the Cramer-Rao lower bound on the variance of any unbiased estimator; the power estimation problem; and the effects of inaccuracies in the frequency assumption on the performance of the ML estimator.

Status of children -- Rev.

Edmonton : University of Alberta. Institute of Law Research and Reform. 1985. 137 p. (Report ; no. 45) ISSN 0317-1604
MICROLOG 89-02037 2 fiche

The law distinguishes between persons born in wedlock and persons born out of wedlock. The distinctions are to the disadvantage of the person born out of wedlock. This report proposes, therefore, that the legal distinction between legitimate children and illegitimate children be done away with. In addition, it proposes that the father and mother be joint guardians only if a stable relationship exists between them at the birth of their child out of wedlock, and that in other cases, the law continue automatically to recognize only the mother as guardian, but that it allow the father to become a guardian if he can show that that arrangement is in the best interest of the child.

Status of the federal-provincial government response to the West Coast Offshore Exploration Environmental Assessment Panel report

prepared by the Canada Oil and Gas Lands Administration and the British Columbia Ministry of Energy, Mines and Petroleum Resources. Ottawa : The Administration ; Victoria : The Ministry, 1988. ii, 107 p.
MICROLOG 89-00360 2 fiche

In September 1983, a Memorandum of Agreement signed by the Governments of Canada and British Columbia established the basis for a joint federal-provincial public review of the potential environmental and related socio-economic effects of renewed west coast offshore oil and gas exploration. Under this agreement the federal and provincial Ministers of Environment established the West Coast Offshore Exploration Environmental Assessment Panel to conduct a public review of renewed exploration in the coastal waters from the north end of Vancouver Island to the border between British Columbia and Alaska and seaward to the limit of the continental shelf. The Panel held public meetings throughout B.C. during 1984/5 and in April 1986 released its report. In June 1987 the federal government response was released, dealing with all 92 of the Panel's recommendations. Response was given under

the general headings of process, compensation, seismic surveying, routine exploratory drilling and support operations, socio-economic effects of routine operations, hydrocarbon blowouts, fat and effects of oil in the marine environment, oil blowout contingency planning and countermeasures, and managing for environmental protection.

Stem girdling to increase seed and pollen production of coast Douglas-fir

by J.H. Woods. Victoria : Ministry of Forests, 1989. iii, 13 p. Bibliogr. (Research note ; no. 103) ISSN 0226-9368 ISBN 0-7718-8765-5
MICROLOG 89-05274 1 fiche

Four years of girdling trials were carried out on Douglas fir trees of grafted and seedling origin. Different girdling methods were applied, including complete removal of a band of bark and phloem, opposing partial bands, pruning-saw cuts, aluminum girdling inserts and a single knife-cut. Data were collected on seed and pollen cone production, tree vigour, girdle wound health and seed characteristics.

Stereotyping in developmentally delayed children : contingent and non-contingent movement

by K.B. Branchuk, N.D. Durie and R. Farley.
Ottawa : National Research Council Canada.
Division of Electrical Engineering, 1989. v,
21 p. Bibliogr.
MICROLOG 89-03271 1 fiche (Available on
fiche only)

Extensive review of literature concerning maladaptive behaviour in developmentally delayed children. This report discusses the effect of movement, provided by a specially-developed vehicle, on self-stimulatory and self-injurious behaviours. A protocol for the use of this vehicle in the training of such children is included.

Sterilization decisions : minors and mentally incompetent adults

Edmonton : University of Alberta, Institute of Law Research and Reform, 1988. iv, 200 p. Bibliogr. (Report for discussion ; no. 6)
ISSN 0834-9037 ISBN 0-8886-4151-6
MICROLOG 89-02036 3 fiche

The present law relating to sterilization of mentally disabled persons is complex since it is found in several different common law and statutory provisions and the exact ambit of that law is uncertain. This consultative document sets out the evolution of the present law, its apparent parameters, the social and medical background to sterilization decisions, and tentatively recommends a new statutory regime which would better reflect the present day and foreseeable needs of Canadian citizens.

Stochastic inventory routing : route design with stockouts and route failures

by P. Trudeau and M. Dror. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 30 p. : ill. Bibliogr. (Publication ; no. 643)
MICROLOG 89-05955 1 fiche

The stochastic inventory routing problem involves the distribution of a commodity such as heating oil over a long period of time to a large set of customers. The customers maintain a local inventory of the commodity which they consume at a daily rate. Their consumption varies daily and seasonally and their exact demand is known only upon the arrival of the delivery vehicle. This paper presents a detailed analysis of this problem incorporating the stochastic nature of the customers' consumptions and the possibility of route failures when the actual demand on a route exceeds the capacity of a vehicle. A number of solutions are compared on a large set of real life data for 12 consecutive weeks. The winning strategy, though computationally more expensive, provides the best system performance and reduces (almost eliminates) the stockout phenomena.

Stock assessment of early run Skeena River coho salmon and recommendations for management

by R.K. Kadowaki. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1988. iv, 29 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1638) ISSN 0706-6457
MICROLOG 89-01619 1 fiche

The Skeena River, located in north coastal British Columbia, is the second largest salmon producing watershed in the province. Concerns have been expressed for the stock status of early run Skeena River coho salmon because of declining escapement levels. Available data on spawning escapements and

subsequent recruitment were analyzed using a Ricker model under various assumptions about fishery interception rates to derive maximum sustainable yield escapement levels. The analysis used a test fishing index, collected consistently since 1956, to derive the escapement to the river-mouth, rather than the usual visual observations made on the spawning grounds.

Stock assessments and biological investigations of Kokanee *Oncorhynchus nerka* in Cowichan Lake, British Columbia, 1984-87

by D.T. Rutherford, C.C. Wood and J.R. Candy. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. vi, 35 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1995) ISSN 0706-6473
MICROLOG 89-01794 1 fiche

Summary of information on the occurrence and population biology of juvenile *O. nerka* obtained during hydroacoustic and trawl surveys from 1984-87. Surveys were designed to determine the abundance of juvenile *O. nerka* in Cowichan Lake and to provide background data for evaluating the potential for either establishing an anadromous sockeye run in the system or increasing the productivity of the existing kokanee population. Population densities were estimated using hydroacoustic and midwater trawl sampling techniques. In addition, live kokanee were obtained using a purse seine to investigate the feasibility of tagging wild kokanee and forcing seaward migration. Preserved kokanee were examined for biological and biochemical genetic (electrophoretic) attributes to shed light on their population biology and their relationship to neighbouring anadromous sockeye populations.

Stressed skin panels

Forest Products Program (Alta.). S.I. : Canada-Alberta Forest Resource Development Agreement, 1987. ii, 28 p. : ill. ISBN 0-662-15967-5
MICROLOG 89-01403 1 fiche

A stressed skin panel is an engineered, prebuilt component consisting of a frame of dimensional lumber, to which top and bottom flanges of plywood or other panel material are structurally glued. Flanges are traditionally made of Douglas fir, but if made of Alberta spruce plywood and oriented strandboard(OSB), could provide new markets for Alberta. Twenty-four stressed skin panels were designed, constructed and tested: 6 with flanges of Douglas-fir plywood, 6 with flanges of Alberta spruce plywood, and 12 with flanges of OSB. Half were tested to verify that established engineering design theories hold for stressed skin panels made with OSB and spruce plywood flanges, and the other half were tested to study the effect of sustained loading (1000 day duration) on stressed skin panels made with OSB and spruce plywood flanges.

Structural testing of the NASCOR II R20 wall system for United States product acceptance

CANO Structures Inc. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1988. v, 92 p. : ill. ISBN 0-88654-218-9
MICROLOG 89-02696 2 fiche

Cano Structures Inc. have been successfully producing the NASCOR II R20 wall system in Canada for 4 years. Over the past 2 years, many invitations were received to quote on projects in the United States and to sell manufacturing licenses to American-based operations. In order to enter the United States market, the wall system had to be evaluated by United States building code authorities to determine its compliance with their building codes. This report describes the wall system, the United States building code requirements and testing objectives, testing procedures, results of the tests, and product acceptance.

Structural walls and columns : condition survey

by C. Patrickson. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. ix, 57, ix, 60 p. : ill. Bibliogr.

(Building performance evaluation series ; Document D30) Bilingual (Murs et colonnes...)
MICROLOG 89-01932 2 fiche

Outline of the testing methods and the analysis required in structural walls and columns assessment. A series of tests is provided for the compressive elements of a structure to assess their condition and ability to support loads, and areas are identified which commonly need inspection because of deterioration. A list of questions and check points are given for the preliminary assessment stage. Tests described range from unequipped observation and use analysis to archival searches and such specialized in-depth tests as the Schmidt rebound hammer test, the Windsor probe test, ultrasonic testing, and the covermeter (pacometer) test.

Structure and properties of a strip-cast Cu-Ni-Sn and Al-Si-Cu alloys

by E. Essadiqi. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 47 p. : ill. Bibliogr.
MICROLOG 89-00578 1 fiche (Available on fiche only)

The processes associated with high cooling rates have received enhanced interest because the latter refine the microstructure, reduce microsegregation and hence improve the mechanical properties. This study uses a twin-roll caster, static mold and moving horizontal plate for strip production of C-725 copper alloy and 380 aluminium alloy. The microstructure and segregation of the thin strips of these alloys produced under various casting conditions are characterized and solidification time and the heat transfer between the strip and the rolls were determined.

Structure of the Canadian plastics industry

by A.M. Catani. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 51 p. Bibliogr.
MICROLOG 89-00541 1 fiche (Available on fiche only)

The plastics industry covers a broad range of chemical and mechanical operations starting with preparation of polymers from monomer by petrochemical plants and culminating with the transformation industry to produce commercial plastics parts. This report gives information on raw materials, products, processing, machinery and parts, and mould and die makers. Data is taken mainly from the SPI, the monthly magazines on plastics published in Canada, and the Canadian Plastics Directory and Buyers' Guide.

MICROLOG 89-03507 2 fiche

This study identifies the potential for increased Canadian export opportunities in the United States as a result of currency realignments, the Free Trade Agreement, and other

competitive factors such as productivity improvements. Given that these factors are working to favour Canadian exporters, opportunities to substitute U.S. imports with Canadian goods have been identified. This study involves the analysis of U.S. trade statistics and telephone surveys of U.S. importers in 80 manufacturing sectors. It contains the highlights from a series of sector reports. Highlights for each sector include the size of the U.S. import market, the market shares held by Canadian, Western European, Japanese, and other exporters, and the impact of Free Trade on current U.S. tariffs on Canadian goods.

Studies of the effects of acidification on aquatic wildlife in Canada : lacustrine birds and their habitats in Quebec

edited by Jean-Luc DesGranges. Ottawa : Environment Canada, Canadian Wildlife Service, 1989. 70 p. : ill. Bibliogr. (Occasional paper ; no. 67) French ed. (*Etude des effets de...aquatique...*) : 89-04535/1. CSI 22210.202. ISSN 0576-6370 ISBN 0-662-16845-3 MICROLOG 89-04534 1 fiche

Examination of the potential impact of acid precipitation on lacustrine birds in Quebec. The first report determines the composition of bird communities at lakes in regions with various levels of deposition and sensitivity. Visits were made to 146 lakes located in the most important Quebec biomes to count the birds and describe the morphometry, the water quality, biological factors, the riparian soils, and the aquatic and riparian vegetation. The second report describes the lake habitats and the potential effects of acidification on the habitats in the temperate zone and the semi-arctic zones of Quebec. The aquatic and riparian vegetation of 78 lakes in southern Quebec and 68 lakes in northern Quebec are briefly described and related to the regional characteristics of the environments in which they occur, the morphometry and water quality of the lakes, and the features of the riparian soils.

Studies on the biological oxidation of thiosulphate using complete mix reactors without recycle

by P.J. Paine. Ottawa : University of Ottawa, School of Graduate Studies, Dept. of Civil Engineering, 1978. xii, 200 p. : ill. Bibliogr. MICROLOG 89-00383 3 fiche

Discharge of partially oxidized sulphur compounds called thiosalts (formed during grinding and flotation operations) at neutral or alkaline pH values from tailings ponds, has resulted in acidic conditions (pH 2.5 - 3.5) in receiving streams. This report investigates the phosphorus requirements of a biological oxidation process and the determination of a minimum retention time capable of facilitating a satisfactory thiosalt oxidation. Experiments for both investigations were conducted in completely mixed reactors without recycle, simulating an aerated lagoon. A synthetically prepared thiosulphate solution of uniform concentration supplemented with nutrients (N,P) and trace elements served as the influent.

A Study of bacterial plugging of thief zones during oil field drilling : final report

by S.K. Taylor and J.W. Costerton. Ottawa : Canada Centre for Mineral and Energy Technology, 1989. 28 p. : ill. Bibliogr. CANMET contract: 89178-01-SQ MICROLOG 89-04495 1 fiche

During drilling operations it was observed that the drill bit often encounters high permeability layers and all of the drilling mud used is lost into these "thief zones". Sand and gravel alone does not plug these zones effectively so this study was designed to determine the organisms, nutrient and other growth parameters that would be suitable for use with sand and gravel to effectively plug the pores. It is believed that bacteria can provide fast and effective plugging of porous matrices when they are introduced into these pores and stimulated by nutrients to grow and produce exopolymers. In this study, salt tolerant *Bacillus* spores or vegetative cells and *Pseudomonas* cells were injected into sand and gravel cores which either contained or did not contain drilling mud. These cores were injected with nutrients to promote growth and polymer production until the permeability of the core was reduced to less than 99%.

Study of curvilinear structural features in the Parry Sound area, Grenville Province, using landsat thematic mapper-images

by M.L. Tremblay. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. xvii, 28 p. : ill., maps. Bibliogr. (Ontario Geological Survey open file report : 5702) *Fold. maps not filmed.* ISBN 0-7729-5115-2
MICROLOG 89-06122 1 fiche

The Parry Sound domain forms part of the central gneiss belt in the Grenville Province, located to the east of the town of Parry Sound on Georgian Bay. Detailed mapping of the area was undertaken from 1986-88 to improve the geological database for this domain of predominantly mafic to intermediate rocks. This report analyzes the curvilinear, structural bedrock features visible on remote sensing images to determine if the boundaries of the Parry Sound domain could be identified from the lineament distribution. The report also developed a quantitative technique to enable the objective analysis of curvilinear, structural features, and compared the results with more subjective visual analysis.

The Study of emergency response systems for the elderly

prepared by MacLaren Plansearch ; for Research Division, Canada Mortgage and Housing Corporation. Ottawa : Canada Mortgage and Housing Corporation, 1988. 95 p. Bibliogr.
MICROLOG 89-04286 2 fiche

Emergency response systems are potentially important technological solutions for policy makers and providers in the field of housing to use as a means of expanding opportunities for the elderly to continue living independently in non-institutional settings. This report describes, reviews, and analyzes the existing and future role of emergency systems for the elderly in Canada. It provides a generic description of the hardware and monitoring services currently available in Canada based on an evaluation of existing emergency response systems. It also provides a literature review, and an analysis of existing systems, with possible innovations, along with recommendations for technological improvements. The report concludes with generic criteria that define appropriate technology suitable for elderly users.

A Study of exposure to motor gasoline hydrocarbon vapours at service stations, phase I : pilot study

Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1987. 31 p. : ill. Bibliogr. (PACE report : no. 87-4)
MICROLOG 89-00340 1 fiche

Research findings published recently indicated that studies exposing rats and mice to wholly vaporized unleaded gasoline produced dose-related incidences of renal damage, renal cancers and liver tumours. The actual risk to humans was difficult to assess in the absence of good epidemiologic data, leading to the undertaking of a study in three phases. This pilot study verified the efficacy of the sampling method; identified and resolved problems in the analytical method; and evaluated the performance of the selected analytical laboratory.

A Study of exposure to motor gasoline hydrocarbon vapours at service stations, phase II : summer study

Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1987. iii,

69 p. : ill. (PACE report : no. 87-5)
MICROLOG 89-00339 1 fiche

Study regarding the fate and persistence of PAH's in soil that had been previously treated with refinery wastes. The study determined motor gasoline vapour exposure of full-serve attendants (pumpers), with self-serve customer exposure approximated by short term measurements during automobile refuelling. Area samples were taken at the service station lot lines. Bulk samples of gasoline being pumped were also obtained. This report summarizes Phase II, which evaluated exposure to summer grade gasoline vapours during summer weather conditions. Field sampling was carried out in Halifax, Montreal, Toronto, Calgary and Vancouver between June and August 1985. A standardized sampling and analytical protocol using 600 mg charcoal tubes and capillary gas chromatography with flame ionization detection was followed.

Study of flue, furnace and envelope parameters affecting oil furnace start-up spillage

G.K. Yuill and Associates. Ottawa : Canada Mortgage and Housing Corporation, 1988. 63 p. : ill.
MICROLOG 89-04333 1 fiche

This report summarizes a study of flue, furnace and envelope parameters that can affect start-up spillage of an oil furnace. It simulates transient furnace-flue system performance after firing, using the heating system simulation program, FLUESIM. As a basis of comparison, this study uses a 127 mm standard A-Vent, which is specified in detail in the Appendix. Every parameter is compared to this standard system at various degrees of backpressure during a start up after a cold equilibrium.

Study of harmonic reduction alternatives for the NSTF solar simulator : final report

prepared by Peter A. Bruyn ; for Renewable Energy Branch, Energy, Mines and Resources Canada. Mississauga, Ont. : Ontario Research Foundation, 1987. i, 265 p. : ill. Report no. ES/EPD-87-02.
MICROLOG 89-05613 3 fiche

A 120 kW dc arc lamp is used as a solar simulator at the National Solar Test Facility. Previous work with this solar simulator determined the existence of a 360 Hz ripple in the lamp output, which is negligible in testing solar thermal collectors, but is seen in the current output of solar cells and PV panels. This report presents the results of tests to reduce the output ripple. The arc's voltage, current and light intensity were characterized for their ripple content and a circuit analysis was done; the degree of correlation between the ripple in the light intensity and the ripple in the arc's current was determined to predict the reduction of the ripple in the light intensity when the ripple in the current is reduced; the theoretical minimum ripple in the light intensity that should be attainable was determined; and the various methods used in producing a low ripple content dc supply were identified, with their feasibility and cost effectiveness.

Study of mechanical coalescing for petroleum emulsions

by W.Y. Svrcek Engineering Ltd. ; for Colt Engineering Corporation. Calgary, Alta. : Colt Engineering Corporation, 1988. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Task 1 interim report : prior studies survey - vol. 2 : Task 2 final report : bench-scale experimental study. CANMET contract: 69146-01-SQ.
MICROLOG 89-05071 2 fiche

Survey of patents and scientific literature concerning mechanical emulsion coalescence. All recognized passive techniques for mechanically breaking emulsions of crude oil and water were considered. Passive mechanical techniques are those methods which rely on the interaction of a physical, normally solid, medium with the emulsion to alter the characteristics of the emulsion and so induce a separation of the phases, an interaction analogous to that of a catalyst in a heterogeneous chemical reaction. Other classes of methods were considered only in potential combination with such passive coalescing methods.

Jack. *CANMET contract: 79060-01-SQ*

MICROLOG 89-05083 5 fiche

Report on experimental work in areas related to understanding and improving thermal recovery of heavy oil. The work was divided into 9 tasks, presented in 5 volumes. Task 1 involved an extensive review of relevant literature including oil viscosity variability, thermal alteration of oil, the relationship of oil viscosity to asphaltene content, team distillation, and applications of instrumental thermal analysis techniques. Task 2 involved a study of the natural variability of oil within a single heavy oil reservoir. Tasks 3 and 4 investigated the thermal alteration of 2 Lloydminster heavy oils, with oil samples heated in a sealed reactor for various times and temperatures, and changes in oil properties and composition determined. Task 5 investigated the relationship between asphaltene content and oil viscosity, with the asphaltene content varied by mixing together different amounts of asphaltenes and maltenes, using a specialized procedure. Task 6 explored the potential impact of thermal alteration of oil

on flow behaviour. Task 7 explored the contribution of steam distillation to thermal oil recovery using a series of linear corefloods. Task 8 evaluated applications of instrumental thermal analysis methods using thermogravimetric curves collected for oil samples under a variety of conditions. Task 9 gave a review of the numerical simulators developed over the past 20 years to help understand and predict the performance of thermal recovery processes.

A Study of the fracture toughness of bronze propeller alloys : final report

by J.I. Dickson...et al. Montreal : Ecole polytechnique, Centre de développement technologique, 1989. ii, 137 p. : ill. *CANMET contract: OS785-0027*

MICROLOG 89-04526 2 fiche

Mn-Ni-Al and Ni-Al bronzes are materials often employed for ship propellers which must have fracture toughness as one of their important properties. This property is of particular importance for propellers for icebreakers and for arctic service, because of the probability of impact with ice. This study determined the influence of Mn content, within the range 8-14% Mn, and of microstructure as influenced by different heat treatments, on the fracture toughness of Mn-Ni-Al ship propeller bronzes containing approximately 2% Ni, 7-8% Al and 3% Fe. Some similar tests were also carried out on a 4.4% Ni - 8.6% Al bronze as well as on specimens taken from two propellers which had fractured in service.

Study of the representativeness of the BNPD 100-m meteorological tower

by O.T. Melo and Y.T. Tam. Toronto : Ontario Hydro, Research Division, 1989. 25 p. : ill. Bibliogr. (Report ; no. 89-27-K) MICROLOG 89-04300 1 fiche

On-site meteorological monitoring at Ontario Hydro nuclear generating stations states that instrumentation to measure wind speed, wind direction, wind shear, ambient air temperature, and atmospheric turbulent diffusion be located at each site. One of the steps in implementation of this strategy involves evaluating existing instrumentation at each site for representativeness. This report measures the representativeness of the Bruce Nuclear Power Development 100-m meteorological tower. Two sets of measurements were made from July 1984 - June 1985, one near the Bruce A switchyard, the other at the Visitor's Centre on top of the bluff. The study looked at wind direction and speed at 10 m above ground, temperature and solar radiation at about 1.5 m above ground and the structure of the lower atmosphere using acoustic sounders.

A Study to model the effects of uranium mine tailings on a permafrost environment

by M.-K. Woo and J.J. Drake. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1988. v, 41 p. : maps. Bibliogr. (Environmental studies ; no. 53) ISBN 0-662-16264-1
MICROLOG 89-00304 1 fiche

Uranium mine tailings may have long-term environmental impacts because of their low radioactive decay rate, but little is known about the effect of such tailings on the arctic environment. This study began after a field reconnaissance in 1981. Two years of major field investigations, carried out in Central Keewatin, allowed equations and parameters to be determined for the model, which simulates the daily temperature and moisture profiles

using inputs of air temperature, precipitation, solar radiation and lateral inflow to the tailings. If the tailings are flooded, the model will also simulate the ice cover and the effects of the floodwater upon the thermal regime of the tailings. The model also couples the water and energy fluxes. Detailed descriptions of different components of the model are given in the programmers' manual which also includes a program listing and a definition of the parameter values. The user's manual describes the data file, the interactive input session and provides sample outputs from the model.

A Submersible groundwater pump for photovoltaics operation

by P.R.B. Ward. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1987. 29 p. : ill. Bibliogr.
MICROLOG 89-05626 1 fiche

Progressive cavity pumps are widely used in North America for heavy duty industrial applications and in Africa and other continents for groundwater pumping. The pumps are powered by grid electricity, diesel and gas motors and by hand. One of the main drawbacks to the currently available pumps is that a long drive shaft is used which runs down inside the delivery pipe and transmits mechanical power from the surface to the pump element, which is close to the bottom of the well. The drive shaft is supported at 5-foot intervals by rubber bearings which prevent the shaft from flexing and hitting the inside of the delivery pipe, but which also consume energy and make installation difficult. The report describes the design, construction and testing of a progressive cavity pump driven by a submersible motor and suitable for installation in a standard 6 inch (150 mm) diameter well. Two prototypes were constructed and tested.

Suitability of inclined plate anchors for guyed transmission towers

by R.H.K. Tsang and H.S. Radhakrishna. Toronto : Ontario Hydro, Research Division, 1989. i, 84 p. : ill. (Report : no. 89-86-K)
MICROLOG 89-06315 1 fiche

Tubecek disk anchors with the corrosion protected rod may offer holding capacity of up to 450 kN for guyed structures. An assessment of the anchor suitability for Ontario Hydro transmission applications was done. Four trial installations were performed followed by full-scale pullout tests at Essa Transformer Station. Several factors of influence related to the soil strengths and installation parameters were examined, and excavation procedure, backfilling operation and angle of inclination

were investigated to identify their effects on the foundation.

A Summary of current knowledge on the distribution and abundance of moulting seaducks in the coastal waters of British Columbia

by J.-P. L. Savard. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1988. xi, 82 p. : ill. Bibliogr. (Technical report series ; no. 45) ISSN 0831-6481 ISBN 0-662-16450-4
MICROLOG 89-00461 2 fiche

Little is known about the distribution, density and behaviour of moulting seaducks in the coastal waters of British Columbia. Since seaducks are vulnerable to industrial activity during moult, when they are flightless, the increased maritime traffic during their July-August moult, and the probability of renewed offshore petroleum exploration makes it urgent to document the abundance, distribution, and habitat requirements so that a baseline exists from which to define sensitive areas and assess potential impacts. This report brings together existing information, including that in unpublished reports, and summarizes the Royal British Columbia Museum Wildlife Records Scheme for July and August for Harlequin ducks, Surf Scooters and White-Winged Shooters. The report identifies major threats to moulting ducks and areas for future research.

Summary of fish population data from Sipiweš and Cross Lakes, 1987

by D.J. Green. Winnipeg : Manitoba Natural Resources, Fisheries Branch, 1987. x, 90 p. : ill. Bibliogr. (Manuscript report ; no. 88-12)
MICROLOG 89-02359 2 fiche

Cross and Sipiweš Lakes are located on the Upper Nelson River System. Cross Lake is immediately downstream of Manitoba Hydro's Jenpeg Generating Station while Sipiweš Lake is just downstream of Cross Lake. Lake Winnipeg Regulation and the operation of Jenpeg Generating Station both have an influence on water level and flow conditions through these two lakes. In 1985, an ecological monitoring program was initiated to investigate and document the possible impact of hydro development on fish populations within the Churchill River Diversion and Nelson River Systems. Cross and Sipiweš Lakes were 2 of the 6 lakes chosen for annual sampling. This report presents the fish population data collected, including fork length, round weight measurements, sex, and state of maturity. Aging structures were taken from the principal commercial fish species of lake whitefish, cisco,

walleye, sauger, and northern pike. Summaries and growth curve analyses were performed.

Summary of monitoring and research activities, 1988

Fraser River Estuary Management Program (Canada). Standing Committee on the Fraser River Estuary Water Quality Plan. Victoria : Fraser River Estuary Management Program, 1988. v, 73 p. Bibliogr. Bound with: *Fraser River Estuary Workshop on Monitoring and Research : proceedings*. ISSN 0843-4891
MICROLOG 89-02386 1 fiche

The lower Fraser River and Estuary support large runs of salmon which are utilized in commercial, recreational and native food fisheries. In addition, the area is of major importance to migratory birds on the Pacific flyway and is extensively used for recreation. Industrial and municipal discharges, forest industry operations and agricultural activities affect the water quality and may have an impact on its resources and recreational uses. This report describes the various monitoring programs, including a review of current monitoring and research activities in the Fraser River Estuary Management Program study area. Questionnaires were sent to individuals actively working in the area, and the information obtained is presented in cross referenced tables describing general study information, and details of sediment, water chemistry, biota and bioassay studies. In addition, abstracts of papers and some questions from the Fraser River Estuary workshop on monitoring and research, held in 1988, are included.

Summary of Ontario municipal statistics, 1977-1986

Toronto : Ministry of Municipal Affairs, 1988. viii, 277 p. French ed. (*Relevé des statistiques...1977 à 1986*) : 89-05901/6. CSI 55115.202.
MICROLOG 89-05902 6 fiche

The presentation of the data follows the fund basis on which municipalities are required to report their financial affairs. The three funds are the revenue fund, the capital fund and reserves and reserve funds. The first reports not only such ordinary operating expenditures as salaries, services and supplies, but also such items as debt charges, transfers to the capital fund and transfers to reserves and reserve funds. The second is used to account for expenditures that create or extend the useful life of municipal plant and equipment. The third fund is used to account for money put aside by a municipality for application on

designated projects at a later date, to cover future liabilities and to provide for working funds or contingencies.

Summer nutrient conditions in the lower Holland River prior to diversion of municipal inputs

by R. Angelow and G. Robinson. Toronto : Ministry of the Environment, 1985. iv, 32 p. : ill. Bibliogr. (Technical report ; B. 3) MICROLOG 89-02867 1 fiche

The Holland River is shallow, eutrophic and behaves as a stagnant reservoir during the summer months. The Holland River East Branch received primarily municipally treated sewage from Newmarket and Aurora, which by 1984 had all been diverted. This limnological investigation provides baseline information on summer trophic conditions in the lower Holland River before nutrient supplies were further reduced by the diversion of municipal sewage discharges out of the basin. Water samples were collected at mid-depth from 3 stations during the ice-free periods of 1982 and 1983. In addition, Cook Bay was sampled in 1983. Chemical analysis for phosphorus, nitrogen, iron, manganese, and chlorophyll were performed. Water temperatures and dissolved oxygen concentrations were measured in the field.

Summer studies of the nearshore fish community at Phillips Bay, Beaufort Sea Coast, Yukon

by W.A. Bond and R.N. Erickson. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1989. vi, 102 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1676) This is the 24th technical report from the Central and Arctic Region, Winnipeg. ISSN 0706-6457 MICROLOG 89-03959 2 fiche

The initiation, in the early 1980s, of proposals for industrial developments at Stokes Point and King Point on the Yukon coast, and the controversy surrounding the potential impacts of gravel-fill causeways in the Alaskan Beaufort have highlighted the need for the improvement of the data base on the fishery resources of the region. This study, undertaken in coastal water in the vicinity of Phillips Bay, Yukon, was

conducted as part of the Critical Estuarine and Marine Habitat Project. In 1985, fish populations were sampled using gillnets and small mesh seines. The second phase of the study, conducted in 1986, concentrated on the use of shore-set trapnets to monitor the daily movements of fish. This report presents the results of that trapnetting operation and represents the final report for the project.

Superpower rivalry in the Indian Ocean

by P. George. Ottawa : Canadian Institute for International Peace and Security, 1989. 36 p. Bibliogr. (Working paper ; no. 16) ISBN 0-662-16768-6
MICROLOG 89-03459 1 fiche

The paper focuses on the interaction between the presence of the superpowers in the Indian Ocean and the regional conflicts which have caused concern in the last decade. It first presents an historical survey of external involvement in the Indian Ocean and defines the region in its geographical context. Then, in a chronological assessment of the activities of the

United States and the Soviet Union in the Indian Ocean region, it is shown how the Indian Ocean moved from being an area of low strategic priority, to one at the forefront of the strategic competition between East and West. Finally, the paper considers the impact of changing geostrategic circumstances on regional security relationships.

Superwindows from pyrolytic deposition of fluorine doped tin oxide on glass : U-values and electrical contacts

by K. Colbow. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1988. xvii, 40 p. : ill. Bibliogr.
MICROLOG 89-05649 1 fiche

A thin film of fluorine doped tin oxide on glass exhibits high electrical conductivity, high transmittance and low emissivity to the visible region of the light spectrum. Heating the glass is accomplished by making two separate electrical contacts on the thin film and applying a potential difference between them. Electrical contacts to fluorine doped tin oxide coated glass were investigated to produce low cost, electrically heated windows. This report compared resistance between the film and the electrical contact; the stability of different contacts; the thermal performance of different types of glazings; and the optical properties of fluorine doped tin oxide thin films on glass.

Surficial geology of the Swan River area

by E. Nielsen. Winnipeg : Manitoba Energy and Mines, Geological Services, 1988. vi, 51 p. : ill., maps. Bibliogr. (Geological report ; GR80-7) *Fold. maps not filmed*.
MICROLOG 89-02279 1 fiche

Description of the Quaternary deposits in the Swan River Valley and the adjacent parts of Duck Mountain, Porcupine Hills and the Manitoba Plain. Mapping was done by vehicle traverses along roads, and by foot traverses in areas otherwise inaccessible. Airphoto interpretation supplemented the field information in the more remote areas. Sieve and pipette analyses were performed on 65 till samples, the carbonate content of the less than 0.063 mm fraction of the till samples was determined using the Leco Induction Furnace, pebble counts of 300 clasts were done on each of the 0, -1, -2, and -3 phi fractions of each till sample, and the fine fraction of non-till samples was analyzed by the hydrometer method to determine the percentage of sand, silt and clay.

Surge voltage investigation at the Moore farm

by M.V. Lat. Toronto : Ontario Hydro, Research Division, 1988. 9 p. : ill. (Report ; no. 88-216-K)
MICROLOG 89-04585 1 fiche

Summary of the results of a surge voltage recording study at a farm near Lindsay in the Fenelon Falls area. Complaints were mainly concerned with livestock problems, including miscarriages, deaths and physical disturbances (feeding problems, kicking, etc.) and secondarily with frequent failures of incandescent light bulbs. An initial investigation in the fall of 1987 produced no reasons for the problems, but it was decided to proceed with monitoring of the relevant voltages on the farm to determine if there were any transients and to provide clues to their origin. The study was carried out over 4 months using state-of-the-art transient recording equipment.

Survey of microprocessor based performance monitoring devices in Canadian surface coal and oilsands mines in 1987

by H.G. Naidu. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 11 p.
Bibliogr. (Report ; CRL 88-48(TR))
MICROLOG 89-00474 1 fiche

It is recognized that microprocessors help in improving the performance of surface mining equipment by providing timely information on equipment health and performance, although it has taken 10 years of development and field trial to produce the reliable off-the-shelf units that are now available. A survey was carried out among Canadian mines through a questionnaire (included) and discussion to determine the acceptance, type and industry experience with these devices. This report documents the findings of this survey and is based on the information provided by the users. It also describes several similar products suitable for performance monitoring.

Swiftsure and Amphitrite banks juvenile salmon survey, September 25-29, October 9-13, November 16-18, and November 23-25, 1987

by N.H. Olsen, J.F.T. Morris and M.C. Healey. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 25 p. : ill. (Canadian technical report of fisheries and aquatic sciences ; no. 1615) ISSN 0706-6457 MICROLOG 89-01041 1 fiche

Aggregations of juvenile chinook and coho salmon are known to exist over Swiftsure and other banks, which lie on the continental shelf off southwest Vancouver Island. These aggregations are hypothesized to form in response to eddies caused by tidal current rectification. In the spring and fall, the summer and winter circulation undergoes a transition phase during which stable components of shelf circulation break down. It is hypothesized that these events cause the dispersal and redistribution of the salmon aggregations. Employing commercial trolling

methods, an exploratory survey was conducted on Swiftsure and Amphitrite Banks in September, October, and November of 1987 to obtain data on juvenile abundance, distribution, and size and species compositions before and during the fall transition. This report summarizes the information obtained.

A Synopsis of current and planned coal transportation initiatives

by D.B. Stewart and G. Zahary. Ottawa :

Canada Centre for Mineral and Energy Technology. Coal Research Laboratories, 1988. v. 11 p. (Report ; CRL 88-68(TR)) MICROLOG 89-01626 1 fiche

Canada produces many bulk commodities, including coal, potash, sulphur, iron ore, and base metal concentrates, and in most cases these minerals are transported thousands of kilometres to market. Unprocessed and processed minerals account for about half of all domestic rail traffic and one third of all domestic marine shipping. This report summarizes existing and planned initiatives that could contribute to reduced transportation costs of coal and coal products. The descriptions include the name and address of a contact person who can provide additional details on particular projects. • CA CM NR SC

Synopsis of the parasites of domesticated mammals of Canada -- Rev.

by M.J. Kennedy. Edmonton : Alberta Agriculture, Animal Health Division, 1988. 53 p. Bibliogr. MICROLOG 89-00370 1 fiche

The revised edition of this synopsis contains parasite-host and host-parasite lists of 247 species of parasites from goats, pigs, horses, cats and dogs. The compiled information covers 1877-1987, and was extracted from numerous publications in the primary scientific literature, using only reports based on original records. Publications that do not provide original parasite-host distribution records but deal with some aspect of Canadian veterinary parasitology are compiled in a supplementary list of references. For each parasite species listed, information is given on current scientific name, including authors and dates, followed by recognized synonyms; site of occurrence of the parasite in its host; hosts; distribution; authors responsible for the published records; explanatory comments offered on systematics, nomenclature, misidentifications and synonyms of parasites, and on the hosts, sites within hosts and validity of previous records. AG AL LS PR SC

Synopsis of the parasites of vertebrates of Canada : parasites of marine mammals

Leo Margolis, Hisao P. Arai ; edited by Murray J. Kennedy. Edmonton : Alberta Agriculture, Animal Health Division, 1989. 26 p. Bibliogr. MICROLOG 89-03465 1 fiche

This synopsis contains parasite-host and host-parasite lists for 74 species of parasites from 26 species of marine mammals from Canadian waters. The 74 species are distributed among higher taxa as follows: Protozoa, 2; Trematoda, 9; Cestoidea, 9; Nematoda, 24; Acanthocephala, 10; Copepoda, 1; Amphipoda, 13; Anoplura, 3; and Acarina, 3. Eighteen previously unpublished host-parasite-locality records are added to the faunal records, including five species previously unreported from Canadian waters: *Hadwenius nipponicus*, *Placentonema gigantissima*, *Corynosoma similis*, and *Otrhohalarachne attenuata*. *Cyamus boopis* from *Balaenoptera physalus* in Atlantic waters appears to be a new host-parasite record. Synthèse critique de la littérature sur l'évolution des services sociaux au Québec depuis 1960

par R. Mayer et L. Groulx. Québec : Commission d'enquête sur les services de santé et les services sociaux, 1987. ii, 160 p. Bibliogr. (Synthèse critique ; 42) ISBN 2-551-08488-1 MICROLOG 89-00990 2 fiche

Cette analyse de l'évolution des services sociaux comporte deux sections. La première partie, empirique, analyse la situation en termes

de périodes renvoyant chacune à un processus social clé ou dominant: professionnalisation, réforme et institutionnalisation, remise en question professionnelle et institutionnelle. Dans la deuxième partie, analytique, on reprend le questionnement sur l'évolution des services sociaux dans la littérature académique à partir de trois cadres d'interprétation: marxiste, socio-organisationnel et stratégique HE PR QU SA

System definition for convertible enroute/precision distance measuring equipment : final report

by M.J. Jarvis. Montreal : Transport Canada, Transportation Development Centre, 1988. 15 p. Bibliogr. TP 9165E. MICROLOG 89-04044 1 fiche

System definition for a convertible Distance Measuring Equipment (DME) capable of both enroute and precision applications (DME/N and DME/P), presented with system and module specifications and block diagrams. A cost benefit study compares the costs of a convertible DME, designed and built by a single manufacturer, to separate DME/N and DME/P equipment provided by different suppliers. The report includes a timing analysis that identifies and quantifies error contributions from various sources in the ground-based equipment. CA PS SC TR

System documentation for the Mark Recovery Program

by M.A. Holmes and J.M. Hamer. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. vi, 103 p. (Canadian technical report of fisheries and aquatic sciences ; no. 1601) ISSN 0706-6457 MICROLOG 89-00784 2 fiche

The Mark Recovery Program database of the Pacific Region consists of hatchery production and coded-wire tag release recoveries of coded-wire tag salmonids in all Pacific coastal fisheries since 1975, and sampling information related to recovery effort. The database also utilizes historical catch data from the BSB database on commercial salmon catches and salmon sport catch and sampling data. Information is accessible via menu driven report generators for commonly requested data, a spreadsheet program to select specific information, and/or via user written programs employing the MRP subroutine library. This report documents user accessible subroutines, common blocks, source codes, and example shell programs. • BC CA CF FI SC

A System for calibrating the wrist-mounted laser range finder

by S. Amid, B. Trethewey and C. Archibald. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1988. v, 66 p. : ill. Bibliogr. MICROLOG 89-03321 1 fiche (Available on fiche only)

The wrist-mounted laser range finder developed in this laboratory provides depth information which is distorted due to the scanning mechanisms and the perspective distortion present in all range finding devices. Methods of removing the nonlinearities to provide an orthographic projection were developed for other range finders, but these were found to be unsatisfactory. This report describes a new method, apparatus, and procedure for calibration. CA PS SC

A System of health statistics : toward a new conceptual framework for integrating health data

by M.C. Wolfson. Ottawa : Statistics Canada, Analytical Studies Branch, 1987. 33 p. Bibliogr. (Research paper series ; no. 6)

French ed. (Système de statistiques...) on the same fiche.

MICROLOG 89-02372 1 fiche

Paper outlining a broad conceptual approach to the organization of health statistics data for Canada, representing the initial thinking in a longer term project directed to reviewing the basic form and content of Statistics Canada's program of health statistics. The paper reviews the major concerns of a general lack of coherence in health data as compared to the system of national accounts; and reviews the imbalance in data collection efforts that places too much weight on resource inputs and not enough on the level and distribution of health status in the population.

Le Système canadien de statistique des transports à la lumière d'un secteur évoluant rapidement : perspective d'un statisticien

par B.G. Nemes...et al. Ottawa : Statistique Canada, Division des transports, 1989. 16 p. Bibliogr.

MICROLOG 89-03364 1 fiche

Ce document décrit le système statistique tel qu'il existe aujourd'hui et présente les facteurs de changements, à la fois réglementaires et économiques, auxquels il doit faire face dans l'avenir immédiat. Ces questions sont analysées dans le but de décrire le système statistique qui en résultera. Le document se termine par des suggestions à propos du système statistique à long terme.

Un Système d'aide à la décision pour la planification stratégique des interventions d'entretien et de réhabilitation des chaussées

par M. Gendreau et L.-P. Duclous. Montréal : Université de Montréal, Centre de recherche sur les transports, 1989. 10 p. Bibliogr. (Publication ; no. 621)

MICROLOG 89-03730 1 fiche

Présente un système d'aide à la décision pour la planification à moyen et long terme des

interventions d'entretien et de réhabilitation des chaussées sur un réseau routier de grande taille. Le système envisagé est basé sur une approche de décomposition du problème combinant deux modèles d'optimisation complémentaire: un modèle de planification stratégique et un modèle de planification tactique. Cette étude présente la structure générale du modèle et du logiciel d'aide pour la planification stratégique.

Système de statistiques relatives à la santé : proposition d'un nouveau cadre théorique visant l'intégration de données relatives à la santé

par M.C. Wolfson. Ottawa : Statistique Canada. Direction des études analytiques, 1987. 37 p. Bibliogr. (Documents de recherche ; no 6) L'éd. anglaise (A System of health...) sur la même fiche.

MICROLOG 89-02372 1 fiche

Cette étude propose un cadre théorique pouvant servir à l'établissement d'un système de statistiques relatives à la santé pour le Canada et suggère une stratégie pour remédier à la situation. Elle fait la révision de la structure de base et du contenu du programme de la statistique de la santé de Statistique Canada. L'étude traite des données sur la santé, le déséquilibre entre les divers projets de collecte de données et le niveau de santé des Canadiens et donne les profils de la population.

Tainting and toxicity in sea scallops *Placopecten magellanicus* exposed to the water-soluble fraction of Scotian shelf natural gas condensate

by R. Ernst, J. Carter and N. Ratnayake. Ottawa : Environment Canada, Environmental Protection Directorate, 1989. xi, 141 p. : ill. Bibliogr. (Report : EE-116)

MICROLOG 89-05570 2 fiche

A natural gas liquids (condensate) blowout in 1984 off Sable Island raised concerns about the possibility of tainting (development of an off-flavour in the edible tissue of commercial species) and toxic effects of other blowouts in the future. This report assesses the chemical properties of Scotian shelf water-soluble fraction (WSF) of the condensate to determine the acute toxicity and potential for tainting in scallops exposed to the WSF. Scallops with a shell height exceeding 8 cm were collected from the Bay of Fundy and used in toxicity tests involving different dilutions of WSF to seawater for varying periods of time. Depuration was also examined. The Murray microextraction procedure was used for extraction of hydrocarbons from samples. Condensate, exposure water, and scallop adductor muscles were analyzed by gas chromatography and by gas chromatography/mass spectrometry. Tainting was evaluated by the taste panel method involving triangle tests with control samples.

Tank car thermal response analysis, vol. 1 : executive summary

J.E.S. Venart : prepared for Transportation Development Centre. Fredericton : University of New Brunswick, Dept. of Mechanical Engineering, 1985. x, 113 p. : ill. Bibliogr. French ed. (Analyse...thermique des wagons-citernes...) : 89-06040/2. TP 6809E.

MICROLOG 89-02023 2 fiche

In order to make the shipping of hazardous industrial fluids safer, a complete understanding of the actual phenomena inside tank cars under external fire conditions is necessary. This report presents the results of an experimental and analytical simulation of the fire-induced heat

transfer to rail tank cars containing liquified petroleum gases (propane). A tank simulator was designed, developed, and used to obtain pressure, temperature, level, and thermal fluid behaviour results with heat addition and pressure relief over a wide range of experimental conditions with Refrigerant 11. Free convective liquid stratification and subcooled core heating were analyzed; the effects of surface orientation and enhancement were studied to assess their influence on nucleate pool boiling with and without EXPLOSAFE; analyses of tank geometry and initial liquid level, pool fire-flare interaction, and thermodynamic and transport properties of propane were made; a determination of the vapour space heat transfer was attempted; and the thermal contact conductance of EXPLOSAFE was measured.

Tank car thermal response analysis, vol. 2 : transient natural convection in a partially filled horizontal cylinder

N.U. Aydemir, J.E.S. Venart : prepared for Transportation Development Centre. Fredericton : University of New Brunswick, Dept. of Mechanical Engineering, 1985. xi, 101 p. : ill. Bibliogr. TP 7514E.

MICROLOG 89-02024 2 fiche

In order to make the shipping of hazardous industrial fluids safer, a complete understanding of the actual phenomena inside tank cars under external fire conditions is necessary. This report presents the results of a study of the mechanism of free convective heat transfer inside a circumferentially heated, partially filled horizontal cylinder to predict the temperature-time history of the vessel and its contents in the liquid region and, therefore, to determine the rate of increase of pressure in the vapour. To solve the governing equations of motion, model equations were rewritten in their integral forms and closed expressions were obtained for the thermal stratification phenomena inside the cylinder using a new stability criteria proposed for the free convective boundary layer along the walls. The differential equations of motion are integrated numerically with finite differences using a technique of coordinate transformation.

Tank car thermal response analysis, vol. 3 : final report : experimental determination of the heat transfer in the vapour space of a partially filled horizontal cylinder

G. Qureshi...et al. : prepared for Transportation Development Centre. Fredericton : University of New Brunswick, Dept. of Mechanical Engineering, 1987. xv, 161 p. : ill. Bibliogr. TP 7515E.

MICROLOG 89-02025 2 fiche

In order to make the shipping of hazardous industrial fluids safer, a complete understanding of the actual phenomena inside tank cars under external fire conditions is necessary. This report presents the results of a study to obtain vapour heat transfer coefficients of a partially filled horizontal cylinder with and without an internal protection system (EXPLOSAFE) under simulated fire conditions, using a constant electrical power input. Wall and vapour temperatures as well as pressure histories as a function of time were obtained for a partially filled horizontal cylinder of Freon-11. Heating of the vessel from 10-65 kW sq m, with 3 liquid levels (76, 58 and 23%) and 2 pressure relief valve orifice diameters (6.4 mm and 9.5 mm) permitted fluid behaviour observation and estimation of the vapour space heat transfer coefficients.

Tank thermal response analysis, phase II : a study of the transient phenomena in a heated vessel during depressurization

prepared for Transportation Development Centre ; by Qi Wang and J.E.S. Venart. Fredericton : University of New Brunswick, Dept. of Mechanical Engineering, 1987. xv, 121 p. : ill. Bibliogr. TP 8422E. MICROLOG 89-04017 2 fiche

Experimental results and analysis of a test series to evaluate the transient void fraction development in a partially filled, externally heated horizontal cylinder. The work was undertaken as part of a research program concerned with the safe transport of flammable pressure liquified gases. Two experiments were performed in an externally heated (80 kWe) R11 filled, 380 mm diameter horizontal cylinder protected with a 9.53 mm diameter pressure relief valve set for 343 kPa; one with a lading of 50% and the other at 75% by volume. Selected time-dependent temperatures, pressures, mass and bulk fluid, and boundary layer void fraction development were measured. An analytical model based on the conservation of mass and energy in the 2-phase mixture layer was made and compared to the flux drift model.

The Taxation of income from capital in Canada

by M.J. Daly, P. Mercier and T. Schweitzer. Ottawa : Economic Council of Canada, 1989. ix, 62 p. Bibliogr. *French ed. (L'imposition du rendement...)* : 89-03289/1. ISBN 0-660-13080-7
MICROLOG 89-03290 1 fiche

The purpose of this study is threefold. First, it computes the marginal effective tax rates for Canada taking into account not just corporation, personal, and business property taxes, but also sales taxes levied on purchases of capital inputs. Second, it extends the method for computing the marginal effective tax rates to noncorporate business investment and to owner-occupied housing. Third, it evaluates the impact of tax reform on investment and saving incentives in Canada. These systems are compared with those provided by the tax systems of the U.S., the U.K., and Japan. Finally it provides a brief description of the methodology used to derive marginal effective tax rates; a summary of the main features of the Canadian tax system both before and after recent tax reforms; and an estimate of marginal effective tax rates for Canada and the U.S., the U.K., and Japan.

The directory is divided into the principal areas of TDC's research and development program in transportation technologies: rail, surface, air, and marine. Each project description briefly states the rationale, objectives, and method of the project, and gives an account of completed work. It also provides the name of the performing organization, the titles of reports, the work schedule, project and file numbers, funding sources, and the name of the project officer. It includes a list of recent reports published at the end of the directory.

Teachers and microcomputers : a comparison of the PAPT and CEQ surveys

by A. Bénéthah and P. Danvoye. Québec : Gouvernement du Québec, Ministère de l'éducation, Direction des services éducatifs aux anglophones ; Direction des ressources didactiques, 1987. ii, 29 p. Bibliogr. ISBN 2-550-14103-2
MICROLOG 89-01807 1 fiche

Paper presents a comparison of surveys that studied the implementation of microcomputers in public schools in January of 1985 and for the period December 1986 to January 1987. This paper compares the results of these studies and considers issues such as access to microcomputers, training received, pedagogical uses of the computers, teachers' opinions of the impact of computer uses on their work, and difficulties such as facilities offered by the school board and in educational software.

Technical and economic assessment of micronized coal pulverizers and a review of the current state of micronized coal combustion technology : report

Stone & Webster Canada Limited. Ottawa : Stone & Webster, 1988. 90 p. : ill. Bibliogr. *CANMET contract: 79067-09-SQ*.
MICROLOG 89-01734 1 fiche

Micronized coal firing is applicable in conventional, dry form, as slurries of coal in oil or in water, or as coal/oil/water mixtures. This report presents the current status of development of the technology, whose purpose is to improve the combustion characteristics of coals so that they may compete directly with, or substitute for, liquid or gaseous fuels in steam raising and process heating applications. All known manufacturers of micronizing mills applicable to coals and having capacities consistent with industrial coal firing applications were contacted, as well as users of commercial micronizing mills. Reviews of the technical literature were also made. Both a technical assessment and an economic evaluation of dry micronized coal pulverizers were made.

The Technical committee approach to coal research

Edmonton : Alberta Energy, Scientific and Engineering Services and Research Division, 1988. 6 p. ISBN 0-86499-585-7
MICROLOG 89-02040 1 fiche

In 1985, an ad hoc joint industry/government program development committee was successfully established to advise the Alberta Office of Coal Research and Technology on areas of research pertaining to coal use. This report describes the research rationale and planning; the organization of such technical committees and the role of industry on them; program and project control; and budgets. Contacts are given for those interested in participating on such committees.

Technical note on the construction of stoppings or dams in the Sydney Coalfield

by G.A. Haslett. Ottawa : Canada Centre for Mineral and Energy Technology. Coal Research Laboratories, 1988. vi, 21 p. : ill. Bibliogr. (Report ; CRL 88-57(TR)) MICROLOG 89-00479 1 fiche

For the purposes of this technical note stopping or dams are installed in underground coal mines to effectively seal off the workings beyond and behind the site where the stopping or dam is constructed. The process of sealing off should effectively exclude the intrusion or the extrusion of the internal or external atmospheres or gases. The stopping or dam must also contain any explosion that might occur within the workings beyond and behind it. A brief account of a stopping procedure that was used in Australia and the U.S.A. is given with the reasons underlying the adoption of the procedures. A review of the guidelines for the construction of stoppings in the Federal Republic of Germany and in the United Kingdom then follows.

A Technical note on the forward and backward thoron progeny collection characteristics of graded wire screens

by J. Bigu, R. Holub and J. Zhou. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 26 p. : ill. Bibliogr. (Report ; MRL 88-142(TR)) MICROLOG 89-02632 1 fiche

A preliminary study was conducted to determine the thoron progeny size distribution by means of an array of 4 graded wire screens of different sizes (mesh no. 40, 80, 250, and 500 per inch). Experiments were conducted in a radon/thoron walk-in test facility. Tests were also carried out in order to measure the variables which are important in the calculation of radioactive aerosol size distribution by wire screens: the collections efficiency of the screens, and the screen forward-to-backward radioactivity ratio. The majority of the experiments were conducted at moderate aerosol concentrations, with a few experiments run at relatively low aerosol concentrations.

Techniques d'intervention pour le nettoyage des produits chimiques dangereux déposés sur les sédiments

par N. Bonham. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1989. ix, 149 p. : ill. Bibliogr. (Rapport ; SPE 4/SP/1) L'éd. anglaise (Response techniques for...) : 89-

03643/2 ISBN 0-662-95412-2 MICROLOG 89-03644 2 fiche

Les produits chimiques plus denses que l'eau et peu solubles et qui coulent posent de sérieux problèmes en cas de déversement dans l'eau. Les solutions possibles à ce problème de pollution sont le laisser-faire, l'enlèvement des matériaux pollués afin de les traiter, le traitement physico-chimique in situ ou l'enfouissement. Ces options techniques ainsi que leurs limites et leurs coûts sont examinés dans ce rapport.

Techniques for collection and analysis of data on perinatal mortality in Kinshasa, Zaïre

by D. Nzita Kikhela. Ottawa : International Development Research Centre, 1989. x, 87 p. Bibliogr. (Technical study ; 61e) (Infant mortality and health studies) ISBN 0-88936-529-6 MICROLOG 89-05227 2 fiche (Available on fiche only)

In developed countries, mortality rates are well known and have declined sharply since the 19th century. In Africa, however, such rates are conjectural. This document presents the methodological findings of a study in Kinshasa from 1981 to 1986 as a step toward the better study of mortality in the young. These findings focus on three topics: data gathering, the preparation and/or application of a conceptual framework, and the determination of which families are at risk. It presents an appropriate methodology for determining families at risk.

A Technology status report : energy usage and microwave heating potential in Ontario ceramics industries

Ontario. Ministry of Energy. Energy Technology Development Section. Toronto : The Ministry, 1988. 29 p. Bibliogr. MICROLOG 89-00399 1 fiche

The manufacturing of ceramics is labour, time and energy intensive involving the processes of drying, sintering and often the bonding of ceramics to other materials. Microwave heating is an energy efficient technology suitable to these processes. In order to estimate the energy savings and to understand the market potential of microwave technology within the ceramics industries, the Ministry of Energy

conducted an industry-wide survey of Ontario ceramics manufacturing companies. This report identifies existing ceramics manufacturing companies in Ontario, estimates energy usage within the various ceramics industries and estimates the energy impact of microwave technology.
EN ON PR PS SC

A Technology status report : radiant-wave technology as a source of energy savings

Ontario, Ministry of Energy. Energy Technology Development Section. Toronto : The Ministry, 1988. 20 p. Bibliogr.
MICROLOG 89-00401 1 fiche

Radiant wave technologies include microwave, radio frequencies and infrared heating as well as ultra-violet curing devices. Unlike conventional heating equipment, where heat is applied to the surface of an object, radiant heating produces heat within the body of the material. The benefits of radiant heating technologies are lower energy costs, reduced floor space requirements, less scrap material, lower exhaust emissions, lower labour costs, greater productivity and improved product quality. The Ministry of Energy is evaluating uses of radiant wave technology in a number of industries such as ceramics, food processing, pharmaceutical, lamination and coating. Regulatory, technical and economic impediments have been identified. A list of Canadian equipment suppliers is provided.

Technology, gender, and power in Africa

by P. Stamp. Ottawa : International Development Research Centre, 1989. x, 185 p. Bibliogr. (Technical study ; 63e) ISBN 0-88936-538-5
MICROLOG 89-04839 3 fiche (Available on fiche only)

This publication argues that the study of gender relations and the power of women is central to an evaluation of development efforts in Africa. It explores the interactive relationship between technology transfer and gender factors using case studies and examples from the development literature on agriculture, health, and nutrition, as well as from feminist scholarship on Africa. It also critiques the fields of African studies, women's studies, and development studies, and examines the research findings of African women to identify the factors that either render women powerless and disadvantaged or create the conditions for their authoritative participation in development. Finally, it identifies issues and interrelations that have not been addressed in previous research and suggests ways to frame future research.

Telemetric investigations of winter steelhead in the Salmon River, Vancouver Island, 1986

by M.G. Lirette and R.S. Hooton. Victoria : Ministry of Environment and Parks, 1988. i, 21 p. : ill. Bibliogr. (Fisheries technical circular ; no. 82) ISSN 0229-1150 ISBN 0-7726-0876-8
MICROLOG 89-01357 1 fiche

The winter-run steelhead sport fishery occurs between December and May and is concentrated in the middle and lower reaches of the Salmon River on Vancouver Island. However, the fishery has been declining since 1975, leading to enhancement measures and increased regulation of anglers. Information on migratory behaviour is also vital. This study determined instream movement of winter-run steelhead in relation to time of tagging and release location; spatial and temporal distribution of tagged steelhead spawners; and post-spawning survival, emigration rate and timing. Capturing and radio-tagging of fish was done between January 30 and May 7, 1986.

Ten years of data for four cyprinid species in Lake 114, an experimentally acidified lake in the Experimental Lakes Area, northwestern Ontario

by S.M. Chalanchuk, L.C. Mohr and D.J. Allan. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1989. iv, 23 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 733) This is the 31st data report from the Central and Arctic Region. ISSN 0706-6465
MICROLOG 89-04814 1 fiche

This report presents data on the fish populations in Lake 114, the Experimental Lakes Area (ELA) of northwestern Ontario. Fish species in Lake 114 include fathead minnow, pearl dace, northern redbelly dace, and finescale dace. These 4 species are the most widespread and abundant in the area and are a significant food source for many larger fish such as lake trout. Researchers have recently shown that many species of Cyprinidae are very sensitive to acidification. Lake 114 received monthly additions of sulphuric acid from July 1979 to October 1986. This report presents length-frequency data and catch data for the Cyprinidae in Lake 114 for 1978 and 1980-88. Maximum lengths attained by each species are compared to those for ELA lakes and other North American populations.

Ten-year growth response and financial evaluation of commercial strip thinning of jack pine : a case study

by C.R. Smith and W.J.A.M. Oerlemans. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Great Lakes Forestry Centre, 1988. 26 p. : ill. Bibliogr. (Information report ; O-X-396) ISSN 0832-7122 ISBN 0-662-16386-9
MICROLOG 89-00938 1 fiche

In 1970, a 45-year-old jack pine stand near Chapleau, Ontario was commercially thinned by means of a conventional shortwood logging system. Corridors were clear-cut to a width of 5.0 m with 6.3-m-wide residual strips. On the basis of observed growth trends, predictions of future growth were made for individual crop trees and the whole stand. These predictions were the basis of a case study to provide a financial analysis of commercial strip thinning. The sensitivity of the assessment to a range of relevant stand and financial variables was explored.

Termite report : termite and carpenter ant control, 1989

Toronto : Toronto Housing Dept., 1989. 50 p. : ill. *CSI 89201.003*.
MICROLOG 89-03411 1 fiche

Fifth annual report on the extent of termite and carpenter ant infestations and their control in the City of Toronto. The statistics and maps presented in this report reflect the situation based on the City's Termite Control Program and do not take into account the cases which might have been privately treated and of which the City has no record. Descriptions of the insects are given, along with historical and current data on areas, houses, and blocks infested, and methods of control.

Test and evaluation of Chrysler T115 electric vehicle

Ontario Centre for Automotive Parts Technology. Ottawa : Energy, Mines and Resources Canada, Transportation Energy, 1987. 114 p. : ill.
MICROLOG 89-05378 2 fiche

Three Chrysler T115 mini vans were converted to electric drive in the spring of 1984. The van was used in test track, chassis dynamometer, and urban road settings. Vehicle dc energy consumption and driving range were measured on the SAE J227a C schedule driving cycle, and at constant speed at the Blainville, Québec test track. Other tests measured top speed, maximum acceleration, hill climbing, and braking performance of the vehicle. This report presents test results, data on vehicle operating characteristics, and a description of vehicle electric components.

Tests to evaluate the effect of a waterjet barrier on the burning efficiency of a floating oil slick

by G. Comfort. Ottawa Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1989.

41 p. : ill. Bibliogr.
MICROLOG 89-03657 1 fiche

High pressure waterjets were developed for oil spill control and a large prototype was produced, deployed in the field, and tested in the laboratory. Recently, tests were done to optimize the mechanical configuration of the high pressure waterjets. It was hypothesized that the waterjet barrier may also improve the combustion of the oil by providing greater aeration of the flame. This report presents the results of a test program to evaluate the effect of the waterjet barrier on the volumetric and mass oil burn efficiency and on the opacity of the smoke plume produced during the burn.

Tisdale hydraulic study for Canada-Saskatchewan Flood Damage Reduction Program

Stanley Associates Engineering Ltd. Regina : Stanley Associates, 1988. 150 p. : ill. MICROLOG 89-04896 2 fiche

This study defines water surface profiles for the historic flood (1957) and a 1:500 (design) flood under existing and floodway conditions for the study area. The water surface profiles are then used to identify flooded areas by plotting water surface elevations on 1:2000 scale, 0.5 metre contour interval mapping provided by Sask Water. MS NR PR SC

To develop a clean smelting process for highly roasted copper-nickel calcines and to improve metal recovery

Falconbridge Limited. Ottawa : Falconbridge Ltd., 1988. 5 v. : ill. Bibliogr. Contents: Pt. A, Thermogravimetric-gas chromatographic analysis of smelting -- pt. B, Densities of molten copper-nickel mattes -- pt. C, Metallic phase saturation boundary in the Ni-Cu-Fe-S system between 1000 and 1300C -- pt. D, Electrical conductivity measurements of electric furnace smelting slags -- pt. E, Final report (summary of parts A through D). CANMET contract: OSQ83-00195. MICROLOG 89-02413 5 fiche

A research project was undertaken to develop a clean smelting process for copper-nickel concentrate roasted to a high degree of sulphur elimination, with improved recovery of nickel and cobalt. Laboratory investigations were directed toward the definition of the metallurgical factors which are important in controlling metals recovery during reductive smelting. This report presents the results of Part A, in which smelting behaviour was studied by a thermogravimetric-gas chromatographic technique in conjunction with chemical and micrographic analysis; Part B, which describes the determination of the densities of molten copper-nickel mattes; Part C, which covers an investigation of the metallic phase saturation boundary in Ni-Cu-Fe-S mattes at compositions representative of electric furnace smelting, initiated in a laboratory program to determine the composition of mattes in equilibrium with metallics over a temperature range of 1000-1300C; Part D, which examines the electrical conductivity of smelting slags as a function of temperature, Fe/SiO₂ ratio, lime content, and Fe₂O₃ additions to the slag; and Part E, which summarizes Parts A-D. • CA CM NR PS SC

Tobacco smoking -- Rev.

by M. Baker. Ottawa : Library of Parliament, Research Branch, 1988. 20 p. Bibliogr. (Current issue review ; 86-22E) French ed. (L'Usage du tabac) on the same fiche. ISBN 0-660-13193-5 MICROLOG 89-05427 1 fiche

This publication discusses social perception of tobacco use; health risks from smoking and second-hand smoke; trends in smoking behaviour; the growing anti-smoking movement; the tobacco industry; government initiatives to prohibit smoking; and parliamentary action. It includes a chronology highlighting significant events related to this matter. CA CI HE SA

Toronto area labour market, 1981-1986

Toronto : Employment and Immigration Canada, Ontario Region, Economic Planning and Analysis Directorate, 1988. 20 p. : ill. (Occasional bulletin) MICROLOG 89-02167 1 fiche

The analysis presents figures on population and employment, population statistics for people 15

years and over by sex and education; and the labour force by industry, occupation, age and sex. It includes maps showing the six largest interprovincial migration flows. In addition, it presents figures displaying the population in the 15-24 age group with university degrees by sex, 1971-1986; major fields of study of male and female university graduates in 1986; major fields of study of male and female trades and other non-university certificate holders, 1986; community, business and personal service industries as a percent of the experienced labour force, 1951-1986; labour force participation rates by sex, 1951-1986; and percentage change in full-time and part-time work by sex, 1980-1985. Towed resistance trials in ice of the USCGC Mobile Bay, WTGB103

by L. Phillips and P. Zahn ; submitted to Transportation Development Centre ; by Arctic Canada Limited. Montreal : Transport Canada, Transportation Development Centre, 1986. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Final report -- vol. 2 : Appendices.
MICROLOG 89-00606 6 fiche

Results of full-scale towed resistance and self-propelled trials of the U.S. Coast Guard icebreaking tug Mobile Bay. The trials were carried out in level ice in the northern Green Bay region of Lake Michigan to establish a full scale reference line for use in predicting performance of ships in ice. Thrust, torque, propeller RPM, speed and towing pull were recorded and compared to established ice resistance formulations to assess the influence of different test parameters. An improved empirical resistance prediction equation was derived and trends in thrust deduction, wake fraction and propulsive efficiency components were examined and compared to model test results for the 140' WTGB class hull form. The correlation between full scale test data and model scale predictions was assessed and recommendations are given.

Transient effects in low-temperature-induced fracture and failure of pavement structures

by A.P.S. Selvadurai and M.C. Au. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. iii, 44 p. : ill. Bibliogr.
MICROLOG 89-03212 1 fiche

The evaluation and prediction of the performance of asphalt pavement structures which are subjected to low-temperature effects is of fundamental importance to efficient pavement design. This report focuses on the development of a numerical method of transient stress analysis of a pavement structure which is subjected to heat conduction and associated thermal effects. The numerical analysis is based on a finite element modelling which takes into account the time-dependent fluctuations of the surface temperature of the pavement structure. The report also presents studies which examine the efficiency of reinforcing layers in their ability to suppress the development of reflecting cracking in new overlays.

Transitions : report of the Social Assistance Review Committee

prepared for the Ontario Ministry of Community and Social Services. Toronto : The Committee, 1988. xxiii, 624 p. Bibliogr.

Summary (110 p.) laid in. ISBN 0-7729-4373-7
MICROLOG 89-00295 8 fiche

The Committee's mandate is to examine and answer four questions: What should be the guiding principles and objectives of social assistance? To what extent is the present system meeting those objectives? What overall strategies for change should the province adopt? What parameters should the province accept as it moves to change its legislation? This summary provides the Committee's recommendations and presents the background and rationale for these recommendations.

Transmission line refurbishment study : tower foundation inspection and testing, Smith Falls to Kingston

by R.H.K. Tsang and H.S. Radhakrishna. Toronto : Ontario Hydro, Research Division, 1988. i, 206 p. : ill. Bibliogr. (Report ; no. 88-183-K)
MICROLOG 89-04579 3 fiche

Over 11,000 circuit km of 115 kV and 230 kV transmission lines were built prior to 1950. By the end of the century, these transmission lines will be at least 50 years old, which is the design life of the conductors and line components. This initial phase of the refurbishment study consisted of examining and testing the tower structure, foundations, conductors, insulators and hardware for a section of a 115 kV line, built in 1928, south of Smith Falls in the Lennox to Merivale right-of-way. The foundations for the Kingston-type suspension towers were assessed for their condition, rate of aging, and the remaining strength. This foundation report contains the results of a visual inspection of the tower footings, a geotechnical investigation, field load tests in uplift and lateral shear, and excavation and inspection of test footings.

Transverse load distribution at ultimate limit states in single span slab-on-girder bridges with compact steel girders

by A.G. Razaqpur and M. Nofal. Toronto : Ministry of Transportation, Research and Development Branch, 1988. xxi, 281 p. : ill.
Bibliogr.
MICROLOG 89-05963 4 fiche

An extensive analytical and experimental investigation was undertaken to study the load distribution characteristics of simply supported composite concrete slab on compact steel girder bridges at all stages of loading. Detailed parametric analyses, using a nonlinear finite element method, were conducted to find the influence of many geometric and loading factors upon load distribution. The results were compared with available methods of load distribution analysis and with the provisions of the Ontario Highway Bridge Design Code. Because compact sections were used, only material nonlinearities were dealt with. Special finite elements were developed to better simulate the behaviour of the bridge and its components, including a special element for the simulation of the shear studs that connect the concrete slab to the steel girders. All aspects of the analytical model were verified by comparing the results with available experimental data and/or closed form solutions. In addition, a large scale 3-girder bridge was designed and tested to further verify the analytical procedure and to study the load distribution characteristics of such bridges.

Tritiated heavy water transportation package : analytical assessment of fluid-structure interaction effects during impact

by R.G. Sauvé and G.D. Morandin. Toronto : Ontario Hydro, Research Division, 1988. vi, 118 p. : ill. Bibliogr. (Report ; no. 88-208-K)
MICROLOG 89-04583 2 fiche

Packages used for the road transportation of low level radioactive wastes, such as tritiated heavy water, must demonstrate the ability to withstand severe impacts such as those prescribed by the Atomic Energy Control Board regulations. Ontario Hydro is currently in the process of designing, building and licensing the tritiated heavy water transportation package. Previous analyses included the heavy water payload as a non-structural lumped mass, thus ignoring possible fluid-structure interaction. In order to provide a quantitative assessment of this, an analytical model was developed to simulate the hydrodynamic effects of the heavy water during a 9 m flat and drop of the package. This report presents the detailed development and formulation of the analytical model, computer code implementation, results of the simulation, and conclusions.

Tritiated waste conditioning, part IV : package verification tests

by J.P. Krasznai. Toronto : Ontario Hydro, Research Division, 1989. vii, 21 p. : ill. Bibliogr. (Report ; no. 88-200-K)
MICROLOG 89-04567 1 fiche

Some of the tritiated liquid and solid waste generated by the Darlington Tritium Removal

Facility will need to be conditioned and suitably packaged before it can be stored at the Bruce Nuclear Power Development site. An extensive R&D effort has been ongoing since 1983 to develop immobilization and packaging concepts for these waste streams and to determine the tritium releases from these packages. The work described in this report addresses key points required to be resolved prior to design and procurement of containers of these wastes. Suitable absorbents were identified for tritiated vacuum pump oil and electrolyzer (25% KOD) fluid and the absorbent capacity under simulated transportation conditions was determined. The tritium loss from these wastes and tritiated metallic wastes, packaged in 1 cm thick high density polyethylene containers, was measured under leaching conditions.

Tritium dynamics in mice exposed to tritiated water, tritiated diet or both

by D.W. Rodgers. Toronto : Ontario Hydro, Research Division, 1988. iv, 16 p. Bibliogr. (Report ; no. 88-30-K)

MICROLOG 89-02596 1 fiche

Tritium, largely in the form of tritiated water, is among the principal radionuclides released in atmospheric emissions and aqueous effluents of Ontario Hydro Nuclear Generating Stations. Following release, this tritiated water is distributed among the components of the ecosystem, including biota. Existing models of the metabolism and dosimetry of tritium focus on the dose received from tritiated water. However, recent studies indicated that the inclusion of the dose from organically bound tritium may significantly increase the total radiation dose resulting from chronic tritium exposure. This study was initiated to define the changes in activity of tissue water tritium and organically bound tritium in mice chronically exposed to tritiated water, tritiated diet or both.

The Trophic status of nearshore waters in Lake Superior at three Ontario water supply intakes, 1979-1984

by G.J. Hopkins. Toronto : Ministry of the Environment, Water Resources Branch, 1986. ii, 57 p. Bibliogr.

MICROLOG 89-02869 1 fiche

In 1976, the Ontario Ministry expanded its provincial phytoplankton monitoring programme at Great Lakes water supply locations to measure several water quality parameters. The main goal of this expanded intake monitoring programme was to assess the nearshore water quality of the Great Lakes over a long term (10 years or more) with emphasis on selected trophic indices such as phytoplankton, phosphorus, nitrogen, silica, chloride, conductivity, and chlorophyll. In 1979 the waterworks at Thunder Bay and Terrace Bay on Lake Superior were added to this network. Phytoplankton biomass has been monitored at the water intake for the city of Sault Ste. Marie on the St. Marys River since 1965. This report presents the results of this monitoring at Thunder Bay, Terrace Bay, and Sault Ste. Marie from 1979-84.

Trout cage culture and water quality in Besnard Lake

by W.K. Liaw. Regina : Saskatchewan Parks, Recreation and Culture, Fisheries Branch, 1988. vii, 49 p. : ill. Bibliogr. (Fisheries technical report ; 88-3)

MICROLOG 89-05986 1 fiche

A great deal of interest in cage culture of trout has recently developed in Saskatchewan, particularly in the central and northern parts, where most lakes are in an oligotrophic or mesotrophic condition. Intensive cage culture operations can have adverse impacts on the aquatic environment. Recognizing this, a preliminary water quality monitoring program was begun on Besnard Lake in the summer of 1987 where an intensive trout cage culture operation was being conducted. In May, a total of 50,000 rainbow trout fingerlings were stocked into floating cages located in a small bay in the west basin of Besnard Lake. In October, an estimated 44,000 fish weighing 8.8 tonnes were produced from the operation. Between June 10 and August 26, 1987 a number of water quality related variables were monitored from the cage culture site and a reference bay.

Tumbler Ridge branch line electrification demonstration

by H. Lockhart. Montreal : Transport Canada, Transportation Development Centre, 1986. vi, 14 p. : ill. Bibliogr. TP 8334E.

MICROLOG 89-04069 1 fiche

BC Rail's Tumbler Ridge Branch Line was built between 1981 and 1983 to provide rail access to the northeast coal fields in British Columbia. Because of long grades and heavy tonnage, it was decided to electrify the branch line rather than provide complex ventilation systems in the two long tunnels. This report documents the reasons for electrification, the design, construction and commissioning of the power supply and catenary systems, the testing of the electric locomotives, power management, and operating and maintenance costs.

Turbulence measurements in the swirling flow at the entrance to the CCRL tunnel furnace facility

by A.G.L. Holloway and S. Tavoularis. Ottawa : University of Ottawa, Dept. of Mechanical Engineering, 1989. 168 p. : ill. Bibliogr. CANMET contract: 89175-01-SS.

MICROLOG 89-05406 2 fiche

The CANMET/combustion and carbonization research laboratory (CCRL) tunnel furnace facility is used to test various coal based fuels. A computational model was developed which incorporates conservation laws and models of turbulence and combustion to improve the understanding of the performance of these fuels and to allow prediction of tunnel operation within ranges of the various flow and fuel parameters. The execution of this program requires as input the mean velocity and turbulence statistics at the entrance to the

furnace. This study provides measurements of the mean velocity and turbulence stresses at the burner exit. Three fixed and one variable swirl generators were studied for various degrees of swirl and two different mass flowrates.

Twenty year results of the Great Lakes-St. Lawrence Region white spruce provenance test in Newfoundland

by M.A.K. Khalil. St. John's : Government of Canada, Canadian Forestry Service, Newfoundland Forestry Centre, 1979. vi, 18 p. Bibliogr. (Information report : N-X-172) ISSN 0704-7657
MICROLOG 89-00163 1 fiche

An experiment was established in the spring of 1963 in the North Pond Experimental area in east-central Newfoundland to identify white spruce provenances suitable for Newfoundland. Thirty-one provenances from the Great Lakes-St. Lawrence region of Canada and the adjoining areas of U.S.A., with one provenance from the Humber Valley in western Newfoundland, were tested. Trends in variation between 1969 and 1978 were discussed and juvenile-late correlations were determined for early selection of superior provenances. Recommendations were made for future research and development work for white spruce in Newfoundland.

Twenty years of group management in a yellow birch-sugar maple stand

by M.R. Roberge. Sainte-Foy, Que. : Government of Canada, Canadian Forestry Service, Laurentian Forestry Centre, 1988. vi, 22 p. Bibliogr. (Information report : LAU-X-81B) *Bilingual (Vingt ans d'aménagement...)*. ISSN 0835-1589 ISBN 0-662-56171-6
MICROLOG 89-00440 1 fiche

One alternative in the management of northern mixed forests is group clearcutting producing openings less than 100 m in diameter. This report provides information on the results of such clearcutting, particularly on the long-term effects on regeneration and growth. The 20-year study was conducted on a yellow birch-sugar maple stand in the Dudswell commercial forest. The report attempts to establish if group clearcutting actually yields a permanently higher proportion of moderately shade-tolerant species than single-tree selective cutting, or leads to an uneven-aged stand giving variable or unpredictable yields as in the case of single-tree selective cutting.

The Two psychiatries : the transformation of psychiatric work in Saskatchewan, 1905-1984

by H.D. Dickinson. Regina : University of Regina, Canadian Plains Research Center, 1989. xxii, 371 p. : ill. Bibliogr. (Canadian plains studies ; 15) ISSN 0317-6290 ISBN 0-88977-048-4
MICROLOG 89-05596 5 fiche (Available on fiche only)

Examines the changing nature and organization of psychiatric work in Saskatchewan since the beginning of this century, and the establishment and growth of two increasingly separate psychiatric service systems. The medical system is grounded in the claim that mental illness exists and that its etiology is to be found in the malfunctioning of some physiological, biochemical or genetic system. The non-medical system is grounded in the claim that much, if not most, of what is termed mental illness is not illness at all, but psychosocial problems in living that manifest themselves as mental or emotion disorders. This publication studies the way in which this dispute over the proper definition, care, and treatment of mental illnesses and disorders manifested itself in the institutional transformation of psychiatric work.

Type and extent of ground disturbance following skidder logging in Newfoundland and Labrador

by A.B. Case and J.G. Donnelly. St. John's : Government of Canada, Canadian Forestry Service, Newfoundland Forestry Centre, 1979. iii, 25 p. : ill. Bibliogr. (Information report : N-X-176) ISSN 0704-7657
MICROLOG 89-00160 1 fiche

Knowledge of ground conditions following logging is an important prerequisite to sound forest management, if one considers that site protection and conservation are essential to the growing of trees. Six cutovers located throughout Newfoundland and Labrador were examined one year after logging. All areas were harvested by clearcutting and using rubber-tired skidders to transport tree-lengths from the felling area to roadside landings. Steep areas along streams and lakes, wetland borders, and unmerchantable second-growth trees were not harvested. For purposes of this study such residual patches of uncut wood were not considered part of the cutover area.

U.S.-Canada productivity gap, scale economies, and the gains from freer trade

by P. Someshwar. Ottawa : Economic Council of Canada, 1988. ix, 84 p. Bibliogr. (Discussion paper ; no. 357) *CSI 22215.220*. ISSN 0225-8013
MICROLOG 89-00205 2 fiche (Available on fiche only)

Two specific aspects of the Canada-United States free trade debate are the concern of this paper: the size of U.S.-Canada manufacturing productivity gap and the role of scale economies in explaining this gap. The following are some of the important questions the paper answers: Is there an aggregate productivity gap between the U.S. and Canada? How much of the aggregate productivity gap can be attributed to the poor performance of Canadian manufacturing productivity? What factors could account for the puzzling result of no improvement in the manufacturing productivity gap since 1970, especially the recent deterioration? How important are the industry size economies to Canadian manufacturing sector? Is there room for a significant improvement in Canadian manufacturing productivity from rationalization and specialization? The paper provides conclusions and policy implications.

Ultimate load test of a slab-on-girder bridge

by B. Bakht. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1988. iii, 58 p. : ill. Bibliogr.
MICROLOG 89-03152 1 fiche

Description of an ultimate load test on the Stoney Creek bridge in the City of London, a right, short-span, two lane bridge with a concrete deck slab and 6 rolled steel girders which were simply supported on concrete abutments. In 1978, the bridge was removed for replacement by a wider one, and was offered to the Ministry for testing to failure. The test was carried out in May 1978 and the analysis of the test data was done. Because of apparent discrepancies in the applied moments and the sum of girder moments at the instrumented cross-section computed from measured strains, the results could not be reported. Recent tests on similar bridges explained these results, leading to the re-analysing of the Stoney Creek bridge data.

Ultrasonic defect sizing using decibel drop methods, volume III : fatigue cracks

by C. Mills, J. Goszczynski and A.B. Mitchell. Ottawa : Atomic Energy Control Board, 1988. v, 60 p. : ill. (Research report : INFO-0250-3)
MICROLOG 89-00741 1 fiche

A variety of decibel drop techniques are currently in use for ultrasonic sizing of flaws in welds during the periodic inspection of Canadian nuclear power plants. Due to the diversity of techniques and their application, the accuracy and repeatability of using these techniques in sizing flaws has been questioned. A study was sponsored into the relative merits of each technique. As an extension to that program, this report used the techniques developed to perform a similar study of the type of flaws expected to develop during service (i.e. fatigue cracks).

Universal borehole installing tool

by G. Herget and F. Kapeller. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 8 p. : ill. (Report ; MRL 88-129(TR))
MICROLOG 89-04603 1 fiche

In rock mechanics most of the remote monitoring and physical properties measurements are done in diamond drill holes. Slight deviations in borehole sizes and the need to install standard size equipment in different size boreholes requires the building of centring devices or adapter rings. With the variation of borehole equipment available, it was decided to build a centring device which allows adjustment to different borehole diameters on site. The universal borehole installing tool was built to allow installation of instrumentation in boreholes from 75 mm diameter to 220 mm diameter. This report describes the tool and the field experience gained at Macassa Mine, Lac Minerals Ltd., Kirkland Lake, Ontario at a depth of 1585 m and 1890 m in the summer of 1985 installing a South African strain cell, and in the summer of 1986 installing strain rings at the Niobec Mine near St. Honoré, Québec.

Update report : priority toxic chemicals of concern from Ontario point sources discharging to the Niagara River, 1988

Ontario. Niagara River Improvement Programme. Toronto : Environment Ontario, 1989. 14 p. ISBN 0-7729-5844-0
MICROLOG 89-06229 1 fiche

The main objective of the Niagara River toxics management plan is to reduce the loadings of toxic chemicals to the Niagara River. Ten toxic substances were selected for priority attention because they are present in the Niagara River/Lake Ontario ecosystem at unacceptably high levels. The Committee identified 17 facilities as point source dischargers in Ontario that discharge directly into the river. Two of these facilities are no longer direct dischargers and one other facility was added. This report outlines which of the industrial and municipal facilities contribute one or more of the 10 chemicals targeted for 50% reduction and what abatement measures are required to achieve that goal. Results are based on the 1988/89 point source monitoring data collected by the Niagara River improvement project. Dioxin (2,3,7,8 TCDD) was not included in the chemical analysis during the 1988/89 monitoring period.

Upper and northern Bay of Fundy scallop surveys, 1986-87

by R.A. Chandler, G.J. Parsons and M.J. Dadsell. St. Andrews, N.B. : Dept. of Fisheries and Oceans, Marine Fish Division, Biological Sciences Branch, Biological Station, 1989. iii, 37 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1665) Two hundred and second technical report of the Biological Station, St. Andrews, N.B.. ISSN 0706-6457
MICROLOG 89-02935 1 fiche

Sea scallop population assessments are routinely made in the Digby and Grand Manan areas of the Bay of Fundy, but no comprehensive scallop survey has been made in the upper part of the Bay. In 1984-85, the

area around Quaco Ledge and Ile Haute was heavily fished and, partly in response to this commercial activity, a survey was undertaken to determine scallop distribution. The survey consisted of 3 cruises, with the upper Bay surveyed in May 1986 and August 1986, and the northern side of the Bay from Quaco Head to Maces Bay in June 1987. The survey gathered baseline data on populations, associated fauna, and biological parameters.

Urban travel demand : the impact of Box-Cox transformations with non-spherical residual errors

by M.G. Dagenais, M.J.I. Gaudry and C.L. Tran. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. iv, 79 p. Bibliogr. (Publication ; no. 358) (Cahier ; 8431)
MICROLOG 89-00017 1 fiche

Formulation and extensive application of an algorithm to estimate the parameters of an econometric specification structure which generalizes the Box-Cox regression method by simultaneously accounting for multiple autocorrelation and heteroscedasticity of a broad and flexible nature. The applications are made with two transit demand equations used in practice as well as with a gasoline demand equation and summarizes a large number of tests and considerable numerical experience with the procedure. In addition to the statistical results, economic results are presented through the use of tables of rigorously defined elasticities, including new measures for dummy and quasi-dummy variables, and values of time.

Use of biological indicators for evaluating environmental stress

by C. Létourneau and J. Castonguay. Ottawa : Atomic Energy Control Board, 1988. v, 60 p. Bibliogr. (Report ; INFO-0248)
MICROLOG 89-04575 1 fiche

Examination of the possibility and validity of using biological organisms as indicators of environmental stress in the same way that animals become restless in case of fire or canaries placed in a mine warn of danger by succumbing to asphyxia. The report begins by reviewing various biological analyses, classed according to the holistic approach (biotic and diversity indices) and the reductionist approach (biological indicators per se), then explores the indicator potential of plants and animals in the light of established criteria. Special emphasis is placed on the use of such analyses to evaluate the environmental impact of radioactive effluent from nuclear power plants.

Use of biomass conversion products as binders for fine coal agglomeration

prepared for Bioenergy Development Program, Dept. of Energy, Mines and Resources ; by Industrial Chemistry Division, B.C. Research. Vancouver, B.C. : B.C. Research, 1988. 39 p. Bibliogr.
MICROLOG 89-05611 1 fiche

The potential use of such conversion products is significant to western Canada producers of bituminous coals as a means of reducing the amount of fines. The test program included investigation of NRC oil agglomeration, Dravo pressure filtration/forming, and pin agglomeration (turbulation). The former two are methods for both dewatering and agglomeration; turbulation is a method for micro-agglomeration/bonding of dry fines such as are produced from fluid bed thermal drying of coal. A vacuum pyrolysis oil (Laval University), a slurry hydrogenation product (Albany TR-12 USDOE), and steam pyrolysis products produced in-house were used for biomass feedstock. Coals used were from Bryon Creek Collieries Ltd. (thermal and

flotation concentrate). Fording Coal Ltd. (fines from blended product) and Westar Coal Ltd. (metallurgical coal fines; dryer dust from the Greenhills Mine). Sulphite lignin was also used in tests on dry coal fines.

The Use of cover crops to control tree invasion on a right-of-way near Tobermory, I : preclearing conditions and a research proposal

by D. Brown. Toronto : Ontario Hydro, Research Division, 1989. iv, 22 p. : ill. Bibliogr. (Report ; no. 88-296-K)
MICROLOG 89-04568 1 fiche

In the past 2 decades, Ontario Hydro has relied on selective herbicide applications to remove incompatible species from their transmission and distribution rights-of-way. This approach is designed to encourage a type of biological control, where the compatible groundcover interferes with the invasion of tree species via competitive or allelopathic interactions. An alternative method of establishing this control is by replacing the existing vegetation with species that have a demonstrated ability to interfere with tree establishment. All distribution lines in the Tobermory area of the Bruce Peninsula scheduled for clearing during the fall and winter of 1988 were included in a preliminary survey to select potential research sites. Primary factors considered were width of right-of-way, forest composition, uniformity of the vegetation, soil depth, and the amount of gravel, boulders, and exposed bedrock at each location. This report describes the preclearing vegetation and soil conditions at the selected site, as well as a research proposal which outlines the experimental design and discusses additional desirable factors.

Use of LIF by-product for stabilizing hydraulic mine backfill

by H.T. Chan and L. Konecny. Toronto : Ontario Hydro, Research Division, 1989. 16 p. : ill. Bibliogr. (Report ; no. 88-316-K)
MICROLOG 89-04574 1 fiche

As part of Ontario Hydro's effort to reduce acid gas emissions from its coal-fired

generating stations, a number of desulphurization processes are studied. One process which was evaluated at the Lakeview Thermal Generating Station in 1986 and 1987 was limestone injection into the furnace (LIF) technology. The LIF reaction by-product consists of fly ash, sulphation by-products, and unreacted sorbent. One utilization option of this by-product is its use as a binder for stabilizing hydraulic mine backfill because of its self cementitious properties. In 1987-88, research was undertaken to study the feasibility of using the LIF to stabilize mine backfill. This report discusses the laboratory test data. NR ON PR SC

The Use of natural stream characteristics for stream rehabilitation works below the Manitoba escarpment

by R. Newbury and M.N. Gaboury. Winnipeg Dept. of Natural Resources, Fisheries Branch. 1987. 22 p. : maps. Bibliogr. (Manuscript report ; no. 87-25)
MICROLOG 89-00732 1 fiche

The channelization and extension of stream channels to drain wetlands on the western edge of the flat glacial Lake Agassiz plain in south-central Manitoba caused stream instability and environmental damage and reduced fisheries and other biologically important habitats in the stream channels and downstream lakes. Experimental stream rehabilitation works based on natural pre-development characteristics were constructed and tested in 2 streams flowing into Lake Dauphin, consisting of gradient control dams and fieldstone riffles to re-create natural pool and riffle hydraulic habitats. A benefit/cost analysis and biological response to these measures is given. FI MS PR SC

Use of polymeric transmission cables in Ontario Hydro : task force report

by B.K. Gupta. Toronto : Ontario Hydro, Research Division, 1988. 11 p. Bibliogr. (Report ; no. 88-66-K)
MICROLOG 89-02571 1 fiche

Solid transmission cables with polymeric insulation have been successfully used since 1969 at 230 kV and up to 400 kV in Europe and Japan. However, North American utilities have been reluctant to accept these cables at 230 kV. This task force was set up to review the availability and use of solid transmission cables around the world, assess their reliability in service, and make recommendations regarding their future use in Ontario Hydro. The advantages and disadvantages of solid transmission cables and oil-paper cables are briefly described and the availability of solid transmission cables and the differences in their design from distribution class cables are identified. Experience with the use of polymeric transmission cables around the world is reviewed, transmission cable installations planned for the next few years in Ontario Hydro are identified, and possible problems and solutions are considered. Use of riblets to obtain drag reduction on airfoils at high Reynolds number flows

by M. Khalid. Ottawa : National Aeronautical Establishment. 1988. v. 19 p. : ill. Bibliogr. (Aeronautical note ; NAE-AN-53)
MICROLOG 89-00220 1 fiche (Available on fiche only)

This paper reports some results from an investigation concerning the application of riblets on airfoil surfaces at a range of Mach Numbers from M=0.15 to 0.76 and up to a Reynolds Number of 8 million per foot. The measurements were made in NAE's 15" X 60", 2 D High Reynolds Number Trisonic Facility. Two sizes of riblet sheets having groove measurements of 0.0013 and 0.0030 inches were mounted on a 13% thick airfoil. The effective drag on the airfoil, with and without the riblets was measured by a sidewall-mounted traversing rake supporting four pivot probes. This report provides a short background to the work, with a brief discussion of the facility and the experiment, followed by an analysis of the results. CA PR SC TR

Using the borehole jack to determine changes in river ice strength

by T.D. Prowse, M.N. Demuth and C.R. Onclin. Saskatoon, Sask. : Environment Canada, National Hydrology Research Institute. 1988. 19 p. : ill. Bibliogr. (NHRI contribution ; no. 88043) Presented at the Workshop on Hydraulics of River Ice/Ice Jams. ISSN 0838-1992
MICROLOG 89-05552 1 fiche

Ice strength plays a critical role in the initiation and progression of river-ice breakup and partially determines the stress imparted to structures during subsequent ice runs. Changes in strength result from overall warming of the cover and from radiation melt within the ice sheet. An ability to measure such changes could greatly assist in the prediction of the timing and severity of breakup. Because of the weakness of the ice during the pre-breaking period, strength measurements must be carried out in situ. Past experiments relied on penetration, small-scale compression, and simply-supported and cantilevered beam tests. This paper reports on the use of a borehole jack 18 days immediately preceding breakup. The results are related to detailed radiation balance measurements conducted over the same period and to calculated changes in internal ice porosity. CA EV PS SC

Vancouver Island Roosevelt elk/intensive forestry interaction, phase 1 (1981-1986) : job completion report

by K.R. Brunt, D.Q. Becker and J.A. Youds. Victoria : Ministry of Environment and Parks, Wildlife Branch, 1989. xv, 160 p. : ill. Bibliogr. (Wildlife bulletin ; no. B-51) A Cooperative project between the Ministry of Environment and the Ministry of Forests. ISSN 0829-9560 ISBN 0-7726-1003-7
MICROLOG 89-06152 2 fiche

Roosevelt elk on Vancouver Island are a highly prized species for hunters and non-consumptive users alike and their successful management depends on the protection and provision of important elk habitats through integrated forest and wildlife habitat management. This study was initiated in 1980 to collect information on elk habitat use in immature forests, and to use this information in formulating forest management recommendations. The first part of the program ended in March 1986 and consisted mainly of research of elk habitat preferences and requirements. In the latter part of Phase I, efforts were concentrated on collecting habitat use data from radio-collared elk in the Greenstone migratory herd during winter. This report presents analyses and ecological interpretations of data collected from April 1981 to March 1986. The effects of forest management activities on elk were examined through assessment of seasonal habitat use, food habits, migratory habits, animal condition, and population status.

Variability of MSR lumber in tension

by C. Lum. S.I. : Canada-Alberta Forest Resource Development Agreement, 1986. viii, 92 p. : ill. Bibliogr. ISBN 0-662-15453-3
MICROLOG 89-01414 2 fiche

Study undertaken for Jager Industries Inc. on 2100F-1.8E Machine Stress-Rated lumber, used for flanges on their Wood I-beam. Although all such flanges are tension proofloaded to 1.8 times the design load, 1% of the flanges continue to break at locations other than the joint. The study determined whether 2100F-1.8 MSR lumber met the tension requirements of CSA-086 and, if not, whether the requirements could be met with additional or refined visual overrides. Procedures followed are described in detail.

Varsity community special study

Calgary, Alta. : Calgary Planning and Building Dept., 1989. ii, 22 p. : maps.
MICROLOG 89-05767 1 fiche

This report addresses concerns raised by the Varsity community regarding the potential impact on the community of developing existing vacant sites. It looks firstly at the current situation in Varsity as regards population density and the provision of open space. Next it analyses the eleven vacant sites and recommends suitable land uses for each. Then it considers the impact on the community of those sites being developed as recommended. Finally the report reviews the traffic volumes on 53 Street N.W. and looks at ways in which it might be controlled.

A Vehicle routing improvement algorithm : comparison of a greedy and a matching implementation for inventory routing

by M. Dror, M.O. Ball and L. Levy. Montreal : Université de Montréal, Centre de recherche sur les transports, 1984. 24 p. : ill. Bibliogr. (Publication ; no. 364)
MICROLOG 89-00019 1 fiche

Paper presenting two routing improvement procedures, with a comparison of their performance. The procedures were designed and implemented on a solution to an inventory routing problem, applied to a situation where a set of customers are resupplied from a central depot and the objective is to minimize the annual distribution of costs while attempting to ensure that no customer runs out of the commodity at any time. Three heuristic route improvement schemes based on the concept of node interchange between different routes are presented. Three algorithms are given together with their computational performance when applied to an inventory routing problem for 12 consecutive weekly periods. In two of the algorithms, a minimum weight matching problem is solved.

Verification of a Central American peace accord

by H.P. Klepak. Ottawa : Dept. of External Affairs, Arms Control and Disarmament Division, 1989. xi, 78 p. : ill. Bibliogr. (Arms control verification studies : no. 2) *French ed. (Vérification d'un accord...)* : 89-03545/2. ISSN 0828-3664 ISBN 0-662-16769-4
MICROLOG 89-03544 1 fiche

This paper discusses the background to, possible contexts of, and likely difficulties with, an eventual Central American peace accord particularly its verification. It begins with a brief analysis of the political, military and diplomatic background of the regional crisis, setting the scene for a look at the verification aspects of the peace negotiations and agreements to date: Contadora, Esquipulas II, and Sapo. It shows what kind of further agreement one might see in the future, doing this by examining both "minimum" and "maximum" content possibilities. This is followed by a discussion of the verification implications of such agreements and the political, geographical, social, and technical

difficulties they might pose.

Vertical axis wind turbine and wind prospecting site data analysis : final report for 1986

prepared for Renewable Energy Branch, Energy, Mines and Resources Canada ; by TES Limited. Ottawa : TES Ltd., 1987. 84 p. MICROLOG 89-05621 1 fiche

In order to assess the potential for generation of electricity from wind power, a number of wind prospecting sites were established across Canada. Wind regime data was collected in the form of a wind speed profile at each site. This data was then to be reduced and analyzed and the results presented in a form that would facilitate comparison of data between sites and data collected by other agencies. Data from 3 Vertical Axis Wind Turbines (VAWT) energy generating sites was also processed, providing a means of comparing turbine performance with wind regime data and potential energy generation calculations. This report summarizes the work carried out from June 1986 to March 1987 and includes recommendations.

Video-recorded driver behaviour at railway crossings : approach speeds and critical incidents

Gerald J.S. Wilde, Michael C. Hay and José N. Brites : prepared for Transportation Development Centre. Kingston, Ont. : Queen's University, Canadian Institute of Guided Ground Transport, 1987. xiv, 37 p. Bibliogr. (CIGGT report ; no. 87-6) TP 9014E ISBN 0-88911-059-X
MICROLOG 89-04026 1 fiche

Study to add additional information to the existing data base describing critical incidents that occur at level railway crossings under normal operating conditions. The critical incident technique involves the collection and analysis of data on failures, errors, narrow escapes, and near-accidents and are defined as events that bring an accident significantly closer to realization, although no reportable accident actually occurs. Video recordings with voice-over narratives were made by a 2-person observation team at 7 railroad crossings in Ontario during full daylight in summer 1987 in dry weather. All approaching vehicles within about 100 metres of the crossing were recorded, concentrating on the crossing itself immediately after the crossing signals or train whistle were activated. In addition to vehicular flow data, train and signal data were recorded.

MICROLOG 89-03153 5 fiche

Cette étude porte sur les conditions de logement de la ville; on y aborde des thèmes comme la législation, le paysage urbain, les jardins de l'époque, le décor intérieur, et les résidents de la capitale. Pendant plus de 60 ans, la vie de Québec s'est caractérisée par trois phénomènes, soit la mobilité de ses résidents, la concurrence professionnelle qui s'y manifeste et l'appauvrissement de sa population.

Vingt ans d'aménagement par groupes d'une bétulaie jaune à érables

par M.R. Roberge. Sainte-Foy, Québec : Gouvernement du Canada, Service canadien des forêts, Centre de foresterie des Laurentides, 1988. vi, 22 p. Bibliogr. (Rapport d'information ; LAU-X-81B) Bilingue (*Twenty years of...*). ISSN 0835-1589 ISBN 0-662-56171-6
MICROLOG 89-00440 1 fiche

Parmi les méthodes utilisées pour l'aménagement des forêts mélangées nordiques, il y a la coupe à blanc par groupes produisant des trouées de moins de 100 m de diamètre. Une coupe à blanc par groupes, effectuée en 1964, couvrant 20% de la superficie d'une bétulaie jaune à érables de la forêt de Dudswell, combinée à une éclaircie de 19% sur l'autre 80%, résulta en 1984 en une régénération très abondante partout et sans différence d'une aire à l'autre pour ce qui est de la composition en bouleau jaune et en érable à sucre. Cette étude sur 20 ans vise à éliminer certaines incertitudes quant à l'emploi de la coupe à blanc par groupes combinée à l'éclaircie d'une telle bétulaie.

Viscoelastic behavior of polymer blends

by L.A. Utracki. Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1988. 16 p. : ill. Bibliogr.
MICROLOG 89-00550 1 fiche (Available on fiche only)

There is a reciprocal relation between flow and structure in multiphase systems such as polymer blends or composites. For this reason characterization of these materials must be carried out under conditions which guarantee minimum modification of structure. The capillary rheometry is particularly ill suited as a test tool, but the small strain dynamic oscillatory method may provide the true material response. This report presents two other methods of data presentation more sensitive to melt structure: the Cole-Cole plot of n' vs. n'' , and the relaxation spectrum. Various mechanisms leading to a binomial response behaviour are discussed.

Viscosity effects in selected flux cored arc welding consumables

by K.G. Leewis. Oakville, Ont. : Welding Institute of Canada, 1988. iii, 56 p. : ill. Bibliogr. At head of title: *Research report. CANMET contract: 69161-01-ST.*
MICROLOG 89-01730 1 fiche

Flux cored arc welding (FCAW) appears extremely appropriate for the repair and fabrication of offshore structures, having the advantage of improving the weld metal chemistry control and with gas shielding, the possibility of tougher mechanical performance. This report analyzes samples of welding fluxes and measures the melting temperature and

viscosity using both the extracted raw fluxes and also the slags after welding. These physical properties are then used to determine a mechanism to explain the better performance of the rutile consumables over the basic and metal cored consumables.

Voyageur ACV trials on the Mackenzie Delta : environmental effects two years later

Montreal : Transportation Development Agency, 1976. iii, 23 p. : ill. Bibliogr.
MICROLOG 89-00180 1 fiche

In August, 1973, a series of tests was conducted with an Air Cushion Vehicle (ACV) to assess the impact of multiple passes on the terrain, vegetation, and avifauna under Low Arctic conditions. The tests were conducted on the southern part of Richards Island in the Mackenzie Delta region of the Northwest Territories under both lowland and upland tundra conditions. In addition, tests were made on land-water interfaces along the shores of small ponds having both floating and emergent vegetation. The trials included single and multiple passes (20 passes) at different speeds under diverse weather conditions and with varying load weights. Maneuvers such as stationary hover and pirouette were also performed. In September 1975, a reassessment of the ACV trial site was carried out to determine whether significant long-term terrain and vegetation changes had been induced by the trials. The results of the reassessment are presented in this report.

MICROLOG 89-02297 2 fiche

Drawing on two unique Statistics Canada surveys, the 1981 Work History Survey and the 1986 Labour Market Activity Survey, this study reports on changes in the distribution of jobs by hourly wage rate between 1981 and 1986. Possible reasons for the decline in the relative earnings of the young are discussed, including labour market crowding due to the large cohort of young workers, the lingering effect of the recession on the demand for labour in entry level jobs, and other changes occurring in the youth labour market. A regional analysis of the changing wage distributions is also included.

Wages and working conditions by occupation, 1988

Regina : Saskatchewan Human Resources,
Labour and Employment, 1989. 244 p.
CSI 71122.002. ISSN 0706-4926
MICROLOG 89-03880 3 fiche

This report is a summary of results obtained in a survey of business establishments operating in the province. The reference month for the survey is October 1988. Data were collected from 1,095 establishments representing all major industries, firm sizes and geographic locations. This report contains wage data for 353 occupations and reports on working conditions for 91,426 employees.

Waste dump design for erosion control

by R.G. Chopiuk and S.E. Thornton.
Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1987. xvii,
45 p. : ill. (Report ; RRTAC 87-8)
MICROLOG 89-01051 1 fiche

The Waste Dump Design for Erosion Control study was initiated in 1983 with the selection of several foothills/mountain coal mine waste dumps to evaluate the effects of final configuration on the amount of surface erosion occurring. Data on the movement of the slope surfaces were collected twice in 1983, 3 times in 1984, and 3 times in 1985. This report presents a history and outline of the project as well as a discussion of the results of the monitoring program. Analyses performed on the data included checks on the frequency distribution, plot means and standard deviations, analysis of variance, t-tests for paired variables, rejection of outliers, and regression.

Waste heat recovery

Ottawa : Energy, Mines and Resources Canada, 1987. 57 p. : ill. (Energy management series for industry, commerce and institutions) ISBN 0-660-12238-3
MICROLOG 89-00294 1 fiche

Waste heat can be interpreted as heat rejected from a facility to the environment. Recovery and reuse of this heat has the potential for reducing energy costs and improving the profitability of businesses. This manual discusses concepts required to identify waste heat available, heat exchange and heat pumping, principles of operation, conducting waste heat recovery audits, mass-energy balances, waste heat energy cascading and upgrading; sources of waste heat, with practical suggestions for recovery applications, description of the theory, equipment and applications of the various recovery systems; and energy management opportunities, including worked examples of projects.

Waste management implications of concentrating slimes : effect of management practices

by Beak Consultants Limited and Golder Associates. Ottawa : Atomic Energy Control Board, 1988. x, 68 p. Bibliogr. (Research report ; INFO-0195-2)
MICROLOG 89-00735 1 fiche

The anticipated increase in demand for sand-size tailings from the uranium industry suggests that the fine-grained or 'slime' fraction will require special attention for disposal. This investigation reviewed management options for slime-enriched tailings, with emphasis on techniques and schemes maximizing the benefits and reducing negative impacts. The review included surveying the mining practices in countries other than Canada and also included other mining and milling operations (non-uranium) in Canada, with an extensive search of the literature.

MICROLOG 89-00411 2 fiche

Sugar maple and yellow birch are among the most economically important hardwood species in Quebec and form dense stands that cover large areas of the deciduous forest. In view of the economic importance and scarcity of yellow birch and other species that tolerate shade poorly in comparison with sugar maple, the preferred approach is to treat these forests so as to maintain maple-dominated mixed stands. This report presents an analysis of data collected over a 15-year period in an uneven-aged sugar maple-yellow birch stand managed by 8-are groups. Every 20 years starting in 1966, 20 percent of the stand area is to be cut by tree groups and the remainder thinned. In the clearings created by tree-group cutting and elsewhere in the understory, site preparation, seedling, planting, seedling filling, and release cutting are to be carried out in the fall, in the spring after the cut, or a few years later.

Water : the potential for demand management in Canada

by D.B. Brooks and R. Peters. Ottawa : Science Council of Canada, 1988. 85 p. Bibliogr. (Discussion paper) French ed. (*La Gestion de l'eau*) : 89-02284/1. ISBN 0-662-15907-1
MICROLOG 89-02283 1 fiche

One of four discussion papers in support of a policy report, this paper addresses the question of how the demand for water can be better managed to ensure the conservation and protection of Canada's water. The paper deals with the questions of pricing water at a level which reflects its true worth; expanding the mandates of water agencies to include managing demand; and encouraging more efficient use of water. The paper reviews water-efficient appliances, fixtures, industrial

equipment, and agricultural practices; the tools available to governments for managing water demand, including pricing policies, education and information programs, licensing agreements, and minimum standards; and a preliminary water demand management strategy.

Water quality predictions for proposed Milk River Reservoir

by H.R. Hamilton and M. Fuglem. Edmonton : Alberta Environment, Planning Division, 1987. 106 p. : ill. Bibliogr.
MICROLOG 89-02229 2 fiche

To satisfy future consumptive water demands in the Milk River basin additional storage must be considered. A site just below the north and south forks of the Milk River is recommended. This report documents an initial evaluation of the possible water quality implications of regulating Milk River at Site 2, predicts probable average and extreme water quality conditions for the proposed reservoir, as well as alterations to the existing water quality of the Milk River below the dam. Outflow concentrations of total dissolved solids and major ions, phosphorus, oxygen, ammonia, and other parameters which may present problems were predicted by simulation modelling. Alternative methods were used to predict reservoir oxygen conditions, aquatic plant and algal communities downstream of the reservoir, trophic upsurge, and trace metals and bacteria.

Water supply constraints to energy development, phase VII : summary report, 1988

prepared for Environment Canada, Inland Water Directorate, and for Energy, Mines and Resources Canada ; by Acres International Ltd. Niagara Falls, Ont. : Acres International Ltd., 1988. 146 p. : ill., fold. maps. Bibliogr. CSI 21147.004
MICROLOG 89-06172 2 fiche

The original study identified and documented proposed energy developments together with corresponding water quantity and quality aspects, followed by the initial development of a water use analysis model which included data base preparation and trial evaluations for potentially critical river basins in the prairie provinces. The model was then enhanced by an evaluation of irrigation water use. The prepared data base was then expanded to cover the entire prairie provinces portion of the Saskatchewan-Nelson River basin and future development scenarios in various sub-basins were analyzed. Additional enhancements to the model, including a capability for explicit modeling of reservoir operations, were added, followed by the incorporation of graphics capabilities, the initial development of a model enhancement for evaluation of electric energy water use, and other improvements. This present work included further development of the graphics capabilities, enhancements to the industrial water use and demand/price analysis routines, and a number of data processing improvements.

A Wave climate study of the northern British Columbia coast : final report

by B. Juszko and D.O. Hodgins. Ottawa : Dept. of Fisheries and Oceans, Marine Environmental Data Services Branch, 1988. 2 v. (Canadian contractor report of hydrography and ocean sciences : no. 22) Contents: Vol. 1 : Wave observations / B. Juszko...et al. - vol. 2 : Wave properties and wave prediction / D.O. Hodgins...et al. ISSN 0711-6748
MICROLOG 89-06106 5 fiche

A wave climate study was conducted of the Queen Charlotte Sound - Hecate Strait - Dixon Entrance area from October 1982 to May 1984, an area with one of the most severe offshore wave climates in the world. Wave buoys included 2 Datawell Waveriders, 2 Adamo Rupp satellite-transmitting wave buoys, one ENDECO WAVE-TRACK directional wave buoy and one Datawell WAVEC directional wave buoy. In addition to the buoys, a weather station was installed to provide wind velocity and barometric pressure observations near the sea surface for comparison with wave data, the surface analysis weather charts and shore-based wind stations. This first volume of the final report presents the verification of the performance of satellite-telemetering wave buoys and documented operational experience in a harsh environment; an assessment of the performance of 2 new types of directional wave buoys; the design and implementation of directional wave data processing techniques and products; and the documentation of the wave climate for a long enough period to obtain good wave statistics, both directional and non-directional.

Weak rock mass model for support of surface crown pillar at les Mines Selbaie, phase II : model development and model calibration

Strata Engineering Corp. S.I. : Strata Engineering Corp., 1987. vii, 92 p. : ill. Bibliogr. CANMET contract: OSQ85-00157. MICROLOG 89-02923 2 fiche

A satisfactory design approach to ground control in surface crown pillar mining is a pressing yet unresolved subject. Various mines throughout Canada, but particularly in Quebec, now operate with some form of surface crown pillar configuration. In April 1985, a 3-phase study was begun of the surface crown pillar at Les Mines Selbaie. Phase I, completed in August 1986, consisted of a field and laboratory investigation of a near-surface crown pillar and acted as a prelude to the 2nd phase, which involved the development and calibration of a weak rock mass model for predicting stability and support requirements. This report presents the results of that model development and the calibration study.

Weather data collection

by B. Tilley. Ottawa : Public Works Canada, Architectural and Engineering Services, 1988. v, 13, v, 14 p. Bibliogr. (Building performance evaluation series : Document D11) Bilingual (Relevé des données...). MICROLOG 89-01928 1 fiche

One of the most important objectives of weather data collection is to provide necessary information for the development of an energy analysis model, used to evaluate performance and identify opportunities for cost saving related to energy consumption. This manual describes the equipment necessary and procedures to be followed for weather data collection. Agencies which collect data for common locations are

listed and their methods of data storage and transfer described. Cross references are given for other related building performance evaluations and weather data sheets and typical weather data collection stations are described.

Weld cracking of monel

by M. Sahoo...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1989. ii, 13 p. : ill. (Report : MTL 89-41(TR)) MICROLOG 89-05076 1 fiche

As part of a cost-shared project on high-strength monels, Deloro Steels Inc. wanted to carry out the weld repair of a particular casting. To this end, a pump housing and an impeller were cast, with the moulds for the two castings prepared at Deloro using pepset sand. The impeller casting was weld repaired at Deloro using monel 60 electrodes, but each weld-repaired area showed cracks even when observed using a magnifying glass. This report contains the results of an investigation of the cause for cracking.

Weld overlay disbonding

by R.B. Lazor and K.G. Leewis. Oakville, Ont. : Welding Institute of Canada, 1988. vi, 94 p. : ill. Bibliogr. CANMET contract: OSQ85-OSQ85-00093. MICROLOG 89-01719 2 fiche

Reactor vessels used for high temperature hydro-treatment of heavy oils or tar sands (bitumen) usually operate at temperatures of 400-450°C and pressures of 10-20 MPa. As the vessel cools after shutdown, the combination of high hydrogen content and high strains along the interface contribute to disbonding between the stainless steel inner overlay and the low alloy steel vessel. This project examined weld overlay procedures that minimize the occurrence of hydrogen induced disbonding, as well as the variability in overlay deposits between fabricators.

Welding procedures for the fabrication of thick section 2.25Cr-1Mo pressure vessel steel

by J.T. McGrath, J.A. Gianetto and R.F. Orr. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1987. ii, 25 p. : ill. Bibliogr. (Report : PMRL 87-12(TR)) MICROLOG 89-00977 1 fiche

Considerable research work has been done on the evaluation of submerged-arc narrow-gap (SAW-NG) weldments designed for use in the fabrication of reactor vessels within the petrochemical industry. This study finalizes the optimum weld procedure and weld chemistry for 2.25Cr-1Mo weld deposits and uses this procedure to prepare a SAW-NG weld in a thick-section (150 mm) 2.25Cr-1Mo steel plate that would meet the mechanical property requirements.

Wetland distribution and conversion in southern Ontario

by E.A. Snell. Ottawa : Environment Canada, Inland Waters and Lands Directorate, 1987. vii, 53 p. : maps. Bibliogr. (Working paper ; no. 48) ISBN 0-662-15077-5
MICROLOG 89-02049 1 fiche

While concern is growing over the loss of wetlands, little comprehensive comparative data on land-use change affecting wetlands exists for southern Ontario. This report presents the methodology and results of a project to map existing southern Ontario wetlands and identify wetlands which have been converted to alternative land uses, both since settlement and in recent years. It also identifies those land uses to which wetlands have recently been converted, and provides a base for monitoring future wetland change. The report only covers wetland conversion to other land uses, not quality decline.

Women and income tax reform

by M. Maloney. Ottawa : Canadian Advisory Council on the Status of Women, 1987. iii, 47 p. (Background paper) French ed. (*Les Femmes et la...*) : 89-05607.1.
MICROLOG 89-03963 1 fiche

The income tax system contains a number of provisions that are discriminatory and detrimental to women. This background paper sets out and analyzes those provisions, making recommendations for change where appropriate. It reviews the general goals of the Canadian tax system and the governing principles to be applied to tax measures. It addresses the issue of the increasing use of the marital unit as the basis for eligibility for certain kinds of tax relief. The expenses associated with raising children are discussed in terms of dependency costs and child-care costs. It then reviews the treatment of alimony and maintenance payments. Finally, it discusses the personal income tax system as it affects the poor, and analyzes proposals for changing the federal manufacturers sales tax into a multi-stage sales tax.

The Women's Initiative, a consultation with the women of Manitoba : departmental inventory of programs and services

Winnipeg : Women's Initiative, 1989. 109 p.
MICROLOG 89-04621 2 fiche

The inventory shows that 13 government departments deliver 39 programs or initiatives which affect women. These programs range from services for battered women and their children to economic security and development. The purpose of this inventory is to assist in the identification of gaps and overlaps and potential new initiatives aimed at women.

The Women's Initiative, a consultation with the women of Manitoba : final report and recommendations

Winnipeg : Women's Initiative, 1989. 55 p.
MICROLOG 89-04620 1 fiche

The Women's Initiative was a 5-month consultation process that heard from 750 women in 24 communities, received over 70 briefs and held 60 meetings. The Initiative focused on 2 key areas: programs and services related to violence against women and their children; and programs and services that focus on economic supports and women's economic development. This report is a synthesis of all that was heard and experienced.
MS PR SA

The Women's Initiative, a consultation with the women of Manitoba : summaries of consultations

Winnipeg : Women's Initiative, 1989. 126 p.
MICROLOG 89-04622 2 fiche

The Initiative was developed to focus on 2 areas in particular: abuse to women and children, and economic development and supports. In the abuse area existing programs and services, as well as the need for new initiatives, were examined. The issue of women's economic development and supports included all services and programs which contribute to women's economic equality. A 4-person consulting committee was appointed to travel throughout the province and conduct informal, workshop-style meetings to determine the effectiveness of programs and services for women. The summaries which encompass this report are based on discussions that took place as part of the consultations, and represent the views of those who participated.

Women, paid-unpaid work, and stress : new directions for research

by G.S. Lowe. Ottawa : Canadian Advisory Council on the Status of Women, 1989. i, 74 p. Bibliogr. (Background paper ; no. 1989-1) French ed. (*Le Travail des femmes...*) : 89-02512/2. ISBN 0-662-16829-1
MICROLOG 89-02511 1 fiche

The media have heightened public awareness of the high personal and social costs of stress, yet major gaps remain in the understanding of work stress. One of the most serious limitations of published research is its focus on males; much of it fails to include gender as a key variable. This report presents an overview of recent literature on women, work and stress, highlighting current and emerging issues in this area, evaluating whether women's needs and concerns have been addressed, suggesting how they might be better addressed in future research, and examining the link between stress reduction and child care, employment equity, parental leave, and other public policies designed to achieve greater

social and economic equality between men and women.

Word for word : being a baseline study of the economic and cultural impact of the business of writing in Alberta

by A.P. Schroeder. Edmonton : Alberta Culture and Multiculturalism, Writers' Guild of Alberta, 1988. 260 p.
MICROLOG 89-01770 3 fiche

While representing less than a quarter of Alberta's statistical writing force, it has been Alberta's freelance writers who have been responsible for most books published, plays and film/video scripts produced, periodical journalism, and much of the educational material used in Alberta by Albertans. This report is a broad survey of the province's published freelance authors, including freelance playwrights and scriptwriters whose works have been professionally produced, and whose writing income is of a non-salaried nature. It presents a market report with indicators on the size of the province's different writing market sector, each sector's current rates of pay and its operating guidelines, in order to highlight both market constrictions and opportunities. Also surveyed are writers as to their sense of why Alberta writers write, what they write, the amount of cultural support and activity they enjoy and produce, the economics and politics of their profession and their relations with government and related cultural agencies.

A Workbook for biomass gasifier sampling and analysis

Techwest Enterprises Ltd. Ottawa : Canadian Forestry Service, 1983. vi, 216 p. : ill. *ENFOR Project C-172.*
MICROLOG 89-05620 3 fiche

Biomass gasifiers convert cellulosic solids to a gas which can be burned directly as a fuel, or can be converted to other products such as methanol and industrial chemicals. This workbook provides a methodology for obtaining an accurate sample of the raw producer gas; measuring the total flow rate of the gas streams entering and leaving the gasifier system; recovering and analyzing the components of the product stream for mass concentration, elemental composition and calorific value, using these data to calculate mass balances, energy balances, net conversion efficiency and gross conversion efficiency; analyzing the aqueous condensate for phenolics, organic acids, alcohols and other components; and modifying a commercial high volume stack sampler to enable it to sample the hot gases and tarry residues.

Zero counts in fish entrainment surveys

by S.A. Bartlett. Toronto : Ontario Hydro, Research Division, 1989. 13 p. Bibliogr. (Report : no. 89-178-K)
MICROLOG 89-06317 1 fiche

Fish entrainment surveys are conducted at power plant intakes to assess the impact of such entrainment on fish stocks in the area. The usual method is to sample fish larvae and eggs flowing into the intake periodically during the larvae and egg seasons, anytime from early spring to fall. Often samples contain no larvae or eggs, leading to zero counts and large variation in the estimates of total entrainment obtained from the survey. A small study was carried out at Pickering NGS in 1988 to determine the causes of zero counts. This report presents the results of that study and speculates on the causes of the zero counts.

In-service plasma-sprayed ceramic coatings may spall catastrophically because corrosion products are developed at the coating-substrate interface. This work was aimed at developing zinc-nickel thermal-spray powders for cathodic protection of steel substrates. Powders were produced from zinc-30 wt% nickel alloy with a particle size distribution of 90-150 µm. A study of their spraying parameters on steel substrates was carried out. The performance of these zinc-nickel coatings was determined by subjecting plasma-sprayed alumina and chromia coatings with and without a zinc-nickel underlayer to aqueous corrosion for various periods of time according to the ASTM B117-85 test. The effect of degradation by corrosion was measured by the ASTM C633-79 procedure.

Rapport d'investigation sur les circonstances
dans lesquelles le pétrolier canadien
Enerchem Refiner a heurté la base du feu
no 1 du chenal extérieur est, dans la partie
américaine du lac Érié, le 5 oct. 1988.
MICROLOG 89-05197 1 fiche

- Rapport d'investigation sur les circonstances dans lesquelles le pétrolier canadien *L'Orme no. 1* a heurté violemment le quai d'Ultramar dans le port de Québec et de l'incendie qui en a résulté le 1^{er} février 1988. MICROLOG 89-00464 1 fiche
- Rapport d'investigation sur les circonstances dans lesquelles les chalands *Crown Forest no 4* et *Evco no 92* ont heurté le pont de chemin de fer de New Westminster. le 28 novembre 1987 et le 17 décembre 1987 respectivement. MICROLOG 89-03182 1 fiche
- Rapport d'investigation sur les circonstances dans lesquelles un débardeur a subi des blessures à bord du navire immatriculé aux Bermudes *Irving Timber* lorsqu'il a glissé sous un tracteur, à Saint-Jean, N.-B. le 20 mars 1987. MICROLOG 89-00605 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage du bateau de pêche canadien *Atlantic Peggy* du navire de charge danois *Snowdrop* à une soixantaine de milles au sud-ouest de Cap Sainte-Marie (T.-N.) le 28 juin 1988. MICROLOG 89-05976 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage du bateau de pêche canadien *Serena J* par un bateau de pêche qui ne s'est pas identifié, dans le Pacifique nord, à 20 milles au sud de la péninsule de Hesquiat, en Colombie-Britannique, le 7 août 1986. MICROLOG 89-01253 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage entre le navire canadien *Quedoc* et la remorque *Birchglen* du remorqueur *Thunder Cape* à l'entrée du canal de la Rive Sud dans la voie maritime, le 23 avril 1988. MICROLOG 89-04349 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage entre le navire montant yougoslave *Split* et le navire canadien *Canada Marquis* à l'ancre dans le port de Trois-Rivières le 26 novembre 1986. MICROLOG 89-00532 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage entre les navires *Eastern Unicorn* et *Maloja II* dans la traverse Batiscan, fleuve Saint-Laurent, le 13 janvier 1988. MICROLOG 89-03109 1 fiche
- Rapport d'investigation sur les circonstances de l'abordage sur le fleuve Saint-Laurent entre les navires *Algowest* et *Coudres de l'île* en aval de la station de pilotage de Les Escoumins, le 15 juin 1988. MICROLOG 89-04260 1 fiche
- Rapport d'investigation sur les circonstances de l'échouement du bateau canadien immatriculé *61D403* suivi de la mort de deux personnes et de la disparition de trois autres alors que le bateau effectuait une traversée entre Cap-aux-Meules et Ile-d'Entrée aux Îles-de-la-Madeleine (QC), le 21 novembre 1987. MICROLOG 89-01582 1 fiche
- Rapport d'investigation sur les circonstances de l'échouement du cargo américain *George A. Sloan* dans le chenal Amherstburg de la rivière Détroit, le 19 octobre 1987. MICROLOG 89-01217 1 fiche
- Rapport d'investigation sur les circonstances de l'échouement du navire canadien *Sir Robert Bond* dans l'entrée du port de Port-aux-Basques, T.-N., le 8 février 1988. MICROLOG 89-03492 1 fiche
- Rapport d'investigation sur les circonstances de l'échouement et des avaries subséquentes à la coque du pétrolier libérien *Filia Star* sur le haut-fond de Red Island, dans la Baie de Plaisance (Terre-Neuve), le 14 mars 1988. MICROLOG 89-05977 1 fiche
- Rapport d'investigation sur les circonstances de l'incendie suivi du naufrage du remorqueur canadien *Sea Comet*, au nord de l'île Gambier dans Howe Sound (C.-B.), le 12 novembre 1987. MICROLOG 89-01218 1 fiche
- Rapport d'investigation sur les circonstances de la chute d'un pilote au moment où il tentait de monter sur le vraquier philippin *General Bonifacio* et de sa noyade consécutive dans la baie Saint-Georges, N.-E., le 20 novembre 1987. MICROLOG 89-00747 1 fiche
- Rapport d'investigation sur les circonstances de la disparition du bateau de pêche canadien *Bonnie Lou II* et de son équipage de cinq personnes, au sud-est de l'île de Sable, dans l'Océan Atlantique, le ou vers le 8 mars 1988. MICROLOG 89-02938 1 fiche
- Rapport d'investigation sur les circonstances de la disparition du navire de pêche canadien *Scotia Cape* avec sept membres d'équipage, dans la région du bassin de la Reine-Charlotte en Colombie-Britannique, vers le 29 janvier 1987. MICROLOG 89-00388 1 fiche
- Rapport d'investigation sur les circonstances du chavirement d'une embarcation de pêche ouverte au large de Lamaline (T.-N.), le 13 mai 1988, au cours duquel deux personnes ont perdu la vie. MICROLOG 89-04962 1 fiche
- Rapport d'investigation sur les circonstances du chavirement du chaland canadien sans équipage *Seaspan 240* alors qu'il était amarré au quai de la Tilbury Cement Limited, sur le fleuve Fraser (C.-B.), le 25 novembre 1986. MICROLOG 89-01219 1 fiche
- Rapport d'investigation sur les circonstances du chavirement et de la disparition du bateau de pêche canadien *Samwise* au large de la côte ouest de l'île de Vancouver (C.-B.), le 1^{er} septembre 1987. MICROLOG 89-01240 1 fiche
- Rapport d'investigation sur les circonstances du heurt du navire libérien *Czantorja* contre les installations portuaires d'Ultramar Canada à Lévis au Québec le 8 mai 1988. MICROLOG 89-01392 1 fiche
- Rapport d'investigation sur les circonstances du naufrage du bateau de pêche canadien *Corey & Aaron* au large de la Nouvelle-Ecosse, le 2 décembre 1987. MICROLOG 89-01195 1 fiche
- Rapport d'investigation sur les circonstances du naufrage du petit bateau de pêche canadien *Chantal* et du décès de deux de ses membres d'équipage, à l'embouchure de la rivière Moisie au Québec, le 27 juin 1988. MICROLOG 89-04844 1 fiche
- Rapport d'investigation sur les circonstances du naufrage du petit bateau de pêche canadien *Natalie* et de la mort présumée de ses trois membres d'équipage, au large de West Dover (N.-E.) le 21 novembre 1987. MICROLOG 89-01223 1 fiche
- Rapport d'investigation sur les circonstances du naufrage du petit bateau de pêche canadien *Pacific Immortal* au large des Îles Triple (C.-B.), le 25 mars 1988. MICROLOG 89-04843 1 fiche
- Rapport d'investigation sur les circonstances entourant le chavirement de l'embarcation de pêche *11D 1019* et de la perte de vie de ses deux occupants à l'approche de l'embouchure de la Rivière Gascons dans la Baie des Chaleurs au Québec, le 30 avril 1988. MICROLOG 89-01597 1 fiche
